DEAR USER

This is an excellent selection. Your new LCD TV will provide happiness to your home. But before using, or even setting it, please read this guide carefully and keep for future reference.

Functions of your TV set
* Their equipment is an LCD TV with inserted DVD Player.
* You can adjust all commands related to video and audio, by means of the on screen menus (On Screen Display)
* You can save up to 100 channels in the VHF, UHF and S bands
* Thanks to the automatic channel search, you can find the required channel easily, save and name it (ATS)
* The falling asleep mechanism makes the automatic switching of the equipment off for you possible after a preselectable time interval.
* Access safety device/safety device for children
SAFETY INFORMATION (continued)

POWER SOURCE
You should only plug this TV into a 230-V AC 50Hz mains supply.

MAINS AND OTHER LEADS
Position the mains supply lead and other leads so that they are not likely to be walked on, pinched by things or placed on or against them. Pay particular attention to leads where they enter a power socket and at the point where they come out of the TV.

MOISTURE AND WATER
Do not use the TV in a humid or damp area. The equipment must not be exposed to dripping or splashing, as this may be extremely dangerous. Objects filled with liquids, such as vases, must not be placed on this equipment.

NO NAKED FLAMES
Naked flame sources, such as lighted candles, must not be placed near this equipment, or on top of it.

CLEANING
Always unplug the TV before cleaning it. Do not use liquid or aerosol cleaners. Clean your TV with a soft damp cloth.

BATTERY DISPOSAL
Your attention is drawn to the environmental aspects of infrared remote control battery disposal. Please dispose of depleted batteries responsibly and ensure you follow the battery manufacturers disposal instructions.

VENTILATION
The slots and openings on the TV are for ventilation. Please ensure that there is enough space to allow for adequate ventilation around the TV (at least 10cm). Do not block or cover these holes as overheating could occur.

REPLACEMENT PARTS
The person carrying out the job must use parts that are specified by the manufacturer or have the same specifications as the original parts. The use of other parts may cause fire, electric shock or other hazards.

SERVICING
Ensure the person carrying out repairs to your TV is qualified to do so. Please refer to separate service information supplied with this product. Never remove the cover yourself, there are dangerous voltages inside and you could receive an electric shock.

LIGHTNING
In the event of a lightning storm, unplug your TV from the wall socket. Always unplug the TV if going away on holiday.
WHICH PART OF YOUR TV PERFORMS WHAT FUNCTION

FRONT:

16 DC 12V in
REMOTE CONTROL

1. Switching off (stand-by button)
2. Direct program selection buttons
3. Swap button
4. Mute button
5. Main Menu Button
6. TV button (to shift to TV from AV)
7. Program ± in TV setting, Teletext page ± in teletext setting, menu ± in menu setting
8. Volume ± and menu setting button
9. Menu leave button (EXIT or TV button leaves from the menu)
10. User normalization button
11. Status button (i)
12. Volume setting button DUAL I, DUAL II, Stereo, Mono (DUAL I, II, ST/MONO) (Memory Button in Mono Models)
13. To reach Setup Menu
14. AV Button
15. (Blue button) incred.stereo/mono-normal Audio select
16. (Yellow button)
17. (Green button) Picture preliminary values
18. (Red button) Volume preliminary values
19. Picture format selection (in some models)
20. DVD/TV Button. Switches between TV and DVD pictures.

**Note:** Please refer to separate remote control descriptions in the DVD and TELETEXT sections.
REMOTE CONTROL

Note: Your Remote Control controls your TV at 7 meters far and 30 degrees of an angle.

Never drop your Remote Control.

Do not attempt to open your Remote Control.

Do not press any 2 buttons on Remote Control simultaneously.

If you do not use your Remote Control for a long time, remove the batteries.

BATTERY INSERTION (1.5V AAA x 2 pieces)

• Remove battery cover

• Place the batteries properly.

• Close the cover.
OUTDOOR AERIAL CONNECTION

Optimum good picture and colour reception requires a good outdoor aerial.

Using a coaxial cable (75 ohm Fig A-2) for an aerial, connect the plug (refer to Fig. A-1) into the aerial input of the set.

Alternatively you may connect the aerial via a video recorder by using the video recorder RF Input and RF Output connections as shown.
VCR, DVD, SATELLITE DECODER AND COMPUTER CONNECTIONS

EURO-SCART SOCKET
A Video Cassette Recorder, DVD Player, Games Console or Satellite Decoder may be connected to the scart socket with an appropriate connecting cable. Select programme mode AV to access the signal being received through the SCART Socket.

VCR OPERATION BY USING THE RF OUT
- Alternatively to connect a VCR to your LCD TV using the RF sockets, connect a coaxial cable from the RF Out socket of the VCR to the aerial input socket of your TV. Then connect the coaxial cable from your TV aerial to the RF In socket of the VCR.
- Select programme no. 0 on your LCD TV.
- Insert a video tape into the VCR and press the “play” key.
- Use the instructions under “Program Settings” (See pages 23/24) to search and store the VCR’s RF Output channel in Channel 0 on your LCD TV.

Note: Not all VCRs necessarily have this facility.

VCR AND DVD PLAYER OPERATION BY USING THE EURO-SCART SOCKET
- Connect the SCART socket on your VCR or DVD Player to the SCART Socket on your LCD TV
- Select AV Channel on your LCD TV by pressing the AV selection key on your remote control handset.
- Press the PLAY key on your VCR or DVD Player
- The advantage of this connection is a superior quality of picture and sound during play back.

PC CONNECTION
You may use your LCD TV as a PC monitor by connecting the VGA cable of your PC into the LCD TV’s PC socket.
Supported PC resolutions:
VGA 640 x 480
**AUDIO/VIDEO CONNECTIONS**

**a) With SCART Connector**

- Connect the SCART socket on the receiver to the SCART socket on your LCD TV using the appropriate SCART connecting cable.
- Select AV Channel on your LCD TV by pressing the AV selection key on your remote control handset. Your LCD TV will now display the signal from your Satellite or Cable Receiver.

**b) Component YPbPr input:**

- If your Video Source has a YPbPr component video output, you can connect this to your LCD TV's YPbPr input using 3-Way chinch cable by referring connector colours. This method will carry the image to your LCD TV.
- For audio connection use a 2-Way AV connecting lead to connect left and right audio outputs to your LCD TV's left and right audio inputs.
- Select YPbPr Channel on your LCD TV by pressing AV selection key on your Remote Control handset.
TV FUNCTIONS

1. OPERATION
   a. Switching on the TV
      Plug the power cable of the TV set into the wall outlet.
      * Your set works on 12V DC power. For this purpose, use the adapter provided within your TV set.

   b. Stand-By Mode
      While your TV is at stand-by mode, you can operate your TV using one of the program selection buttons on the RC (0 to 9) or the P± on the TV set.

2. SWITCHING OFF
   a. Switching OFF the TV
      When you want to switch off the TV completely, remove the power cable from the wall outlet.

   b. Standby Mode
      To close your TV, for a start time, use stand by button which is on the remote control or on TV.
      Note: RC means Remote Controller

1. PROGRAM NUMBER SELECTION
   * You can select the program you want by increasing the program number pressing the P± button.

   * Select the program no. 0 – 9 with the single number keys (0-9) on the Remote control.

   * To select a “double digit” number, simply press the two required digits consecutively, within a short time.

   Example: To shift to the program No. 14, first press 1 button. In this case, the "1-" message appears on the left corner of the screen. If you keep the button pressed, you shift to the program No.1. As long as this message appears on the screen (3 seconds) without pressing 4, the TV shifts to the program No. 1.
TV FUNCTIONS

2. MUTE
In order to mute the sound immediately, press the Mute button on the RC. Pressing this button again will allow you to hear the sound before pressing Mute.

3. STATUS Button: (i) Shows the program number, volume level and audio system info for 3 seconds on the screen
4. PP Button: With this button you can see which preset picture value has been adjusted to your TV.
5. SWAP Button: Provides swapping to the previously watched channel
6. SMD Button:
Mono: This button is not operative on TVs or mono broadcasting
Stereo: This button is used to select mono or DUAL volume outputs in TV sets
7. AV Button: In order to select the AV Mode, press the AV button on the RC. To come back to the TV mode again, enter the program number or press TV button. As long as there is a menu on the screen, you cannot take your TV set to AV mode. While on AV Mode, you cannot enter into the Program Table menu. In the AV mode, you can watch the external devices connected through the scart (Video, DVD, VCD etc.). Each time you press the AV button, the modes that you can connect to your device are displayed.
8. AUTOMATIC SHUT OFF.
If the TV receives no signal for 5 minutes it will automatically switch to Stand - By. This feature is not enabled in AV mode.
9. Menu Button: When you press this button you can reach the main menu. Pressing menu while navigating the sub-menus will return you to the main / preceding menu.
10. TV (EXIT) Button: Provides exit from the menus
11. 16:9 Button: This is used to change the screen format from Normal, Auto, Compress, Expand.
12. AUTO ZAP: Pressing P± button for 3 to 4 seconds and releasing will cause automatic channel search. On the upper right corner "Auto Zap" appears.
13. Red Button: You can select the equalizer values by using the red button. The "Personal" value stores the adjustments which you can make on your apparatus.
14. Green Button: You can select the preset "Picture" values by using the green button. The "Personal" value stores the adjustments which you can make on your apparatus.
SETUP

If you assemble your apparatus according to the explanations from the preview pages “Automatic Search” (Welcome) will appear on the screen. At this menu:

1. Use "P+/P-" button for "Country" option and choose the country’s abbreviation with "V+/V-" button.
2. Use "P+/P-" button for "Language" option and adjust the menu language with "V+/V-" button.
3. Use "P+/P-" button for "Auto store" and initiate the automatic search with the "V+" button. Please do not press any button during automatic search. Your apparatus will find the channels and record the memory automatically.

If "Welcome" menu does not appear you can search the channels as below:
1. Press "Menu" button
2. Use "P+/P-" to highlight setting icon and enter the menu with "V+" button.
3. Choose "Language" option with "P+/P-" button and adjust your desired menu language with "V+/V-" button.
4. Use "P+/P-" button for "Country" option and choose the country’s abbreviation with "V+/V-" button.
5. Press "MENU" button to return to the main menu.
6. Use "P+/P-" button to highlight "Program Settings" and enter the menu with "V+" button.
7. Use "P+/P-" button to highlight "Auto store" and start the search with the "V+" button. Do not press any button during the automatic search. Your apparatus will find the channels and record the memory automatically.
SETUP

**Note:** It is unlikely, the channels will be stored in the correct order. When changing the channels, the program being received will be displayed below the channel number in the top left hand corner.
Use P+,P-,V+,V- for changing the menu language and the manual adjustments processes at Program adjustments Menu.
Use P+,P-,V+,V- for changing the order of the program, naming the program, deleting the program and skipping process at Program table Menu. These processes had been mentioned at further pages.

Leave this menu pressing “TV” button.
**TV FUNCTIONS (MENUS)**

**Main Menu:** To access this menu, press menu button. You can choose an option in the main menu using P± buttons and activate the options pressing V± buttons.

1. **VOLUME ADJUSTMENT MENU**
   Highlight volume icon and press V+/- to access volume adjustment menu. In this menu, volume settings are selected using P± buttons and can be changed using V± buttons.

**Volume:** The TV set’s volume can be adjusted
**Balance:** The balance between left and right channel outputs is shown
**Bass:** The user can adjust the bass level at this option
**Treble:** The user can adjust the treble at this option

Stereo models have AVL property. This is not shown on the menus. This is for automatic volume limitation, i.e. it keeps the volume level at the optimum level when shifting from one channel to another. Because of this, the volume comes after the display in case a channel is shifted.

**Equalizer:**
You can enter the Equalizer menu with the "V+" button while you are in the Equalizer line. When you are in this menu you can select (personal, voice, Music, theatre) one of the equalizer adjustments with the "P+, P-" buttons. For the personal equalizer settings P±, V± buttons.

**Headphone:**
When a headphone is inserted, no volume comes from the speakers. The volume is only through the headphones. Using the volume menu, headphone can be set. You can change the volume as Mono/Stereo/Dual using the S/M/D button.
2. PICTURE SETTINGS MENU
Using the MENU button, you can access to picture settings menu. In the picture settings menu, you can alter many parameters related to display. Brightness, Contrast, Colour, Sharpness, Dyn. Skin tone and White tone settings can be made according to your requirements. Using the P± buttons on the RC, highlight the option you want to set and change the setting value or the option pressing the V± buttons.

The changes are automatically memorized.

If you press MENU button, you can access to former menu, while you can leave all menus if you press TV button.

3. PROGRAM TABLE
Using menu buttons, you can access to program table.

The channel number and name in the program table appear in different colors. You can access to other channels using P± and V± buttons in the program table.

3.1. Blue button is for naming. When pressing the blue button in the current channel, a small box appears. The character can be changed pressing P± buttons. You can access to the following or previous characters using V± buttons. When the naming is over, press the blue button again to memorize.

3.2. You can move by pressing the green button. Access the channel you want to move pressing P± and V±. Press green button to access move option. Use P+/− and V+/− buttons to select channel to move to and press the green button. (The moved program is inserted between the others, increasing the number of the following programs by one)
TV FUNCTIONS (MENUS)

3.3. Red button is for deletion. Access the channel you want to delete pressing P± and V+ buttons and press the red button. On the right side of the menu, the channel number appears with a red button. Pressing the red button once more will delete the channel. The following channel will replace the deleted one.

3.4. You can skip a channel when using P+/-. to change channels during regular use. The channel to be skipped must be selected in the program table using P+/. Then press yellow. After you leave the program table; if you use the buttons "P+, P-" for passing the channels, the channels which you skip with these buttons cannot be seen. You can access to that channel using numbers, the number of the channel appears in a different colour (blue). To cancel the skip function, you can press yellow button on the channel, again in the prog. table.

4. SETTINGS MENU: In this menu;

4.1. Source OSD: The source OSD option can be adjusted as Open / Closed. It provides continuous display of the current channel.

4.2. Language: Using this option, you can change the language in the menus.

4.3. Country: Your apparatus finds the channel and choose the system according to the determined country during the automatic search. For this reason it is essential to enter the right code of the country.

Please do not forget to choose the country's abbreviation with "V+/V-" button. (if you do not have a country name choose another country which has the same system).

4.4. Child Lock: In this menu "Lock and lock code" appears. When the Lock function is on with by using the V+ button, a password will be asked when the TV
set is switched on from the standby position and will operate if the password is correctly entered. To change the password, you can enter a 4 digit number in the password line, between "0000" and "9999". Press menu to exit. New code is automatically memorised.

Note: If you forget the password, type 4711
This is the default password.

4.5. Timers: In this menu, Sleep timer, Reminder timer, OFF timer, Switch timer and the Switch program are shown.

4.5.1. Sleep Timer: You can adjust the Sleep timer functions between 5 to 120 minutes with the V+/− buttons.
Note: User may lock individual channels. Refer to lock on Page 24.

When the time is over, Your TV will close automatically.
The closing time can be increased or reduced with 5 minutes intervals. At the end of the adjusted period, you will see the last 60 seconds count down on the screen.
You can leave this menu pressing TV button.

4.5.2. Reminder Timer: You can adjust the recall period between 5 to 120 minutes with the V+ button. At the end of the set period, a warning message appears on the screen. Pressing any button, this message will disappear. Reminder time may be increased or decreased by 5 minutes steps.

4.5.3. OFF Timer: You can set the switching off time.
Note: Check from the RT clock menu, if the time is correct. Refer to 4.8 RT clock.

4.5.4. Switch program: After setting the switch time in the switch option. Use P+ to highlight switch timer. Use keypad to set switch time. The TV set switches to the set program when the time comes. When your TV set is in Stand by position, it is switched on at the adjusted time to the selected program. When the switch is to be set to AV mode, press the AV button in the switch Program option. The other modes are displayed in order.
4.6. **Teletext Language:** You can set the teletext language depending on the teletext received by your TV set.

**Note:** For U.K. the setting is Pan European. This is the default.

4.7. **Teletext E/W:** This selects the characters peculiar to Eastern Europe and Western Europe countries for teletext.

4.8. **RT Clock:** The clock is adjusted as "24 hours, 12 hours or closed". In the lower line, the current time is adjusted.

**Note:** RT clock menu may not appear in the initial. Main menu list when menu is first pressed. P must be pressed to navigate down the menu and make RT clock menu appear.

5. **PROGRAM SETTINGS**

In the program settings menu are the options "Prog. No., Channel Name, System, Sound System, Auto Prog., Frequency, Fine Tuning, AFC, Skip and Lock".

**Program nr.:** Shows the number of the current channel. The Prog. No. can be changed using V± and numbers.

**Program name:** The name of the current channel appears. Press V± to enter the channel name. You can change the character using P± buttons. You can access the following and previous characters using V±. When the naming is over, you can leave from there using V±.

**System Standard:** You can choose the country's system standard with the "V+/V-". (The European countries except France; can choose the "Europe" option)

**Auto Store:** This provides automatic finding of the programs. When the search begins, the message "Busy" is displayed. When the transaction is over, the "Busy"
message disappears. After the Auto store is over, it displays until the found program numbers.

For example: If there are 50 programs in the Auto Store, it hides after 50. When P+ is pressed in the 50th program, it proceeds to PC instead of 51.

Frequency: In the frequency option, the frequency of the current channel is displayed. You can change the frequency using V± or numerical buttons.

Fine Tune: You can fine tune the channels pressing V±

AFC: This operates ON/OFF. When ON, Its follows or corrects the possible small frequency distortions in the channels.

Lock: This provides locking of the current channel. When the locked channel is accessed, a password is asked. If the password is entered correctly (the password which is entered at the option of child lock), the channel appears. After entering the password, the channel appears.

To remove child lock enter the locked channel and access program settings (last icon in main menu). Use P+/- to highlight lock and V+ to switch lock off.

Store: You can save the adjustments.

Note: The Child Lock should be On in order for this lock to be functional.
EXTERNAL DEVICE MODES

Not all menus appear in the external device modes, these can be different from TV menus.

For example:

**YPbPr mode**

In this mode, some of the menus are closed. Volume, Picture and Settings menus are operative.

There is no change in the **Volume Menu**

In the **Picture menu**, the "dyn.skin tone" has been removed.

**Info options** have been added.

**Info**: The information on the display resolution appears.

The options related to text have been removed in the settings menu.

**PC mode**

Some of the menus have been closed in this menu. Sound, Picture and Settings menus are preserved.

**To the Sound Menu**, the Audio option is added. When the Audio is On, you can hear the sound of your computer from the TV speakers. When it is off, you cannot hear your computer’s voice from your TVs speakers.

**In the Picture Menu**, "dyn.skin tone" option has been removed. Position, Video noise, Auto adjust, Information, Factory and Color temp options have been added.

**Position**: Adjust horizontal and vertical position of the picture.

**Video Noise**: In the video noise, there are "Phase and Clock" options. Using these options, you can make the display more clear.

**Auto Adjust**: Adjusts the picture clearness automatically.

**Info**: The information on the display resolution appears.

**Factory**: Provides restoration of the picture settings to factory settings.

**Colour temp**: Sets the picture heat. When USER is selected, the message "White tone RGB" appears at the lower part. The user can do the adjustments.

The text related options have been removed in the settings menu.
TELETEXT

TELETEXT MODE

If the channel you are watching has a teletext broadcasting, you can perform various transactions by shifting to teletext mode using the below described buttons:

1. **Teletext** : Provides shifting to teletext broadcasting in the current channel
2. **TV** : Used for shifting to TV broadcasting while you are in Teletext mode
3. **Reveal / Conceal (answering)** : Provides displaying or re-saving of some information hidden in the teletext broadcasting while in teletext mode
4. **Teletext Timer (Calling the subpages)** : While in TV mode, this mode displays the timer of your TV set on the upper right corner of the screen. In the Teletext mode, this is used for a direct access to the subpages of the current page.

**For Example:** You are in the teletext page No. 500. If the message 1/9 appears. Pressing teletext timer button in this case, the $----$ marks will replace the teletext page number. Using the number 0 to 9 on the RC, you can access the subpage you would like to view. For instance, if you want to access the second subpage, press the numbers 0, 0, 0, 2.

---

1. Teletext key
2. TV key
3. Reveal/Conceal (answering) key
4. Teletext timer (calling sub pages) key
5. Cancel (updating) key
6. Size (page expanding) key
7. Mix (viewing TV and Teletext information together) key
8. Hold (holding sub page) key
9. Index (main page) key
10. Colour (red, green, yellow, blue) keys
5. **Cancel (Updating)**: While in teletext mode, pressing this button will bring TV broadcasting, but teletext is still active and if a new page number is entered, page search will continue. When the required page comes, a message for page number is displayed. Pressing this button once more, the teletext page will appear.

6. **Size (Page expanding)**: This button is used for displaying the current teletext page in 3 different formats. This converts the display in normal size, upper half doubled or lower half doubled format.

7. **Mix (Simultaneous TV and TELETEXT broadcasting)**: This provides simultaneous broadcasting of the current channel and the related teletext data. Pressing the mix button again will shift the TV to normal teletext mode.

8. **Hold (Holding sub page)**: If a teletext page has subpages, such subpages are displayed from time to time. In such a case, this button is pressed to hold that page continuously on the screen. When the page is held pressing "HOLD", the HOLD script appears on the upper left corner of the screen. Pressing this button again will release the page from the hold position.

9. **Index (Home Page)**: This button provides direct access to the teletext index page.

10. **Colour Keys (RED/GREEN/YELLOW/BLUE)**: You can scan the teletext information more easily using these four colour text buttons.

**EXAMPLE:**

- Press **RED** button to receive TV information
- Press **GREEN** key to receive Sports Information
- Press **YELLOW** key to receive the news
- Press **BLUE** key to receive weather forecast

The above given information are given for instance. The color may change depending on the searched page.
DVD PLAYER

YOUR DVD PLAYER OFFERS EXCELLENT PICTURE AND SOUND QUALITY THANKS TO ITS DIGITAL AUDIO AND DIGITAL VIDEO SYSTEMS.

AMONG ITS FEATURES ARE;
- LANGUAGE SELECTION,
- SUBTITLE SELECTION,
- ABILITY TO PLAY DVD,
- SLOW AND FAST MOTION DISPLAY IN VARIOUS SPEEDS,
- VIEWING FROM DIFFERENT CAMERA ANGLES (IF THIS FEATURE IS INCLUDED ON THE DISC)

Player area code
This equipment only plays the discs bearing area code 2. It will not play discs with different area codes.
1. POWER button
   For putting the unit on stand-by.
2. EJECT button
   To open and close the CD tray.
3. MUTE button
   To turn off the sound completely
4. ZOOM button
   To enlarge the picture.
5. Reverse SLOW buttons
   To slow reverse play the movie
6. CLEAR button
   To clear the entries done in the menus.
7. SEARCH button
   To jump to a desired position on CD.
8. Forward SLOW buttons
   To slow forward play the movie
9. A-B button
   To designate the interval that will be repeated.
10. EXIT button
    To exit the DVD player menu.
11. MENU button
    To display disk menus.
12. SETUP button
    To enter and exit the DVD set-up menus.
13. ARROW buttons
    To navigate up/down, left/right in menu.
14. SUB button
    To change subtitle language.
15. AUDIO button
    To change spoken language.
16. DISPLAY button
    To get information about the playing DVD.
17. No Function
18. Number buttons
    To enter selections in menus.
19. SKIP buttons
    To skip to sections.
20. PAUSE button
    To pause.
21. STOP button
    To stop the disc playing.
22. PLAY button
    To play the disc or re-start from pause.
23. FAST buttons
    To fast forward or fast reverse play the movie.
24. ENTER button
    To confirm choices in the menus.
25. DVD / TV button
    Switches between TV and DVD pictures.
PLAYING DVD’s

1. Press the “DVD/TV” button on the remote handset to switch your TV to DVD mode. The DVD logo should appear.
2. To open the tray, press “EJECT”.
3. Place the Side of DVD which data is processed.
4. Press “PLAY” to close the tray and start the playback of the disc.
5. Depending on the type of DVD entered, a disc menu may be displayed first. You can navigate through this menu by using the “ARROW” and “ENTER” buttons. There is usually a menu item for playing the movie.
6. You can pause the playback of the movie by pressing the “PAUSE” button. To restart playback press the “PLAY” button.
7. You can stop the movie by pressing the “STOP” button. If “PLAY” is then pressed, the movie will start from where it was last stopped. To stop the playback completely so it won’t start again from where it was stopped, the “STOP” button must be pressed twice.

**SKIP:** You can skip chapters either forwards or backwards by using the SKIP buttons.

**FAST:** You can watch the film in five levels of fast motion in either direction by using the “FAST” buttons.

* Place the Side of DVD which data is processed.
DVD SETTINGS

DVD SETUP
You can access to the setup menu pressing the SETUP button. You can surf in the menus pressing DVD OK buttons and confirm the setting by pressing ENTER. Pressing SETUP button again, you will leave the Settings menu.

SYSTEM SETTINGS

TV SYSTEM: The video format can be selected from here. The choices are PAL, NTSC or AUTO.

TV TYPE: "Selecting (4:3 format) 16:9 format in your TV set, the picture entirely covers the screen but you cannot see the entire picture on the screen.

For a film shoot in 16:9 format
* When you choose one of the formats of 4:3 (4:3 format), you can watch the entire picture with a black band on the upper and lower parts.
** Selecting (4:3 format) 16:9 format in your TV set, the picture entirely covers the screen but you cannot see the entire picture on the screen.

PASSWORD: For the DVD contents level (Parental Lock) restriction, you should assign a 4 digit numerical password. Factory default password is "8357". While the lock is off, no change could be made in the "Parental Lock" function.
Playing DVDs can be restricted depending on the age of users. Parental lock functions provide the parents with the opportunity to assign a disc playing limit. The films at or below the selected level can be played. While doing this selection, the "password" should be open. After making the change, re-enter the numerical password in the "password" line again and close the password in order to prevent other users' altering the password.

DIVX [R] Registration: Please use the Registration code to register this player with the DivX (R) Video On Demand format. To learn more go to www.divx.com/vod

RESUME When you close and restart the played film, this function provides beginning from the stopped part.

DEFAULT If you confirm the OK option at this function by pressing ENTER, the set returns to factory set values.
LANGUAGE SETTINGS

**OSD LANGUAGE**: You can change the menu language of your set.

**AUDIO LANGUAGE**: You can select the language of the DVD films played on your set.

**SUBTITLE LANGUAGE**: You can select the subtitle language of the DVD films.

**MENU LANGUAGE**: You can select the menu language of the DVD films played on your set.

(This is available if sound, subtitle and menu language options are available on the disk.)
SOUND SETTINGS

DOWNMIX: At this point there are some settings you should do when you connect the analog DVD audio outlets of your set to an equipment:
BASIC FUNCTIONS

ZOOM MODE:
You can enlarge the display on the screen by pressing the Zoom button on the remote handset. The zoom feature has six levels (2x, 3x, 4x zooming in). Not all zoom modes are possible on all discs. If the zoom mode is not applicable to the disc then the particular zoom option will be skipped and return you to normal viewing. During zoom mode you can pan around the screen using the arrow buttons.

DISPLAY:
By pressing “DISPLAY” you can change what time is displayed. The choices are TITLE, TITLE REMAIN, CHAPTER ELAPSED, CHAPTER REMAIN.

SUBTITLE:
Pressing the “SUBTITLE” button changes the language of the subtitles. Every subsequent press of this subtitle button will change the language until there are no more languages to display. After this point is reached, the subtitles will be turned OFF.

AUDIO:
Pressing the AUDIO button will change the current audio language. This feature is dependant on the audio language tracks that are recorded on the disc.

MUTE:
With this button you can instantly turn off the sound from the TV/DVD. To restore the sound, press the “MUTE” button once again.

DISC MENU:
The “MENU” button on the remote handset will enable you to access the Disc Menu. Usually in this menu you can access information regarding movie sections, directors, production stories etc. Sometimes there is no exit that can be found to leave the menu. If this is the case then you can press the EXIT button.
**SEARCH MENU:**
When the “SEARCH” button is pressed, the playing movie is displayed ‘picture in picture’ style in the top half of the screen while the bottom half displays data from the Disc. Use the UP and DOWN arrow keys to select the criteria you wish to search by and press “ENTER” to be able to change the value (e.g. selecting a different chapter).

**TITLE:** The requested title can be selected directly.
**CHAPTER:** The requested chapter can be selected directly.
**AUDIO:** The audio type can be selected (dependant on disc).
**ANGLE:** Different angles can be selected if recorded on the disc.
**TT Time:** The requested title time can be entered directly.
**CH TIME:** The requested chapter time can be entered directly.
**REPEAT:** Chapter, Title or All Disc repeat can be selected from here.
**TIME DISP:** The time display format can be changed from here.

**FOR YOUR KNOWLEDGE:**
In certain situations, the DVD player is unable to carry out specific instructions. If you issue a command to the DVD player and it is unable to carry out that function, a “Ø” icon will be displayed on the screen.

Play control keys (Play, Stop, Skip, Pause etc) will not function while in the DVD Player Set Menu. This menu must be exited before these buttons will become active again.

Dolby Digital AC-3 is the latest audio compression system that has been developed by Dolby Laboratories. Your DVD player has a special decoder to decode this signal. If you connect an appropriate AC-3 decoding amplifier (as described on page 24) then you will get full 6 channel cinema quality audio.

PCM is an acronym for Pulse Code Modulation. It is one of the audio technologies within this DVD player along with AC-3. This player is a Region “2i” player only. If any DVD’s from any other regions (2) are tried, “INVALID AREA” will be displayed on the screen. Please ensure that you play only region “2” DVD’s.
BASIC FUNCTIONS

Playing an audio CD
With the Disc tray OPEN, place a music CD onto the tray with the label facing uppermost. Press EJECT to close the tray. There will be a short delay while the DVD Player identifies the disc. PLAY will appear briefly on the screen and the CD will automatically begin playing from the first track. The current track number and the number of tracks will be displayed on the screen.

While the DVD Player is playing a music CD there are several functions you can use.

- PLAY Press this button to start play.
- STOP Press this button to stop play. To start the disc play from the beginning, press PLAY.
- PAUSE This function stops play, to start play again press the PAUSE button again or PLAY.
- FAST FORWARD AND BACKWARD
Press these buttons to search forward or backwards. There are four speeds and each press of the button increases the speed as shown by the number next to the icon on the screen. This function is useful when you are searching a small area of play. Press PLAY to resume normal playback.
- SKIP FORWARD AND BACKWARD
Press these buttons to skip to the start of the next track or the start of the previous track.
- MUTE Press the MUTE button to silence the play, press again to restore the sound.
- NUMBER
The number buttons on the remote control panel allow you to select a track directly. Input the track number and press PLAY to start play.

DISPLAY
Press DISPLAY on the Remote Control repeatedly during play to show the remaining and elapsed single and total time information on the current CD.

Playing a MP3 disc
Once the MP3 disc is inserted there will be a short delay while the DVD Player identifies the disc. A disc menu containing all the folders on the disc will be displayed on the screen. Press the PM button to change between play list, folder and file list views. File list displays all the files on the disc without the folder divisions.

Use the DVD arrow keys to navigate between tracks and press the ENTER button to begin playback.

FAST: You can search through an MP3 track with the speed search buttons in either direction. Each subsequent press will change the speed at which the track is searched. The choices are 2x, 4x, 8x, 16x and 32x. To return to normal speed playback, press the “ENTER” button.
**VCD, CD, MP3 CD / PICTURE PLAYBACK**

**DVD USING VCD**
You can apply the DVD operation process to VCD, too. Some of the menus can not be accessed, some buttons of the remote control will be deactivated, because VCD does not contain all the functions that DVD has.

**USING AUDIO CD:** During using audio CD some of the buttons will be inactive. Placing and playing CD is as other CDs'. To take out CD tray press [EJECT], to initiate playing press PLAY [►], to pause press PAUSE [II], to stop press STOP [■], to skip press SKIP [►►]. Usage of menu functions are some as the other CDs.

**USING MP3 CD:** While using MP3 Disc, MP3 file list will be displayed on your TV screen. To take out CD tray press [EJECT], to initiate playing press PLAY [►], to pause press PAUSE [II], to stop press STOP [■], to skip press SKIP [►►]. You can select desired MP3 track directly by using numerical buttons (0-9). Usage of menu functions are some as the other CDs.

**JPEG Files**
The JPEG format (developed by the Joint Photographic Experts Group) is currently the most popular format for compressing and saving image files. It uses high efficiency compression data to compress images up to 15 - 20 times. The JPEG format is supported by most current image processing software and is suitable for photo image storage.

**WARNING:**
For protection, your player could be blocked if you attempt to play a disc which is damaged or scratched. In this case you should switch off the player and switch on it again.

**Note:**
When you don't activate any function for a while when your set is in DVD mode, screen saver activates.
After pressing any button DVD Logo appears on the screen again. This process is also in use for Audio CD and MP3 CD playing.
DIVX PLAYBACK

When your apparatus loads the DIVXCD, folder menu will be on the screen. You can start your desired film by using DVD navigation buttons and later on by pressing the “ENTER” button.

The usage of the buttons which are on the remote control is same as the usage of DVD. Meanwhile the buttons which does not support disk concept will not work on the remote control. Some functions will work as above:

SEARCH: If there is more than one film on the disc, you can make the selection of the film by using the “Search” button. Press “Search” button and enter the number of the film that you prefer to watch on the line which displays on the screen. Afterwards use “Enter” button for confirmation. The chosen film will begin.

Your apparatus supports the formats of DivX, Xvid and subtitle formats which are mentioned below.

Please prefer to buy discs which are compatible with these formats.
# Troubleshooting Guide

If there is a problem with the picture or the sound, you can fix them by first comparing with the "failure symptom" and then executing the "check and adjustment" suggestions. If the problem cannot be fixed, you must contact the **authorized service.**

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Possible Fault</th>
<th>Remedy</th>
</tr>
</thead>
</table>
| No power. Led not lit            | No power to the TV                    | Check all connections ensuring the connector to the mains socket is firmly engaged.  
                                 | Tv not switched On                | Turn TV on with On/Off button                                                    |
| No picture “screen black” led lit.| Set in standby.                        | Press P+ or P- buttons or numeric button on the R/C                      |
                                 | Brightness turned down.               | Adjust brightness                                                        |
                                 | Tv switched to AV                    | Select "TV" or press a numeric button on R/C.                             |
| No picture, screen lit, noisy picture | Set not tuned in Aerial not connected.     | do fine tuning                                                            |
                                 |                                       | Connect aerial and check connections                                      |
| Weak “Ghosting” picture         | Poor signal                            | If using an indoor aerial have an external aerial fitted.                |
                                 |                                       | External aerial damaged.                                                  |
| No picture on AV                 | AV source not connected or turned on. | Check AV leads to Euro socket and ensure AV source is turned on.         |
| No Colour                        | Colour control not set                | Adjust colour control using the RC                                       |
| Poor, noisy colour.              | Set may need fine tuning.             | Do fine tuning for a more clear picture                                  |
| Scrambled Teletext               | Poor Signal.                          | Teletext needs a good signal. Have the aerial checked.                   |
## TROUBLESHOOTING (continued)

<table>
<thead>
<tr>
<th>Issue</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>DVD player does not play disc.</td>
<td>The presence of moisture or condensation can affect the laser focusing of the DVD Player. If there is any possibility of condensation (eg if the set has been moved from a cold to a warm environment) then the TV must be left in Standby mode for 1-2 hours to allow condensation to evaporate.</td>
</tr>
<tr>
<td>Parts of the picture or the whole picture freezes up.</td>
<td>Ensure that there is no damage to the disc you are trying to play.</td>
</tr>
<tr>
<td></td>
<td>The disc may be dirty. Clean the disc. Never clean the disc in a radial motion. This will create thin scratches that run along the data paths greatly increasing the likelihood of damage to the disc. Always clean from the inside out using a soft lint free cloth.</td>
</tr>
<tr>
<td></td>
<td>Ensure that you have inserted the disc with the label side uppermost.</td>
</tr>
<tr>
<td></td>
<td>The optical pick-up assembly may be dirty. Specialist lens cleaners are available for DVD lenses. Manual lens cleaning should only be carried out by qualified personnel, never attempt this yourself. The DVD Player will only play discs with regionality coding &quot;2&quot;. Imported discs with a coding other than &quot;2&quot; will not play in this machine. This is not a fault.</td>
</tr>
<tr>
<td>The remote handset does not operate –</td>
<td>Replace the batteries. Depleted batteries will shorten the range of the remote and are more likely to leak. Ensure there is nothing blocking the path between the remote and the remote sensor (e.g. DVD drawer, coffee table etc.). The remote control sensor may act strangely if placed in strong light. Try to position the TV away from strong sources of light (e.g. a window)</td>
</tr>
<tr>
<td>Erratic Operation –</td>
<td>DVD players are extremely sensitive to electromagnetic radiation (such as that caused by other electronic equipment, ignitions, microwave ovens etc.). If your player locks up, turn off the power at the mains and re-connect after 10 seconds. This should re-boot the DVD player’s software and normal operation should return. If this happens regularly, try and find the source of the electromagnetic radiation and move it away from the TV/DVD player.</td>
</tr>
<tr>
<td>I'm Lost –</td>
<td>The DVD player settings can be returned to their original factory default settings. This should clear any settings that have been made and proper operation should return. See &quot;DVD Settings&quot; - &quot;Defaults&quot;.</td>
</tr>
