SAFETY INSTRUCTIONS
For grating

For coarse grating

For fine grating

Bottom compartment

Remove the top of the base and remove the accessory compartment. Carefully pull the section of the compartment in the opposite direction and extract the accessories in the accessory compartment.

The section and accessory modules are extracted in the accessory compartment.
After the model name come a few text lines. You can remove the blender and its contents.

Put the feeder in the storage compartment. Close the circuit breaker. You can remove the blender and its contents.

Before cleaning, please remove the maximmum volume, then add water to the lid. Make sure that the bottom is not watered.}

Once the maximum volume is reached, the cover will open. Press the button (turn in the clockwise direction) and wait 10 seconds. After 10 seconds, the blender will close. If the water is not to be added, press the button again. If the water is to be added, press the button again. If the water is not to be added, press the button again.
The diagram next to the text reads: Please observe the maximum filling level of the work bowl when adding...
