1. SAFETY AND PRECAUTIONS

Please read through this section carefully and follow the instructions to maximize the reliable operation and lifetime of your LCD display. Always keep these instructions handy and close by your LCD display. Keep the instructions and the packaging so that if you sell or give away your LCD display you can give them to the new owner.

OPERATING SAFETY

- **Never open the housing** of the LCD display! When the housing is open there is a danger of injury from electric shock!

- Do not insert **any objects** through the slots and openings of the monitor. This may lead to an electrical short-circuit or even fire resulting in damage to your LCD display.

- Slots and openings in the LCD display are for ventilation purpose. **Do not cover these openings**, as this may lead to overheating.

- Do not allow **children** to play **unattended** with electrical equipment. Children may not always correctly recognize danger.

- This LCD display is intended for personal use only. It **not** intended for commercial use in a heavy industry environment.

- An **injury hazard** exists when the display breaks. Wear protective gloves to pack the broken parts and send them into your service center for proper disposal. Then wash your hands with soap, because it is possible for **chemicals** to escape.

- Never exert pressure on the display. This could break the monitor.

- Do not touch the display with your fingers or with sharp objects to avoid damage.
Contact the Call Center immediately in any of the following situations. Do NOT plug in or turn on your display:

♦ if the power cable/power supply overheats or is damaged
♦ if liquid has gotten into the monitor
♦ if the LCD display is dropped or the housing damaged

REPAIR

- Leave all repairs of your LCD display to authorized and qualified personnel only.
- Should a repair be necessary, please contact one of our authorized service partners only.

NOTES FOR SERVICE ENGINEERS

- Before opening the housing, disconnect the product from all power sources and remove any connecting cables. If the display has not been disconnected from the power outlet before being opened, there is a danger to life through electric shock. There is also a risk of damage to the components.
- Internal components of the LCD display may be damaged by electrostatic discharge (ESD). Carry out repairs in an ESD-protected workshop. If no such workshop is available, wear an antistatic wrist strap or touch a highly conductive metal object. We can repair damage sustained by inappropriate handling for a fee.
- Use only original spare parts.
POINT OF USE

- Keep your LCD display and all units connected to it away from moisture and avoid dust, heat and direct sunlight. Failure to observe these instructions can lead to malfunctions or damage to the LCD display.

- Place and operate all units on a stable, level and vibration-free surface in order to avoid the LCD display from falling.

ENVIRONMENTAL CONDITIONS

- The LCD display can be operated most reliably at ambient temperatures between +41°F and +95°F (5°C to 35°C) and at a relative humidity between 20% and 85% (without condensation).

- When switched off, the monitor can be stored most reliably between +14°F and +140°F (-10°C - +60°C), up to the maximum height of 39,000 ft (12,000 m) above sea level at a relative humidity between 10% and 85% (without condensation).

- After transporting your LCD display please wait until it has assumed the ambient temperature before connecting and switching it on. Extremely high variations in the temperature or humidity may result in condensation forming on the inside of the LCD display which could cause an electrical short-circuit.
CONNECTING
Observe the following instructions to connect your LCD display properly:

POWER SUPPLY

- Do not open the power supply housing. An open housing presents a **lethal hazard** from electrical shock. There are no parts inside to be cleaned or serviced.

- Operate your LCD display only with grounded outlets with **AC 100-230V~/ 50 Hz**. If you are not sure about the power supply at your location, check with your power company.

- Use only power connection cable **provided**.

- For additional safety we recommend use of a **surge protector** to protect your LCD display from damage resulting from **voltage surges** or **lightning**.

- To remove the LCD display from the power supply, disconnect the plug from the AC outlet.

- The power outlet must be in the vicinity of your LCD display and within reach of the power cables. **DO NOT stretch the power cables tightly to reach a power outlet**.

- You should arrange the LCD display cables in a manner that no one can trip over or step on them.

- To avoid damage of cable **do not place any objects or furniture on the cable**.
STANDARDS/ELECTRO-MAGNETIC COMPATIBILITY

Your display fulfills the requirements for electro-magnetic compatibility and electrical safety specified in the following standards:

EN 55013, EN 55020, EN 60065
EN 61000-3-2, EN 61000-3-3

- When connecting ensure that Guidelines for Electro-Magnetic Compatibility (EMC) are observed.
- Provide a space of at least three feet from high-frequency and magnetic sources of interference (television sets, loudspeakers, mobile telephones, etc.) in order to avoid malfunctions.

ERGONOMICS

- For ergonomic reasons we suggest not to use dark text with a blue background. This would cause bad readability and would increase eye strain.
- While working with display you should take breaks periodically to avoid tension and fatigue.
- In order to protect your eyes and to create a pleasant working area you should avoid glare, reflections and strong contrasts on the screen.

TRANSPORT AND RECYCLING

- Keep the original packaging and use it to protect the LCD display during transport or storage.
PRECAUTIONS

Caution! There are no parts which can be serviced or cleaned inside of the monitor housing.

You can increase the life of your LCD display by taking the following precautions:

- Before cleaning always disconnect the power line and all connection cables.
- Do not use any solvents, caustic or gaseous cleaning agents.
- Clean the display with a soft, lint-free cloth.
- Ensure that no water droplets remain on the screen. Water can cause permanent discoloration.
- Do not expose the screen to bright sunlight or ultraviolet radiation.

IMPORTANT ADDITIONAL SAFETY INSTRUCTIONS

When using any electronic equipment, basic safety precautions should always be taken. Following the guidelines below can reduce the risk of fire, electric shock and injury to person:

- Do not use this product near water (e.g., near a bathtub, wash bowl, kitchen sink or laundry tub, in a wet basement or near a swimming pool).
- Avoid using a telephone/modem (other than a cordless type) during an electrical storm. There may be a remote risk of electric shock from lightning.
- Do not use the telephone/modem to report a gas leak in the vicinity of the leak.
- Use only the power cord indicated in this manual. Do not dispose of batteries in a fire. They may explode. Check with local codes for possible special disposal instructions.
- Keep batteries away from children at all times.
FCC COMPLIANCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment. Shielded interface cables, if any, must be used in order to comply with the emission limits.
2. INTRODUCTION

Thank you for purchasing our LCD Multi-display. We thank you for your confidence in our products and are pleased to greet you as a new customer. We focused on great features, ease of use and reliability in manufacturing your LCD display.

SERVICE
Service and support will be available every time you use your new monitor. Contact us, we will be glad to help you. This manual contains a separate chapter on the subject of Troubleshooting on page 42.

PERFORMANCE CHARACTERISTICS
Advantages in relation to CRT (cathode ray tube) displays:
- Less space required
- Lower weight
- Power savings

High image quality
- Standard: resolution up to 1280 x 768 @ 60 Hz

Further features
- The LCD display is a plug and play device which is automatically recognized by your operating system.
- The terminals include Tuner receiving terminal, PC Input, VGA, PC Input DVI-D, SCART 1 (Video, S-Video & RGB), SCART 2 (Video, S-Video), and Video/S-Video Input.
- Easy-to-use remote control.
- Easy-to-use on-screen menu system.
- PIP, picture in picture, double screen function
- Screen format setting by pressing ARC button.
- Headphone socket for private listening.
- Built-in, broadband speakers.
- A sleep timer.
- Child Lock function.
- Full function Teletext.
**INCLUDED EQUIPMENT**

Please make sure the following items are included with your LCD Display. Notify us within 14 days after purchase if it is not complete. With you LCD Display you receive:

<table>
<thead>
<tr>
<th>User’s manual</th>
<th>Remote control &amp; batteries (Micro / AAA X 2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Power cord</td>
<td>SCART cable</td>
</tr>
<tr>
<td>Aerial cable</td>
<td></td>
</tr>
</tbody>
</table>
3. CONNECTING EXTERNAL DEVICES

Note:

Audio out L/R: The level of audio output cannot be changed using the volume, treble, and bass controls on your display. This connector should be used with an external audio amplifier that can be used to control the volume.
Both SCART connections support the following functions:

<table>
<thead>
<tr>
<th></th>
<th>Video</th>
<th>S-video</th>
<th>RGB</th>
</tr>
</thead>
<tbody>
<tr>
<td>SCART 1</td>
<td>Input</td>
<td>Input</td>
<td>Input</td>

<tr>
<td>SCART 2</td>
<td>Input/Output</td>
<td>Input/Output</td>
<td>-</td>
</tr>
</tbody>
</table>
4. **CONTROLS AND LOCATION**

These buttons control your display’s basic features, including the on-screen menu. To use the more advanced features, you must use the remote control.

- Turn down the volume. Navigation in OSD.
- Turn up the volume. Navigation in OSD.
- Change channels down. Navigation in OSD.
- Change channels up. Navigation in OSD.
- Display the main menu. One level back in the Menu.
- Select input source (TV, SCART 1, SCART 2, Video, S-Video, VGA and DVI).

Power indicator

A blue indicator lights when the power is on and the indicator will be orange in standby mode. (The indicator will be off when the power is off.)
5. REMOTE CONTROL

6. A.P.S. **FIRST TIME INSTALLATION**

1. After removing the LCD display packaging, ensure the product is installed in a safe and well ventilated position.

2. Insert two AAA type batteries into battery compartment on the rear of the remote control.

3. Please check, that the external 75 Ohm antenna cable, the power adapter and the corresponding power cord are connected correctly.

4. Switch on the LCD-TV by means of the main switch.

5. Press the **POWER** button to switch the set on.

6. The **First Setup** menu will appear when you turn on the multimedia display for the first time. Follow the steps below and use **P+ / P-, VOL+ / VOL-** and **MENU** buttons on your remote controller to configure **First Setup**.

   ![First Setup Menu]

   **LANGUAGE**  **ENGLISH**
   **COUNTRY**  **UNITED KINGDOM**
   **TV SYSTEM**  **PAL B/G**
   **SCAN**  **AUTO**
   **EXIT**

   \[\triangledown \triangledown: \text{SELECT} \quad \leftarrow \rightarrow: \text{ADJUST}\]

7. The preferred method at First Setup is Auto Scan. Please refer to the Manual Scan Programs section for detailed instructions on how to operate Manual Scan.

---

21
7. **General Controls & Adjustment**

**Turning the LCD Display On and Off**

Your LCD-TV offers you different possibilities for switching it on. Make sure that the main switch is switched on. Then proceed as follows.

- Press the **POWER** button on the remote.

  or

- You can also use the **POWER** button at below right on the LCD-TV.

  or

- Press the button of the respective signal source on your remote (**TV**, **AV/SV**, **SCART 1**, **SCART 2** or **PC**). You will switch on the LCD-TV and select the signal source at the same time with this.

Use the **POWER** button to switch off the LCD-TV.

**Switch between TV / PC / AV**

1. Turn on the power of the connected video equipment.
2. Press the applicable button.
3. Press the **TV** button to switch to TV mode.
4. Press the **PC** button to switch to PC mode.
5. Press the **AV.SV** button to switch to video mode.
6. Press the **SCART 1** and **SCART 2** buttons to switch on the automatic recognition of the SCART (Video / S-Video / RGB) mode by the system. You can switch between video, S-video and Auto by pressing it several times. **SCART 1** also supports RGB.

You can also select the signal source with the assistance of the **SOURCE** button on the LCD-TV.
SWITCHING TV CHANNELS

1. Make sure that the LCD-TV is in TV mode.
2. You will switch up and down between the channels in your channel table with the P+/P- buttons. You can select the required channel directly with the assistance of the number block on the remote. Press the RTN button if you want to call up the channel viewed most recently.

VOLUME CONTROL

USING VOLUME CONTROL
Press VOL-/VOL+ button to turn up or turn down the sound volume.

USING MUTE
At any time, you can temporarily turn off the sound by pressing the MUTE button.
1. Press the MUTE button and the sound cuts off.
2. Press the MUTE again or VOL- / VOL+ button to turn the sound back to the previous level.

Note: The mute function is automatically turned off if VOL- / VOL+ is pressed.

SETTING THE SLEEP TIMER
You can set the Sleep Timer to automatically turn off the TV view of LCD display.

1. Press the SLEEP button to display the Sleep Timer screen.
2. Press the SLEEP button repeatedly to change the sleep time (in minutes).
The time can be set to 30-minute increments from 30 minutes to 90 minutes.

Note: The Sleep Timer screen automatically disappears in 3 seconds.
VIEWING THE MENUS AND ON-SCREEN DISPLAYS

1. With the power on, press the MENU button. The main menu appears on the screen.

   PICTURE
   COLOR TEMP
   SOUND
   TV
   MONITOR
   RESET
   MODE
   INPUT

   △▼:SELECT  ◀▶:ADJUST

2. Use the P+ / P- button to select one of the menu options, and then press the MENU button to access to the Sub-menu.

3. Carry the changes out with the VOL+/VOL- buttons.

4. Press the EXIT button to return to the previous screen or select END and confirm with MENU button to leave the Menu.

   Note: The menu varies with which input source is selected.
**CONTRAST AND BRIGHTNESS SETTINGS**

You may need to perform separate adjustments for brightness and contrast for the different video modes.

1. Press the MENU button to display the main menu.
2. Press the P+ / P- button to move cursor to PICTURE.
3. To set the brightness: select the BRIGHTNESS menu point and press the VOL+/VOL- buttons to increase or lower the screen brightness.
   To set the contrast: select the CONTRAST menu point and press the VOL+/VOL- buttons to increase or lower the screen contrast.

**SETTING CHILD LOCK**

This function locks the LCD-TV to prevent unauthorized access.

1. Press the MENU key to open the main menu.
2. Go to the function Child Lock using the P+/P- keys.
3. Press the MENU key again.
4. Enter a four-digit PIN through the remote and confirm it with the MENU button.
5. Confirm your PIN by entering it again and pressing the MENU button again.

Your LCD TV is now locked by the child lock.

Please proceed as follows, if you have forgotten your PIN:

1. Press the Reset button on the remote.
2. Select the GES.RESET menu point with the P+ or P- buttons.
3. Select YES with VOL+/VOL- and confirm with the MENU button.

The device is now reset to factory default settings. The initial setup must be performed again.
**MENU OVERVIEW**

Press the **MENU** key while the device is switched on. The following options appear on your screen.

**PICTURE**

<table>
<thead>
<tr>
<th>BRIGHTNESS</th>
<th>CONTRAST</th>
<th>SATURATION</th>
<th>SHARPNESS</th>
<th>NOISE REDUCT</th>
<th>EXIT</th>
</tr>
</thead>
</table>

△▽:SELECT  ◀▶:ADJUST

You can adjust several screen settings in this menu, including BRIGHTNESS, CONTRAST, SHARPNESS and COLOR SATURATION. You can activate NOISE REDUCTION to suppress picture distortion.

**COLOUR**

<table>
<thead>
<tr>
<th>MODE</th>
<th>NORMAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>R</td>
<td></td>
</tr>
<tr>
<td>G</td>
<td></td>
</tr>
<tr>
<td>B</td>
<td></td>
</tr>
<tr>
<td>EXIT</td>
<td></td>
</tr>
</tbody>
</table>

△▽:SELECT  ◀▶:ADJUST

In the color menu the color temperature can be adjusted to **cold**, **normal**, **warm** or **user settings**.
**SOUND**

You have the possibility of making changes to the EQUALIZER (pop, classical, voice, jazz, flat, user definition, etc.), to the AUDIO BALANCE (left and right) and to the LOUDNESS through the SOUND Menu. Apart from this, you can set the PSEUDO STEREO EFFECT for a full sound in this Menu. You can connect an active subwoofer to the relevant subwoofer output, if the SUBWOOFER function is activated. The volume of the subwoofer can be set to the correct level with the level control. The AUTO GAIN function serves to control the volume automatically.

**TV**

In the TV menu you can start the automatic and the manual channel scan. You can also edit the program list here.
**MONITOR**

You set the LCD-TV levels in the MONITOR Menu, when the device is in PC mode.

**RESET**

You can activate two different types of reset through the Reset Menu. The AUDIO and IMAGE settings will be reset with the PRESET function, while you will recreate the state at delivery with GES.RESET. A new channel search will be necessary then. The screen with the new settings will appear at Restart. All changes made previously will be deleted irrevocably.

**MODE**

You have access to special possible settings such as **OVERVIEW**, **LANGUAGE**, **TRANSPARENCY** and **CHILD PROTECTION** through the Menu Mode. Apart from this, you can carry out the initial setting up again here. The language is selected through the Vol+/Vol- buttons.
**INPUT**

TV  
PC  
SCART1  
SCART2  
VIDEO  
SVVIDEO  
EXIT

△▼:SELECT ◄►:ADJUST

Via the input menu you can select your signal source.
8. TV mode Adjustment

Adjusting TV Settings
1. Select "TV" mode as signal source using the TV key on the remote control.
2. Press the Menu key and select TV on the screen menu.

Adjusting Program Tables
The program table indicates the channel numbers and names. You can change, edit or delete names or add channels in this list.

7. Press the Menu button to call up the Main Menu and select the TV menu point there with the assistance of the P+ / P- buttons. Confirm using the Menu button.
8. Select the menu point PROG.TABELLE using the P+ / P- buttons and then press the Menu button.
**CHANGE OR EDIT NAMES**
1. Move to the program number you want to rename or edit name by pressing P+ / P- button.
2. Press the YELLOW button.
3. Press P+ / P- button repeatedly to select a letter, and then press VOL- / VOL+ button to select the position. (Each program name could be edited with 5 characters)
4. Press YELLOW button again to store.

**INSERT PROGRAM NAMES**
1. Select the program that you want to insert using the buttons P+ / P- / VOL- / VOL+.
2. Press the GREEN button.
3. Select the position, at which the selected program shall be inserted, using the buttons P+ / P- or VOL- / VOL+.
4. Press the RED button once to confirm the moving.
5. Confirm by pressing the Vol- / Vol+ buttons and press the MENU button.

**DELETE A PROGRAM**
1. Move to the program number you want to delete by pressing P+/ P-button.
2. Press the RED button.
3. Confirm by pressing the Vol- / Vol+ buttons and press the MENU button.
**MANUAL SCAN PROGRAMS**

You can limit the search interval for manual scanning. Please proceed as follows:

1. Select the menu item **Manual Scan** in the TV menu.
2. Confirm your selection with **Yes**.
3. Enter the starting point using the key pad.
4. Use the **P** button to go to the **following number**. This is the end point of the search area. This value can also be entered using the number buttons in order to define the end point of the search area.
5. Move to **Scan** using the **P-** key and select **Yes**.
6. Press the menu key to start scanning.

After the scanning process has ended the detected programs will be entered into the program table.

When a program is found you will be prompted to add it. If you select **YES**, then the program will appended at the end of the program table and the search will be continued. If you reject the request, then the program will not be appended, but the search will continue.
NICAM/IGR BROADCAST SELECTION

Depending on the particular program being broadcast, you can press the SOUND button to listen to stereo, bilingual or monaural.

1. Press the SOUND button directly to display the three states on the top right of the screen.

2. Press the SOUND button repeatedly to select the following states.

STEREO BROADCAST
- Each time you press SOUND, the mode changes between “Stereo” and “Mono”.
- When “Mono” is selected, the TV sound is output monaurally.
  - In stereo reception, if the stereo signal is weak, you can switch to “Mono”.

BILINGUAL BROADCAST
- Each time you press SOUND, the mode changes as follows:
  - CH A → CH B
    - CH A sends the primary broadcast language to the loudspeakers.
    - CH B sends the secondary broadcast language to the loudspeakers.

MONOAURAL BROADCAST (FOR NICAM BROADCASTS)
- Each time you press SOUND the mode changes between “Nicam” and “Mono”.
9. **TELETEXT**

Teletext is a free service broadcast by most TV stations which gives up-to-the-minute information news, weather, television program, share prices, subtitles, and many other topics.

**TO OPERATE TELETEXT**

1. Select a TV station on which Teletext is being transmitted.
2. Press the **TELETEXT** button once to appear the Teletext screen.
   Press the **TELETEXT** button again to switch off Teletext.
   The previous program reappears.

**TELETEXT PAGE SELECTION**

1. Enter the required Teletext page as a three digit numbers.
   The selected page number is displayed at the top left corner of the screen. The Teletext page counter searches until the selected page number is located, so that the desired page is displayed on the screen.
2. The **P+ / P-** button can be used to select the preceding or following page.
3. Fastext movement by the 4 colored buttons.
   Four subject-heading pages can be selected quickly by pressing the corresponding colored button **Red**, **Green**, **Yellow**, or **Blue** on the remote control handset.
**Useful features for Teletext**

**INDEX**
* Press this button to select the index page that displays the list of Teletext contents.

**HOLD**
The Teletext page you have selected may contain more information than what is on the screen; the rest of the information will be displayed after a period of time on a sub-page.
* Press **HOLD** button to stop the automatic page change.
  - The **HOLD** symbol will be displayed at the top left-hand corner on the screen and the automatic page change will be stopped.
* Press **HOLD** button again to continue.

**CANCEL**
In the Teletext mode, pressing **CANCEL** button will switch the screen to the TV mode while waiting for the next text page.
* Select required page number in Teletext mode.
* Press **CANCEL** button to switch to TV mode while waiting for the text page. The upper and lower row of the videotext page information is displayed for 6 seconds, before it disappears.
* When the required text page is found, the page number is displayed in a black box in the upper left corner.
* Press **CANCEL** button again to revert to Teletext mode.

**REVEAL**
* Press this button once to display concealed information, such as solutions of riddles, puzzles, or a quiz.
* Press this button again to conceal the revealed answers.

**SIZE**
Select double height text.
* Press this button to enlarge the top half of the page.
* Press this button again to enlarge the bottom half of the page.
* Press this button once more to return to the normal display.
SUB-PAGE / TIME

In Teletext mode, sub pages are subsections of long Teletext pages that can only be displayed on the screen one section at a time.

* Select the required Teletext page. (e.g. 524)
* Press SUB-PAGE button. “S0000” will be displayed.
* Select the required sub page number by pressing four digit buttons (e.g. 0001).
* The Teletext sub page number will be displayed on the lower right corner of the screen when the selected page is found.
* Press SUB-PAGE button again to return to normal page sequence.

In TV mode, press this button to display the time.

* While watching a TV program with Teletext transmission press TIME button. The current time information will be displayed on the upper right corner of the screen.
* When the TIME button is pressed again, the time display disappears.
10. PC MODE ADJUSTMENT

This LCD-TV can double as PC monitor. There are two options for connection: VGA (analog) and DVI-D (digital).
1. Connect a VGA or DVI-D data cable to your LCD-TV and the corresponding port on your PC.
2. You also may connect an audio cable (RCA L/R to 3.5mm plug, available at professional dealers) with the AUDIO 3 port and the audio input of your PC.
3. Please switch on your PC and LCD-TV now.
4. Press the **PC** button on your remote control. Pressing the button again toggles between DVI-D and VGA. Please take care, that the resolution of your PC matches the one of the LCD-TV. Should they be different, please configure your PC first before connecting the LCD-TV.
11. OTHER FUNCTIONS

1. "Aspect" button (Screen Aspect Ratio)

ARC - Aspect Ratio Control

* The Aspect button on top of the TV serves the same purpose as the ARC button on the remote control.
* Normal: This sets the aspect ratio to 4:3 for traditional TV programs. There will be black bars at either side of the screen.
* Periscope: Expands 4:3 video sources to fit the 16:9 screen by magnifying the image at the edges of the screen. This creates less distortion at the centre of the screen.
* Zoom: Some DVD movies may not fill the top and bottom of the screen. The zoom function extends the height to fill the screen.
* FULL: This mode displays the picture 1 to 1 using full screen width and height. A 16:9 signal will be displayed correctly. A 4:3 signal will be stretched horizontally to reach full screen width.
* Cineramic: Allows displays in anamorphic film mode (2.35:1)

2. "APC" control button (Automatic Picture Control)

To view the APC settings one after the other, press the "APC" button on the remote control repeatedly. The background lighting will be set to "Normal", "Dimmed" or "Full". This setting enables you to adjust the screen brightness to the ambient lighting. The setting "Full" is preferable in bright environments, while the setting "Dimmed" is more suitable for darker environments. This setting also affects power consumption, which is lowest when set to "Dimmed".

3. Video/Audio output from the Scart 2 connector

If your video input source is TV/Video/S-Video/Scart 1, Scart 2 connector would automatically output the signals. The mute settings would not affect the signals output from Scart 2. When the video input format is Scart 1 RGB, there will be no output from Scart 2. The Scart 2 is capable of outputting CVBS and Y/C video signals. The Scart 2 will not output signal after the power is off.
12. TROUBLESHOOTING

Many times, problems have simple causes. We would like to give you some tips to solve some common problems. Should these tips not help, please call us!

There is no picture or sound.
- Make sure the AC adapter is properly inserted in the power outlet.
- Make sure the input mode is set to correctly.
- Make sure the main power switch of the main unit is on.

There is no picture. There is no picture from AV.
- Make sure the Contrast/Brightness is properly adjusted.
- Make sure all external devices are connected properly.

There is no sound.
- Make sure the volume is not set to minimum.
- Make sure the sound is not set to mute.
- Make sure that headphones are not connected.

There is no picture or sound, just noise.
- The reception may be weak.
- Make sure the aerial is not disconnected.

Picture is not clear.
- The reception may be weak.
- Make sure the aerial is not disconnected.

Picture is too bright.
- Check the APC function setting.
- Check Contrast/Brightness adjustment.

The picture is too dark.
- Check if the APC button is set to "Dark".
- Check Contrast/Brightness adjustment.

Remote control does not work.
- Check the batteries in the remote control are not flat.
- Make sure the remote sensor window is not under strong lighting.

The picture is not sharp.
- The reception may be weak.
- Make sure the aerial is not disconnected.

The picture jitters.
- The reception may be weak.
- Make sure the aerial is not disconnected.
The picture is doubled or tripled.
- Make sure the aerial is facing the right direction.
- There may be reflected electric waves from mountains or buildings.

The picture is spotted.
- There may be interference from automobiles, trains, high voltage lines, neon light, etc.
- There may be interference between the antenna cable and power cable. Try moving them further apart.

There are stripes on the screen or colors fade.
- Is the unit receiving interference from other devices?
  Transmission antennas of radio broadcasting station and transmission antennas of amateur radio and cellular phones may also cause interference.
- Place the unit as far apart as possible from device that may cause possible interference.

The basic settings are not correct anymore (color and tone).
- Press the RESET key on the remote control to return to the basic settings.

You forgot the child lock PIN.
- Follow the instructions on page 25 to perform a reset.
13. DIMENSIONS

![Diagram of television dimensions]

- Front View:
  - Height: 484.5 mm
  - Width: 425.7 mm

- Side View:
  - Height: 912.3 mm
  - Width: 645.2 mm

- Rear View:
  - Width: 554 mm (maximum)
  - Height: 194.8 mm (maximum)
  - Depth: 103 mm (maximum)

WARRANTY

We warrant to our customers that this product is free from defects in materials and workmanship as follows: for a determined period from the date of original purchase, defective parts or a defective product returned to a repair facility or an Authorized Service Facility ("ASF") for such product, as applicable, and proven to be defective upon inspection, will be exchanged for new or comparable rebuilt parts, or a refurbished product, as determined by the repair facility or the ASF. Limited warranty repair or replacement shall not extend the original limited warranty period of the defective product. This limited warranty does not cover any supplies or accessories, including but not limited to: software, blank media, user-installed drives, etc.

EXCLUSIONS: this limited warranty does not apply, and you will have no remedy hereunder with respect to (a) products that have been modified, opened, repaired or otherwise altered, except by an ASF, (b) products that have been damaged or destroyed after delivery to the customer, (c) any third party software, interfaces, parts, supplies, peripherals or other products or any defects resulting from use of the product in connection with such third party products, (d) defects resulting from improper or inadequate maintenance, calibration or site preparation, (e) defects resulting from any misuse, abuse, accident, neglect, negligence or any use other than in accordance with the handling or operating instructions provided, (f) defects resulting from exposure to unusual physical or electrical stress or from any operation other than in accordance with the published environmental specifications for the product.

TO THE EXTENT ALLOWED UNDER APPLICABLE LAW, THE ABOVE WARRANTIES ARE EXCLUSIVE AND NO OTHER WARRANTY OR CONDITION, WHETHER WRITTEN OR ORAL, IS EXPRESSED OR IMPLIED AND WE SPECIFICALLY DISCLAIM ANY IMPLIED WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE AND NO IMPLIED WARRANTY APPLIES TO THE PRODUCT AFTER THE APPLICABLE PERIOD OF THE EXPRESS LIMITED WARRANTY STATED ABOVE. Some countries, states or provinces do not allow exclusions or limitations on the duration of an implied warranty, so the above limitation or exclusion might not apply to you. This limited warranty gives you specific legal rights and you might also have other rights that vary from country to country, state to state, or province to province.

Our limited warranty is valid in any country or locality where we have a support presence for this product and where we have marketed this product. The level of warranty service you receive may vary according to local standards. We will not alter form, fit or function of the product to make it operate in a country for which it was never intended to function.

TO THE EXTENT ALLOWED UNDER APPLICABLE LAW, THE REMEDIES IN THIS LIMITED WARRANTY STATEMENT ARE YOUR SOLE AND EXCLUSIVE REMEDIES. EXCEPT AS INDICATED ABOVE, IN NO EVENT WILL OUR COMPANY OR ITS SUPPLIERS BE LIABLE FOR LOSS OF DATA OR FOR INDIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL (INCLUDING LOST PROFIT OR DATA), OR OTHER DAMAGE, WHETHER BASED IN CONTRACT, TORT, OR OTHERWISE. IN NO EVENT SHALL RECOVERY OF ANY KIND AGAINST OUR COMPANY BE GREATER IN AMOUNT THAN THE PURCHASE PRICE OF THE PRODUCT SOLD BY US WHICH CAUSED THE ALLEGED DAMAGE. WITHOUT LIMITING THE FOREGOING, YOU ASSUME ALL RISK AND LIABILITY FOR LOSS, DAMAGE OR INJURY TO YOU AND YOUR PROPERTY AND TO OTHERS AND THEIR PROPERTY ARISING OUT OF USE OR MISUSE OF, OR
INABILITY TO USE THE PRODUCT NOT CAUSED DIRECTLY BY THE NEGLIGENCE OF OUR COMPANY. Some countries, states or provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

THE WARRANTY TERMS CONTAINED IN THIS STATEMENT, EXCEPT AS LAWFULLY PERMITTED, DO NOT EXCLUDE, RESTRICT OR MODIFY AND ARE IN ADDITION TO THE MANDATORY STATUTORY RIGHTS APPLICABLE TO THE SALE OF THIS PRODUCT TO YOU.

Please note the following:

Be sure to keep your purchase receipt in a safe place. Our company, at its option, may require a copy of the receipt to validate the warranty period effective date (i.e. date of purchase). Warranty liability only applies to material or factory faults. It does not apply to damage due to breakage, for example, a crack in the housing.

Our service includes unit exchange or send-in repair:

Unit Exchange
In locations where Unit Exchange is available, we will send you a replacement unit. You must return the defective unit to our company (using the shipping carton that the new one came in.)

Send-In Repairs
In locations where Send-In Repair Service is available, repair service can be obtained by shipping your unit to the Repair Center. The unit will be repaired and returned to you.

For either Unit Exchange or Send-In Repairs, you must have an authorized RMA number from our support before shipping your defective product.

Replacement products may be either new or equivalent in performance to new. Replacement or repaired products may contain remanufactured parts equivalent to new in performance or may have been subject to incidental use.

Out-of-Warranty Support
In addition to providing free technical support during the warranty period, We are also available to support your product after the warranty period has ended. This out-of-warranty support will be provided on a fee basis.
**Pixel Errors with LCD TVs**

Active matrix LCDs (TFT) with a resolution of 1024 x 768 pixel (XGA), which are in turn composed of three sub-pixels each (red, green, blue), contain about 2.4 million addressable transistors. Because of this very high number of transistors and their extremely complex production process occasionally defective or incorrectly addressed pixels or sub-pixels may occur.
