Device

At the end of its life, the appliance must not be disposed of in household rubbish. Enquire about the options for environmentally-friendly disposal.

Batteries

Do not dispose of used batteries in the household rubbish! They must be deposited at a collection point for used batteries.
SAFETY CAUTIONS

We recommend that you read this chapter completely and with care and follow the instructions detailed. In doing this, the correct functioning and the long duration of the MP3 Player are ensured.

Please keep these instructions somewhere safe in order to be able to hand them to a new owner in any eventual case of sale.

In case of any problems, address exclusively to your local authorised service centre.

DATA SECURITY

You must guard against the loss of your important data by making backup copies. You can backup your data onto CDR, CDRW, floppy disk, USB memory drive or other media such as ZIP drives. It depends upon how much data you want to backup. IF you do this and something happens to the hard drive in your computer, you have another copy of your data. We do not assume liability for any data loss or damage to data storage units, and no claims can be accepted for damages resulting from the loss of data or any consequential losses.
**SAFE USAGE GUIDELINES**

- Keep the product away from damp, protect it from jolts, dust and heat and do not expose it to direct sunlight, in order to avoid any operational problems.
- Do not open the product casing: this would cause the forfeit of the guarantee and the eventual damage/destruction of the product.
- Do not allow children to play with electrical products without the supervision of an adult: children are not able to evaluate any possible and real dangers.
- After transportation of the product, wait until there is a suitable environmental temperature before putting it into operation. In case of significant thermal variations or damp, it is possible that the forming of condensation can occur which can cause short circuits. Before transportation, replace the cover of the USB socket.
- Use only the USB Cable supplied with the product.
- The product supplied is intended to be used only with computers equipped with power surge protection. (Limited Power Source according to EN60950).
ELECTROMAGNETIC COMPATIBILITY

- When you use the product, follow the directives on electromagnetic compatibility (EMV). To avoid the risk of damage and the loss of onboard data, position the device at least one meter from high frequency and magnetic sources of interference (TV, stereo loudspeakers, mobile phones, etc.).

CLEANING

Generally, the equipment does not need to be cleaned.

- Caution! The product does not contain components that need to be maintained or cleaned.

Be careful that the product does not get dirty. Do not use any solvents or spray corrosive cleansers. If absolutely necessary, clean the product casing with a damp cloth.

BATTERY HANDLING

Batteries may contain combustible materials. Misusing them may cause battery leakage, heat, explosion or ignition, bringing about injury or damage to the product or YOU. Please observe strictly the following:

- KEEP CHILDREN AWAY from batteries.
- If by any chance, batteries are swallowed, consult a medical doctor immediately.
- DO NOT CHARGE batteries (except rechargeable batteries).
- DO NOT FORCIBLY DISCHARGE batteries.
- DO NOT SHORT-CIRCUIT batteries.
- DO NOT HEAT or DISPOSE OF IN FIRE.
DO NOT DISASSEMBLE or DEFORM batteries. Your hands and fingers may be injured, or the liquid of the battery may get into your eyes or adhere to your skin. If this happens, rinse with a large quantity of water immediately and consult a medical doctor.

DO NOT expose batteries to strong impacts by dropping or throwing the batteries.

DO NOT reverse the positive (+) and negative (−) terminals to avoid short-circuit.

REMOVE PROMPTLY any used battery from the device.

REPLACE THE BATTERY with a new battery of the same type.

INSULATE THE TERMINAL parts with tape or the like when storing or at disposal of the batteries.

DO NOT throw drained batteries in with the domestic rubbish! Respect the environment and dispose of them in the specific containers for separate collection. If necessary, turn to your reseller or to our service centre. Thank you!

LEGAL CAUTION:
The MP3 Player can only be used to copy or encode music tracks of which the user owns the copyright(s) or for which he has purchased or has been given the right of use from the holder of the copyright.

Any user who violates these rights is prosecutable according to the laws and/or subject to claims from the holder of the rights.
FILE FORMATS
This MP3 Player supports the following file formats:

<table>
<thead>
<tr>
<th>Mode</th>
<th>Format</th>
</tr>
</thead>
<tbody>
<tr>
<td>Playback</td>
<td>- MP3</td>
</tr>
<tr>
<td></td>
<td>- WMA (Windows Media Audio)*</td>
</tr>
<tr>
<td></td>
<td>- WAV (in connection with the &quot;Digital Voice Recorder&quot;)</td>
</tr>
<tr>
<td>Record</td>
<td>- Digital Voice Recorder: WAV</td>
</tr>
</tbody>
</table>

* WMA files can be played with Windows® Media Player Version 7.0 or higher.

WMA FILE FORMAT AND DIGITAL RIGHTS MANAGEMENT (DRM) MANAGEMENT
Your new USB MP3 Player can not only playback MP3 files but also files that are converted by Windows® Media Player into WMA file format. Please note that some WMA encoder programs could use DRM (Digital Rights Management) software. This DRM software is meant to stop unlicensed, unauthorised encoding and copying of music files.

Please use Windows® Media Player version 7.0 and up for converting your audio files into WMA files and copying these WMA files to your portable devices. WMA files that are converted with Windows® Media Player version 7.0 and up can be played back on portable devices.

Note: DRM means that the converted music / audio file will get attached a special DRM license file that would stop playing back these files on portable devices in case there would not be any license fee paid or license agreement would be in place. These files have to be
converted by Windows® Media Player 10.0 version or other software that converts MP3 files that would allow to do this. You can transfer / copy the converted WMA file on to your portable device but in case the license file would not be transferred the portable device would stop the playback of the audio file you would like to listen to.

For further information please refer also do:

COPYING YOUR OWN MUSIC WITHOUT PROTECTION:

The Option marked with an arrow (under Extras > Options) must not be activated in the case of Windows® Mediaplayer® so that newly converted WMA/MP3 files can be played through your MP3 player:
WHAT’S IN THE BOX?

Please check the below listed parts and accessories are in the box when you first unpack your product. In the case of any missing item(s) please contact your local service centre accordingly. Any claim for missing parts will only be accepted within 7 days from date of purchase. Included in your product box is the following:

- MP3 –Player (integrated battery)
- USB cable extension
- AC adaptor (DSR-0051-03M FAU)
- Earphones, Carry Pouch and Strap
- Driver CD-ROM for Windows® 98SE
- Warranty card
- This user manual

GETTING STARTED

POWER SUPPLY

Your device is operated with an installed battery.  
**Caution**: It may be necessary to connect the MP3 player to electricity to charge the battery, according to the charging status of the installed battery.

1. Connect the network adapter supplied with the device to an easily accessible socket.  
2. Connect the end of the network adapter cable to the USB connection of your MP3 player.  
3. Your MP3 player will switch on and begin the charging process.  

**Advice**: The battery will also be charged if you connect your MP3 player to a computer.  

**Advice**: For further information please refer to the section „Battery Handling” starting on page 3.
CONNECTING THE EARPHONES
Stereo earphones are included.
Insert the earphone plug into one of the appropriate sockets. You can also connect a cable (not in the scope of delivery) to these connections, as a means to connect your stereo system. It will be possible to use both connections at the same time. The playback will take place through the installed loudspeaker if earphones are connected. It will be possible to switch the loudspeaker off. For further information please refer to page 21.

⚠️ Caution: Listening to music at a very high volume can cause permanent damage to your hearing. Before starting playback, adjust the volume to the lowest level, then start the playback and adjust the volume to the desired level.
OPERATION

TURNING ON/OFF THE MP3 PLAYER
To turn on the MP3 Player, hold down / press the key ▶️/⏸️/▶️ for two seconds. You will have to confirm switching on with the Menu button, so that the MP3-Player is not switched on accidentally. Corresponding information will be shown in the display.

The MP3 player will automatically be in the playback mode after it has been switched on.

The MP3 Player turns off automatically after some time when not in use in order to save the battery (see page 20). To turn off the MP3 Player, hold down / press the key ▶️/⏸️/▶️ for three seconds.

VOLUME ADJUSTMENT
To adjust the volume press the volume up/down keys. Hold the Menu button in the [+ ] direction, in order to increase the volume. Hold the Menu button in the [-] direction, in order to lower the volume. The display will show the recent adjustment.
PLAYBACK / PAUSE / STOP
After turning on the MP3 Player, press briefly the button \( \gg / \ll / \square \) to playback a track. To pause the playback, press the button again briefly. To start the playback again, press the button again.

When the button \( \gg / \ll / \square \) is pressed for one second the playback will stop and return to the beginning of the track. Holding the button for more than two seconds will cause the MP3 Player to turn off.

How you can transfer files on your MP3 Player you will find on page 26.

TRACK SELECTION
Press briefly the menu button in the direction \( \gg \) to playback the previous track or to get back to the beginning of the current track. Press briefly the menu button in the direction \( \ll \) to choose the following track. By keeping the buttons pressed, the tracks scroll backwards and forwards while the playback is muted.

You can select the title in a targeted way by means of the [Playlist] Menu point.

Although the selection of the title is only possible on the title level, a file structure in accordance with albums or sub-directories has also been taken into account.
SELECTION AND REPETITION OF TRACK SEGMENTS

It is possible to select some “segments” of a musical or vocal track. This segment is then played back endlessly (loop).

1. **Definition of the segment start:**
   
   Press briefly the button [A-B/EQ]. On the display lights up A-.

2. **Definition of the segment end n:**
   
   Press again the button [A-B/EQ]. The display information turns to A-B and the segment so selected is repeated endlessly until you press the button [A-B/EQ] again. The display will disappear when you end the playback.

MENU SETTINGS

STARTING THE MENU

To bring up the menu and to be able to modify the mode of operation and the default settings.

1. Turn on the MP3 Player.
2. Press the menu button to show the menu.
3. Hold the Menu button towards the right or the left, in order to select a Menu point shown in the display.
4. Confirm your choice by pressing the menu button.
**CLOSING THE MENU**

1. Select the option [Exit] in the main menu.
2. Press the menu button to exit the menu. The Menu will be closed automatically in the Main Menu if no entry is made for more than 5 seconds.

The Menu will also be closed if the Menu button is pressed for several seconds.

**MENU HIERARCHY**

1. **HOLD MODE: KEY HOLD**

   ![Hold Mode Diagram]

   The MP3 Player is provided with a key/button lock function that prevents the unintentional activation of a key. This function is useful if you listen to music whilst keeping the device in the carry pouch or a pocket. How to activate the key hold:

   1. Press the menu button.
   2. Press the button [ ▶/▶/▶]. ♻️ appears on the display and the device ignores any given command.
   3. To stop the hold function repeat the steps 1 to 2. The symbol ♻️ on the display disappears.
2. **PLAYLIST**

This mode enables the player to playback the music stored on the device:
1. Press the menu button to start the main menu.
2. Select the word [Playlist].
3. The display will show the actual track. Select the desired track.
4. The MP3 player starts playing the selected track with the button [▶ ▼ / ■].

3. **MUSIC**

This mode is automatically activated when turning on the MP3-Player. If another mode (e.g. Voice) is activated proceed as follows:
1. Press the menu button.
2. Select the word [Music].
3. Press the menu button to take this mode over. The display [A] will show MP3.
4. **Voice**

The voice mode enables the player to playback the recorded audio stored on the device:
1. Press the menu button.
2. Select the word [Voice].
3. Press the menu button to take this mode over.

5. **Settings**

This Menu offers the following setting possibilities, which can be called up through sub-Menus:

5.1 **EQ (Equalizer)**

Select your equalizer:
1. Press the menu button.
2. Select the word [Settings].
3. Press the menu button.
4. Select the word [EQ].
5. Press the menu button.
6. Choose between the Normal (no correction of frequency, Rock, Jazz, Classic, Pop, User. You can carry out a frequency correction individually by means of the User Option.
7. Press the menu button.
8. Select the word [Exit] to get back to the main menu or press the menu button for some seconds to leave the menu.
9. The display [B] will show the selected setting for the equalizer.

Advice: The operation to select or leave the sub-Menus takes place in the same way as described here.

5.2 PLAYMODE

Here you choose the playback mode.
<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal</td>
<td>All the files will be played in the sequence in which they were saved/stored, the playback stops after the last file.</td>
</tr>
<tr>
<td>Repeat One</td>
<td>The selected file will repeat endlessly until stopped.</td>
</tr>
<tr>
<td>Repeat All</td>
<td>All files in the saved/stored sequence will be played back endlessly until stopped.</td>
</tr>
<tr>
<td>Random</td>
<td>Playback of a file chosen at random. Each title will only be played once.</td>
</tr>
<tr>
<td>Repeat Random</td>
<td>Repeated, shuffled playing. (Titles can be played twice.)</td>
</tr>
<tr>
<td>Folder Play</td>
<td>Plays all the files in a Directory in their sequence and stops after the last file.</td>
</tr>
<tr>
<td>Folder Repeat</td>
<td>Plays all the files in a Directory in their sequence and begins again from the first file after playing the last file.</td>
</tr>
<tr>
<td>Random Folder</td>
<td>Playing of a file selected by chance within a directory; each title will only be played once.</td>
</tr>
</tbody>
</table>
5.3 **CONTRAST**

This option is to set the contrast of the display.

5.4 **POWER SAVING**

The MP3 player will wait for the predetermined time. It will switch off automatically if no title is heard or a button is not operated during this period. Possible values are:

5.5 **RECORD SETTING**

It is possible to select the desired resolution of the recording. It is possible to choose between 8000 and 48000 Hz for WAV files and between 96 KBPS and 128 KBPS for MP3 files. The higher the value is, the better the quality and the greater the musical dimensions.
5.6 Display Setting

This option is to set how long the background light will stay on. You can choose between 5 to 20 seconds or "Always on" (permanent background light).

5.7 Screen Saver

Select whether you want to activate or de-activate the screensaver here.

5.8 Speaker

You have the possibility of de-activating the loudspeaker manually by means of this Menu point.

5.9 Exit

Terminates the settings menu and goes back to the main menu.
6. **Erase**

Use this option to delete files on your MP3 Player without connecting it to a computer.

To delete a file proceed as follows:

1. Press the menu button.
2. Select the word [Erase].
3. Press the menu button.
4. Select the word [Music] for music files or [Voice] to delete your recorded files.
5. Press the menu button.
6. Select the file you want to delete.
7. Confirm the deletion process with **YES**, by moving the Menu button downwards (−). The selected title can be deleted if the word Yes is stored in black.
8. Press the button [▶ ▶ ▶] to delete the file. The display will briefly state „File Deleted“. Press the Menu button instead of the Playback button if you do not want to delete the file.
9. If you want to delete more files repeat the steps 4 - 8.
10. Press the word [Exit] to leave the menu.
11. Press the menu button.
12. To leave the main menu, select the word [Exit].
7. **ABOUT**

This sub menu will display the firmware release version and the amount of memory installed on the MP3 Player.

8. **RECORD**

You can record audio material on to the MP3 Player by using the integrated microphone.

1. Press the menu button.
2. Select the word [Record].
3. Press the menu button. The recording session starts immediately. Point the MP3 Player at the audio source.
4. Press the menu or playback button to start the recording session.
5. If you want to perform more recordings repeat step 3 to 4.
6. Select the word [Exit] and press the menu button to leave the main menu.

* The recorded files will be saved in the subfolder „Voice“ and named V00x.WAV, where the x stands for a sequential number.
USING MEMORY CARDS

Warning: DO NOT insert or eject Memory Cards while the MP3-Player is turned on. This will avoid possible damage to your memory cards.

Advice: The MP3 Player only recognises cards which are formatted in FAT-16 format. Please consult the online help of your computer’s operating system to get more information about formatting and file formats.

Advice: The Memory card will be recognised as an additional removable device if the MP3 Player is connected to your computer.

INSERT A CARD

1. Turn the MP3 Player off.
2. Open the slot on the rear of the MP3 Player.
3. Insert the MMC/SD card into the slot until it fits perfectly.
4. Shut the memory card slot.
5. Turn the MP3 Player on.

REMOVING A CARD

1. Turn the MP3 Player off.
2. Open the memory card slot.
3. Pull the memory card carefully out of the slot using your fingernails and store it in a safe place.
4. Shut the memory card slot.
I. CONNECTION TO THE COMPUTER

1. Turn the USB plug in order to fit it into a free USB socket on your computer. Please use a USB cable extension if the plug doesn't fit.
2. Turn on the MP3 player.
3. The following display will appear on the display of the MP3 player if the connection has been made:

![Ready Icon]

4. The computer will now recognize that a new device has been connected and will allocate a new drive to the MP3 player.
**Driver Installation Windows 98SE**

- **Attention:** Only Windows® 98SE users will have to install driver. Windows® ME, 2000 and XP can support the MP3-Player without the necessity for you to install a driver.

1. You will be requested to enter the position of the driver. Insert the CD supplied and allow Windows to search for the appropriate driver on the CD. The driver will be located in the `Drivers` Directory.
2. A new drive will be created on your PC if the driver has been installed.

**II. PC/MP3 Player File Exchange**

The new driver enables file movement from PC to MP3 Player. It will therefore be possible to copy your favourite tracks onto the MP3 Player.

**Memory Drive Function**

It is also possible to use your MP3-Player as a Memory Drive. Simply copy the desired files onto the MP3 Player. Take into account that the MP3 Player only shows files with the extension *.mp3, *.wmw and *.wav.

**Firmware Update**

The CDROM that is supplied with the device contains a program that allows the updating of the operating software (firmware) of the MP3 Player. The updating of the MP3 Player software is not strictly necessary. This is a task that you should only perform when you encounter problems and the service centre hotline advises you to do so.
CUSTOMER SERVICE

SOLUTIONS FOR COMMON PROBLEMS

The computer does not recognise the MP3 Player:

- Check the installation (page 25 and following. Windows 98 SE: is the driver installed?)
- Is the battery loaded?
- Check the cable connections.
- Is the MP3 Player turned on?
- In Windows Control Panel, check if the MP3 Player is installed correctly. Try installing the USB controller again. Remove any other USB peripherals as a test.

In the MP3 Player, the files are not shown correctly:

- The MP3 Player does not display the name of the file but its own coded information with an ID tag. This information can be modified with special programs (not included).

The MP3 Player does not execute the commands correctly:

- Is the battery loaded?

The titles are not shown in the correct sequence:

- Check that the playback mode is set correctly (page 13)
- Is the USB to PC connection correct?
Is further assistance necessary?
If the suggestions listed above are not enough to resolve the problem, then contact us. The following information will help us to help you resolve your problem:

- Configuration of the computer
- Any additional peripherals you may have connected
- Any messages that appear on the MP3 Player display
- Any Windows programs that were being used when the problem arose.
- Solutions you have tried to resolve the problem
- If you have a customer code, please have it ready before you call.
WARRANTY

PLEASE READ THIS LIMITED WARRANTY CAREFULLY TO UNDERSTAND YOUR RIGHTS AND OBLIGATIONS.

The sales receipt is considered valid proof of purchase and should be kept in a safe place. This receipt will be required for receiving any warranty service. This warranty is transferable. When transferring ownership to a third party, please provide the receipt and warranty information. Our company warrants to the end user that each product, including related software, accessories, media and supplies, shall be free from defects in materials and workmanship for twelve months from date of purchase. This warranty covers only those defects that arise as a result of normal use of the product. This warranty does not cover any other problems, including problems that arise as a result of improper maintenance or modification; software, accessories, media or supplies not provided or supported by the supplier; or operation outside the manufacturer's specifications. Any part of this device repaired or exchanged by a valid service representative will be covered under the original warranty period. Back up all programs and data before shipping this device for repair under the warranty agreement. Do not leave any media in the disk drives. Products shipped without accessories will be returned without accessories. Any replacement product or component may be either new or like new, provided that it's functionality is at least equal to that of the product being replaced.

LIMITATION OF WARRANTY

To the extent allowed by local law, no other warranties are made with respect to this personal computer or the warranty services by any person, including but not limited to our company and it's suppliers. The express warranty stated above is the only express warranty made to you and is provided in lieu of all other express or implied warranties and conditions (if any) including any created by any other documentation or packaging. For additional warranty information, please refer to the included warranty card.
LIMITS OF LIABILITY
To the extent allowed by local law, except for the obligations specifically set forth in this warranty statement, in no event shall the company or its third party suppliers be liable for direct, indirect, special, incidental, or consequential damage, whether based on contract or any other legal theory and whether advised of the possibility of such damages. This includes loss or damage of personal data on your computer.

LOCAL LAW
This warranty statement gives you legal rights. You may also have other rights that vary from jurisdiction to jurisdiction. To the extent this warranty statement is inconsistent with local law, certain disclaimers and limitations of this statement may not apply to the customer.
