Precautions to avoid possible exposure to excessive microwave energy

(a) Do not attempt to operate this oven with the door open since this can result in harmful exposure to microwave energy. It is important not to defeat or tamper with the safety interlocks.

(b) Do not place any object between the oven front face and the door or allow soil or cleaner residue to accumulate on sealing surfaces.

(c) Do not operate the oven if it is damaged. It is particularly important that the oven door closes properly and that there is no damage to the:
   (1) DOOR (dent)
   (2) HINGES AND LATCHES (broken or loosened)
   (3) DOOR SEALS AND SEALING SURFACE

(d) The oven should not be adjusted or repaired by anyone except properly qualified service personnel.

Specifications

Model: MM 2854
Power Source: 230V~50Hz
Power Consumption (Microwave): 1450 W
Power Consumption (Convection + grill): 2400 W (1200 W + 1200 W)
Maximum Output: 850 W
Oven Capacity: 25L
Turntable Diameter: Ø 315mm
External Dimensions (LxWxH): 512 mm x 441 mm x 307 mm
Net weight: 17.0 Kg

READ these instructions carefully before using your microwave oven and keep it carefully for future reference. If you follow these instructions, your oven will provide you with many years of good service.

SAVE THESE INSTRUCTIONS CAREFULLY
1. The oven must be on a leveled surface.

2. The turntable and turntable roller rest must be in the oven during cooking. Place the cookware gently on the turntable and handle it carefully to avoid possible breakage.

3. Incorrect use of browning dish may cause the turntable to break.

4. Use only the specified bag size when using Direct Access Popcorn.

5. The oven has several built-in safety switches to ensure that the power remains off when the door is open. Do not tamper with these switches.

6. Do not operate the microwave oven empty. Operating the oven with no food or food that is extremely low in moisture can cause fire, charring or sparking.

7. Do not cook bacon directly on the turntable. Excessive local heating of the turntable may cause the turntable to break.

8. Do not heat baby bottles or baby food in the microwave oven. Uneven heating may occur and could cause physical injury.

9. Do not heat narrow-necked containers, such as syrup bottles.

10. Do not attempt to deep-fry in your microwave oven.

11. Do not attempt home canning in this microwave oven as it is impossible to be sure all contents of the jar have reached boiling temperature.

12. Do not use this microwave oven for commercial purpose. This microwave oven is made for household use only.

13. To prevent delayed eruptive boiling of hot liquids and beverages or scalding yourself, stir liquid before placing the container in the oven and again halfway through cooking time. Let stand in the oven for a short time and stir again before removing the container.

14. Please do notice the food in the microwave oven to avoid burning due to excessive cooking when cooking food in it.

15. When the appliance is operated in the combination mode, children should only use the oven under adult supervision due to the temperatures generated.

16. Failure to maintain the oven in a clean condition could lead to deterioration of the surface that could adversely affect the life of the appliance and possibly result in a hazardous situation.

READ CAREFULLY AND KEEP FOR FUTURE REFERENCE

1) WARNING: When the appliance is operated in the combination mode, children should only use the oven under adult supervision due to the temperatures generated.

2) WARNING: If the door or door seals are damaged, the oven must not be operated until it has been repaired by a competent person.

3) WARNING: It is hazardous for anyone other than a competent person to carry out any service or repair operation that involves the removal of a cover which gives protection against exposure to microwave energy.

4) WARNING: Liquids and other foods must not be heated in sealed containers since they are liable to explode.

5) WARNING: Only allow children to use the oven without supervision when adequate instructions have been given so that the child is able to use the oven in a safe way and understands the hazards of improper use.

6) The minimum height of free space necessary above the top surface of the oven.

7) Only use utensils that are suitable for use in microwave ovens.

8) When heating food in plastic or paper containers, keep an eye on the oven due to the possibility of ignition.

9) If smoke is observed, switch of or unplug the appliance and keep the door closed in order to stifle any flames.

10) Microwave heating of beverages can result in delayed eruptive boiling, therefore care must be taken when handling the container.

11) The contents of feeding bottles and baby food jars shall be stirred or shaken and the temperature checked before consumption, in order to avoid burns.

12) Eggs in their shell and whole hard-boiled eggs should not be heated in microwave ovens since they may explode, even after microwave heating has ended.

13) Details for cleaning door seals, cavities and adjacent parts.

14) The oven should be cleaned regularly and any food deposits removed.

15) Failure to maintain the oven in a clean condition could lead to deterioration of the surface that could adversely affect the life of the appliance and possibly result in a hazardous situation.

16) If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
Important safety instructions

WARNING: To reduce the risk of fire, electric shock, injury to persons, or exposure to excessive microwave oven energy when using your appliance, follow these basic precautions:

1. Read all instructions before using the appliance.
2. Read and follow the specific: "PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY".
3. As with most cooking appliances, close supervision is necessary to reduce the risk of a fire in the oven cavity.

If a fire should start:
1. Keep the oven door closed
2. Turn the oven off, and unplug the appliance.
3. Disconnect the power at the fuse or circuit breaker panel.

Keep in mind the following rules at all times:
1. Do not overcook food. Carefully attend the appliance if paper, plastic, or other combustible materials are placed inside the oven to facilitate cooking.
2. Do not use the oven cavity for storage purposes. Do not store combustible items such as bread, cookies, paper products, etc. inside the oven. If lightning strikes the power line, the oven may turn on by itself.
3. Remove wire twist-ties and metal handles from paper or plastic containers/bags before placing them in the oven.
4. This oven must be grounded. Connect only to properly grounded outlet. See "GROUNDING INSTRUCTIONS".
5. Install or locate this oven only in accordance with the installation instructions provided.
6. Some products such as whole eggs, water with oil or fat, sealed containers and closed glass jars may explode and therefore should not be heated in this oven.
7. Use this appliance only for its intended uses as described in the manual. Do not use corrosive chemicals or vapors in this appliance. This oven is specifically designed to heat or cook food. It is not designed for industrial or laboratory use.
8. As with any appliance, close supervision is necessary when used by children.
9. Do not operate this oven if it has a damaged cord or plug, if it is not working properly or if it has been damaged or dropped.
10. This appliance should be serviced only by qualified service technicians. Contact the nearest authorised service facility for examination, repair or adjustment.
11. Do not cover or block any vents on the oven.
12. Do not store or use this appliance outdoors.
13. Do not use this oven near water, near a kitchen sink, in a wet basement or near a swimming pool.
14. Do not immerse cord or plug in water.
15. Keep cord away from heated surfaces.
16. Do not let cord hang over edge of table or counter.
17. When cleaning door and oven surfaces use only mild, nonabrasive soaps or detergents applied with a sponge or soft cloth.

SAVE THESE INSTRUCTIONS
Grounding installation

**DANGER:** Electric Shock Hazard
Touching some of the internal components can cause serious personal injury or death. Do not disassemble this appliance.

**WARNING:** Electric Shock Hazard
Improper use of the grounding can result in electric shock. Do not plug into an outlet until appliance is properly installed and grounded.

This appliance must be grounded. In the event of an electrical short circuit, grounding reduces the risk of electric shock by providing an escape wire for the electric current. This appliance is equipped with a cord having a grounding wire with a grounding plug. The plug must be plugged into an outlet that is properly installed and grounded.

Consult a qualified electrician or serviceman if the grounding instructions are not completely understood or if doubt exists as to whether the appliance is properly grounded. If it is necessary to use an extension cord, use only a 3-wire extension cord that has a 3-pronged grounding plug, and a 3-slot receptacle that will accept the plug on the appliance.

1. A short power-supply cord is provided to reduce the risks resulting from becoming entangled in or tripping over a longer cord.
2. Longer cord sets or extension cord is provided to reduce the risks resulting from becoming entangled in or tripping over a longer cord.
3. If a long cord set or extension cord is used:
   1) The marked electrical rating of the cord set or extension cord should be at least as great as the electrical rating of the appliance.
   2) The extension cord must be a grounding-type 3-wire cord, and
   3) The longer cord should be arranged so that it will not drape over the counter top or tabletop where it can be pulled on by children or tripped over unintentionally.

Utensils

**CAUTION:** Personal Injury Hazard
Tightly-closed utensils could explode. Closed containers should be opened and plastic pouches pierced before cooking.

See next page for further instructions “Materials you can use in microwave oven or to be avoided in micro-wave oven”.

Materials you can use in microwave oven

<table>
<thead>
<tr>
<th>Utensils</th>
<th>Remarks</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aluminum foil</td>
<td>Shielding only. Small smooth pieces can be used to cover thin parts of meat or poultry to prevent overcooking. Arcing can occur if foil is too close to oven walls. The foil should be at least 1 inch (2.5cm) away from oven walls.</td>
</tr>
<tr>
<td>Browning dish</td>
<td>Follow manufacturer’s instructions. The bottom of browning dish must be at least 3/16 inch (5mm) above the turntable. Incorrect usage may cause the turntable to break.</td>
</tr>
<tr>
<td>Dinnerware</td>
<td>Microwave-safe only. Follow manufacturer’s instructions. Do not use cracked or chipped dishes.</td>
</tr>
<tr>
<td>Glass jars</td>
<td>Always remove lid. Use only to heat food until just warm. Most glass jars are not heat resistant and may break.</td>
</tr>
<tr>
<td>Glassware</td>
<td>Heat-resistant oven glassware only. Make sure there is no metallic trim. Do not use cracked or chipped dishes.</td>
</tr>
<tr>
<td>Oven cooking bags</td>
<td>Follow manufacturer’s instructions. Do not close with metal tie. Make slits to allow steam to escape.</td>
</tr>
<tr>
<td>Paper plates</td>
<td>Use for short-term cooking/warming only. Do not leave oven unattended and cups need while cooking.</td>
</tr>
<tr>
<td>Paper towels</td>
<td>Use to cover food for reheating and absorbing fat. Use with supervision for short-term cooking only.</td>
</tr>
<tr>
<td>Parchment paper</td>
<td>Use as a cover to prevent splattering or a wrap for steaming.</td>
</tr>
<tr>
<td>Plastic</td>
<td>Microwave-safe only. Follow the manufacturer’s instructions. Should be labelled “Microwave Safe”. Some plastic containers soften as the food inside gets hot. “Boiling bags” and tightly closed plastic bags should be slit, pierced or vented as directed by package.</td>
</tr>
<tr>
<td>Plastic wrap</td>
<td>Microwave-safe only. Use to cover food during cooking to retain moisture. Do not allow plastic wrap to touch food.</td>
</tr>
<tr>
<td>Thermometers</td>
<td>Microwave-safe only (meat and candy thermometers).</td>
</tr>
<tr>
<td>Wax paper</td>
<td>Use as a cover to prevent splattering and retain moisture.</td>
</tr>
</tbody>
</table>

Materials to be avoided in microwave oven

<table>
<thead>
<tr>
<th>Utensils</th>

Setting up your oven

Names of Oven Parts and Accessories
Remove the oven and all materials from the carton.
Your oven comes with the following accessories:

- Glass tray 1
- Turntable ring assembly 1
- Instruction Manual 1

Shuts off oven power if door is opened during operation.

**Caution:** The grill grate may only be in the microwave oven during grilling operation, but not during microwave operation!

**Turntable installation**

- a. Never place the glass tray upside down. The glass tray should never be restricted.
- b. Both glass tray and turntable ring assembly must always be used during cooking.
- c. All food and containers of food should be always placed on the glass tray for cooking.
- d. The glass tray rotates clockwise; this is normal.
- e. If glass tray or turntable ring assembly cracks or breaks, contact your nearest authorised service centre.
Installation

Remove all packing material and accessories. Examine the oven for any damage such as dents or broken door. Do not install if oven is damaged.

Countertop

Cabinet: Remove any protective film found on the cabinet surface.

WARNING: Do not remove the light brown Mica cover that is screwed to the oven cavity to protect the magnetron.

Installation

1. Select a level surface that provide enough open space for the intake and/or outlet vents.

A minimum clearance of 3.0 inch (7.5 cm) is required between the oven and any adjacent wall. One side must be open.

(1) Leave a minimum clearance of 12 inch (30 cm) above the oven.
(2) Do not remove the legs from the bottom of the oven.
(3) Blocking the intake and/or outlet openings can damage the oven.
(4) Place the oven as far away from radios and TV as possible.

Operation of microwave oven may cause interference to your radio or TV reception.

2. Plug your oven into a standard household outlet. Be sure the voltage and the frequency is the same as the voltage and the frequency on the rating label.

WARNING: Do not install oven over a range cooktop or other heat-producing appliance. If installed could be damaged and the warranty would be void.
Operation and Function

1. Clock Setting:
   Plug in the oven, "0:00" will be shown and a "beep" will be heard.
   (1) Press "Clock/Pre-Set", "0"s in the hour position will flash;
   (2) Turn the digital knob to set the hour within the range from 0 to 23;
   (3) Press "Clock/Pre-Set" and the "0"s in the minute position will flash;
   (4) Turn the digital knob to set the minutes within the range from 0 to 59;
   (5) Press "Clock/Pre-Set" to complete clock setting, " : " will flash denoting that the setting is ok.
   Note: The clock is 24 hours a cycle. The clock will only show 0:00 and will not march forward if no clock setting is made. To cancel the clock setting during the setting process, press "Stop/Cancel".

2. Program Setting in Advance (When clock is well set):
   Input the cooking program. The program can be set as three stages the most.
   (1) Press "Clock/Pre-Set", the numbers in the hour position will flash.
   (2) Turn the digital knob to preset the hour between 0 and 23.
   (3) Press "Clock/Pre-Set", the numbers in the minute position will flash.
   (4) Turn the digital knob to preset the minute between 0 and 59.
   (5) Input the cooking program; the program can be set multiple stages with three stages the most.
      (Defrost can not be set as one of the stages)
   (6) Press "Start/Express/Ok" to stop the program setting in advance. When the preset time reaches, if the door is well closed, there will be one "beep" and the cooking will begin. If the door is not well closed, there will be no cooking even when the time arrives and there will be one "beep" and the preset program will be cancelled.

3. Cooking by Microwave
   (1) Press "Microwave", "P100" will be flashing, and " " will be lighted;
   (2) Turn the digital knob to choose the microwave power level wanted;
   (3) Press "Start/Express/Ok" to confirm;
   (4) Turn the digital knob to choose the cooking time; (maximun time is 95 minutes)
   (5) Press "Start/Express/Ok" to start cooking. (" " for microwave will be flashing)
Operation

Power display (There are 10 levels for microwave power):

</tr>
</tbody>
</table>

Note: During grill cooking without other function combined, only the element and the fan will be working. The "beep" will sound twice when half time is passed to remind of turning over the food. And the cooking will be continued if there is no such operation after 1 minute.

5. Conv.&Mic.+Conv. combination

(1) Press "Conv.&Mic.+Conv." or "140" will be flashing; "" " " " " " will be lighted;
(2) Turn the digital knob to choose the temperature for convection and power for combination wanted;
(3) Press "Start/Express/Ok" to confirm;
(4) Turn the digital knob to choose the cooking time needed; (95 minutes the most)
(5) Press "Start/Express/Ok" to start cooking; "" " " " " " will be flashing;
("" will also be flashing in combined cooking)

Note: There is no need to set time for pre-heating, just directly press "Start/Express/Ok";
If the set temperature cannot be reached within 30 minutes, the element will stop working and "E-3" will be displayed reminding the error.
There are ten temperature grades for conventional; 140° C * 150° C * 160° C * 170° C * 180° C * 190° C * 200° C * 210° C * 220° C * 230° C.

Note: Controlling system for cooking with convection only:

When the temperature is between 140° C - 190° C: The motor for convection is working during the whole process. At the early stage, the convection element will be working in a cycle of being on for 15 seconds, then being off for 15 seconds; the element for grill will be on all the time. When the temperature inside the cavity at the center point is -20° C, the element for grill will stop working (and no working since then); the element for convection will be working all the time. When the temperature inside the cavity at the center point reaches the set temperature, the element for convection will be off and be on again until the temperature inside the cavity reaches -1° C.

When the temperature is between 200° C - 230° C: The motor for convection is working during the whole process. At the early stage, the element for convection will be working in a cycle of being on for 22 seconds, then being off for 8 seconds; the element for grill will be on all the time. When the temperature inside the cavity at the center point is -50° C, the element for grill will stop working (and no working since then); the element for convection will be working all the time. When the temperature inside the cavity at the center point reaches the set temperature, the element for convection will be off and be on again until the temperature inside the cavity reaches -1° C.

The combined cooking of convection and microwave:
There are four levels for combined cooking: C-1 (170° C), C-2 (180° C), C-3 (190° C), C-4 (200° C), a cycle is 33 seconds.

<table>
<thead>
<tr>

6. Auto Defrost
(1) Press "Defrost" then "100" will be displayed," " " AUTO " " will be lighted.
(2) Turn the digital knob to choose the weight to be defrosted.
(3) Press "Start/Express/Ok" to start defrosting, " " AUTO " " will be flashing; and the defrosting will the started.
Operation

7. Multi-Stage Cooking
Two stage cooking can be set at most. Defrost should always be set as the first stage if it is included in a multi-stage cooking. "Auto Menu" cannot be set as a stage in a multi-stage cooking.

8. Speedy Cooking
When the oven is standing by, press "Start/Express/Ok" to start cooking for one minute at the 100% power, "rimon" will be flashing. During the cooking, each press on "Start/Express/Ok" will increase the cooking time by one minute.

9. Auto Menu
(1) Press "Auto Menu", "Auto" "rimon" will be lighted and "A-1" will be flashing.
(2) Turn the digital knob to choose the menu. The menu will come out at the following sequence:
   Potato --> Rice cook --> Vegetables --> Chicken --> Meat --> Reheat Bread --> Instant Noodles --> Congee Porridge and the corresponding code from "A-1" to "A-8" will be displayed.
(3) Press "Start/Express/Ok" to confirm the menu selected; ("A-1" to "A-8" will be lighted)
(4) Turn the digital knob to choose the weight.
(5) Press "Start/Express/Ok" to start cooking. "rimon" will be flashing.

10. Children Lock-out Function
(1) Lock: In the standing by status, press "Stop/Cancel" for 3 seconds, a long "beep" will be heard denoting entering into the children lock-out status. "rimon" will be lighted.
(2) Unlock: In the children lock-out status, press "Stop/Cancel" for 3 seconds, there will be a long "beep" denoting that the lock is released, "rimon" will disappear.

11. Inquiring Function
(1) Check the microwave power level: When during the microwave cooking process, press "Microwave" to see the power level which will be displayed for 3 seconds.
(2) Check the convection temperature and the way of combination: When during the convection or the combined cooking between convection and microwave, press "Conv/Mic.+Conv" to see the convection temperature or the way for combination which will be displayed for 3 seconds.
(3) Check the way of combination between grill and microwave: When during the process of the combined cooking, press "Grill/Mic.+Grill" to see the way of combination between grill and microwave which will be displayed for 3 seconds.
(4) Check the Auto-menu: When during the cooking of the program from Auto Menu, press "AUTO MENU" to see the current menu which will be displayed for 3 seconds.
12. Special Notes:
(1). When cooking under “microwave”,”grill”,”convection” “microwave and grill combination”, “microwave and convection combination”, the longest cooking time can be 95 minutes.
(2). When cooking under “grill”, there will be two beeper when the cooking time is half passed to remind of turning over the food. And the cooking will be continued if there is no such action within 1 minute.

13. Protecting Function:
(1). Protection when the thermo sensor is open circuit or short circuit: When the thermo sensor is of open circuit, the appliance will stop working and “E-1” will be displayed while all indicators for temperature will be flashing. When the thermo sensor is of short circuit, “E-2” will be displayed and all indicators for temperature will be flashing.
(2). Protection when the temperature inside the cavity is too high: During the cooking process, when the temperature at the center point of the cavity is over 250° C, the cooking will be stopped and the fan will be started working; when the temperature at the center point is lower than 220° C, the cooking will be continued until the cooking time set is completed.

During the convection process, when the preheating time has been over 30 minutes, but the temperature still has not reached the temperature set, the appliance will stop working and “E-3” will be displayed.

14. Extended Fan Function for Protection
When the microwave cooking time is equal to or over 5 minutes, at the last 15 seconds, microwave will be stopped and only fan will be working.

SPECIAL NOTE:
1. The power will be switched to mid-low if a cooking with high power level has been continued for over 30 minutes to protect the magnetron.
2. There will be one “beep” when the digital knob is turned.
3. There will be 4 “beep” when a cooking program ends;
4. If the door is opened during a cooking, “Start/Ok” should be pressed to continue the paused cooking.
5. An effective operation will be confirmed by a "beep". There will be no "beep" if the order is invalid.

This appliance conforms with CE directives for radio interference suppression and low-voltage safety and has been built to meet current safety requirements. Subject to technical changes without prior notice.
Notes

1. Before commissioning this oven please read this instruction manual and keep it carefully.
2. There must be more than 30 cm high space necessary above the top surface of oven.
3. Do not repair the oven yourself, please consult an authorized expert.
4. The contents of feeding bottles and baby food jars are to be stirred or shaken and the temperature is to be checked before consumption, in order to avoid burns.
5. Check the oven and the cable regularly for damage. If there is any kind of damage, the oven should not be used.

WARNING:

1. It is hazardous for anyone other than a trained person to carry out any service or repair operation, which involves the removal of any cover which gives protection against exposure to microwave energy.
2. Only allow children to use the oven without supervision when adequate instructions have been given so that the children is able to use the oven in a safe way and understands the hazards of improper use.
3. If the suply cord is damaged, it must be replaced by the manufacture or its service agent or a similarly qualified person in order to avoid a hazard.

- Do not attempt to operate this oven with the door open since open-door operation can result in harmful exposure to microwave energy. It is important not to defeat or tamper with the safety interlocks.
- Carefully clean door seals and sealing surfaces
- Do not operate the oven if it is damaged. It is particularly important that the oven door is closed properly and that there is no damage at the:
  1) door(bent),
  2) hinges and latches (broken or loosened),
  3) door seals and sealing surfaces.
- Utensils should be checked to ensure that they are suitable for use in microwave ovens.
- When heating food in plastic or paper containers, check the oven frequently due to the possibility of ignition.
- Microwave heating of beverages can result in delayed eruptive boiling, therefore care has to be taken when handling the container.
- If smoke is observed, switch off or unplug the appliance and deep the door closed in order to stifle any flames.
- Eggs in their shell and whole hard-boiled eggs shall not be heated in microwave ovens since they may explode.
- If the door or door seals are damaged, the oven must not be operated until it has been repaired by a trained person.
- Liquids or other foods must not be heated in sealed containers since they are liable to explode.
