Getting to Know Your Camera

◆ Overview

The camera with 3.2 Mega Pixel sensor can take DVD-Quality MPEG-4 movies. By way of using MPEG-4 technology, more videos can be taken within certain amount of memory. High quality images with up to 10 mega-pixels can also be delivered smoothly. With a color LCD monitor, users can compose images and examine them easily.

Exposure and color balance can either be adjusted automatically or allowed to be changed manually. An 8x digital zoom increases user control over the movies and pictures you take. The camera is also ideally suited for using as a PC camera hooked up to your home computer via high speed USB 2.0 port

Biuld-in 32 MB memory allows you to take pictures and movies without memory card. The memory card slot allows users to increase the storage capacity up to 2GB.
> *Note*
> Partial memory of the built-in 32MB memory is used for Firmware code
◆ Standard Accessories

Unpack the package and make sure all standard accessories listed are included:

- Camera
- USB Cable
- TV Cable
- Two AA (Alkaline) Batteries
- Quick Guide
- CD-ROM (Driver, Ulead Software and User Manual)
- Earphone (Optional)
- Remote Control (Optional)
- Strap
- Pouch

Getting Up and Running

◆ Loading the Battery

Before using the camera, user must load two AA
(Alkaline) batteries.

1. Follow the arrow direction and slide to eject the
   battery cover.
2. Insert the batteries according to the correct
   polarity marks (+ or -)
3. Close the battery cover firmly.

◆ Inserting and Removing an SD Card（Optional）

The camera comes with internal memory which allows you to store pictures, movies, recorded
voice and music. You can expand the memory capacity by using an optional SD or MMC
memory card up to 2GB. To insert a memory card, refer to the figure as below:

1. Insert the memory card into the right position.
2. To remove an installed SD card, press the card inwards to
   release it.
3. When the card pops out, gently remove it from its slot.

> *Note*
> *When a memory card is fitted, movies and pictures are
> saved on card rather than on the built-in memory.*

◆ Protecting Data on an SD Card

SD card is read-only by locking the SD card. No pictures, movies and voice can be recorded
when the SD card is locked. Make sure the lock is on writeable position before recording any
media.
◆ Turning the Camera On and Getting Started

To turn on the camera:

(1) Flip out the LCD panel; the camera will turn on automatically.

(2) Or press Power Button for one second to turn on it.

⇨ To take a movie, press the Movie Shutter Button ( ).

⇨ To take a picture, press the Picture Shutter Button ( ).

⇨ To record the voice, press the Upper Button of Direction Buttons and press the Movie Shutter Button ( ) to start voice recording.

⇨ To view stored movies, pictures or listen to stored MP3 and voice recordings, press the RECORD/PLAY Button once to switch to Playback Mode. Press a second time to return to Record Mode.
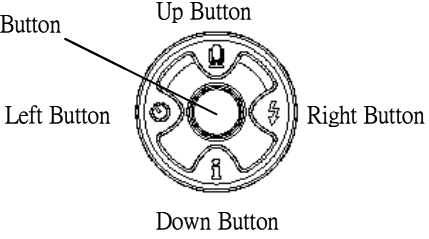

◆ Turning the Camera Off

To turn off the Camera, you can either press the Power Button for one second, or you can place the LCD panel back to its original position.

◆ MPEG4 Movie Recording

Press the Movie Shutter button (📹) to start recording. When a movie is recording, a time indicator will display on LCD monitor. To stop recording, press Movie Shutter Button (📹) again. Press RECORD/PLAY Button to view the recorded movie.
Three resolution settings are available:

Resolution	Quality
640*480(1.8Mbps) / 30 fps	High Quality ★★
640*480(1 Mbps) / 30 fps	Standard Quality ★★
320*240 (500 Kbps) / 30 fps	Low Quality ★

◆ Picture Recording

Press the Picture Shutter Button (📷) to take a picture.

Press RECORD/PLAY Button to view the picture.

Three resolution settings are available:

Resolution	Image Quality
3720*2790 (10M pixel)	High Quality ★★
2048*1536 (3M pixel)	Standard Quality ★★
1024*768 (800K pixel)	Low Quality ★

◆ Voice Recording

1. Press Upper Button (🎤) of direction Buttons to switch to Voice Record Mode.
2. Press Movie Shutter Button (📹) to record voice.
3. Press Movie Shutter Button (📹) again to stop.
4. Press RECORD/PLAY Button to view the recorded voice.

◆ Taking Close up Pictures

The camera has two close-up picture modes to allow you to take pictures at close range. The Macro Mode (🌹) should be used for object located at about 20 cm, while the Portrait Mode (▪) should be used for object located from 60 cm to 100 cm.

To take close-up pictures:

1. Rotate the lens ring to switch to Macro (🌹) or Portrait (▪) positions. In Macro Mode, the macro icon (🌹) will appear on the LCD monitor.

2. Press the Picture Shutter Button (📷) to take the picture.

**Note**

Remember to turn the macro switch back to Normal (▲) when you are not taking close-up pictures.

◆ Using Digital Zoom

The digital zoom magnifies images, when recording movies or taking pictures.

1. To zoom in/out, press the Tele/Wide Button.

2. The digital zoom can be set from 1x to 8x and the magnification ratio is shown on the LCD monitor.

Listening to MP3 Music (Optional)
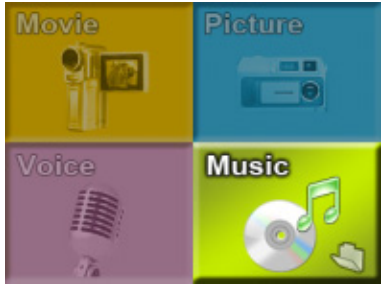

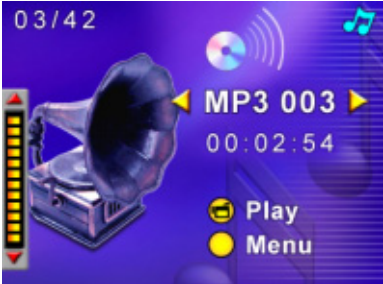

◆ MP3 Music
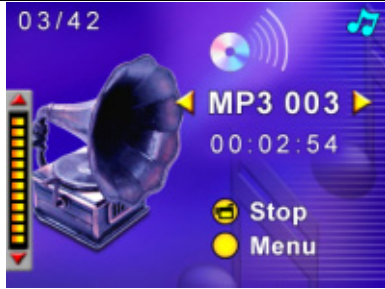

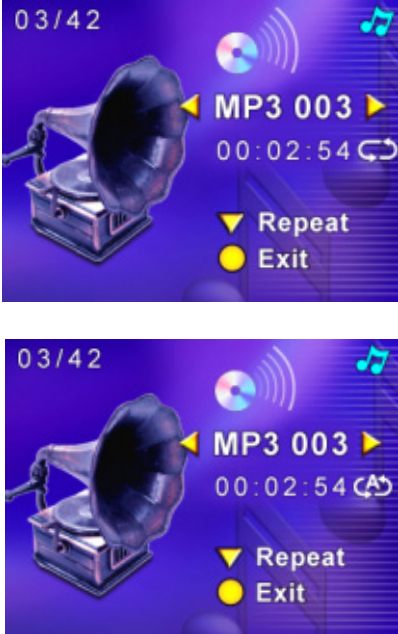

MP3 is a compressed audio file format. The MP3 music can be downloaded from some MP3 web sites.

◆ Transfer MP3 Music to the camera

1. Install the camera driver on your computer.
2. Connect your camera to the computer USB port.
3. The Red LED will light when the camera is connected to the computer and in Mass Storage Mode.
4. Transfer MP3 music to My Computer\Removable Disk\MP3.
5. Once all the music is transferred, disconnect the USB cable from the PC.

◆ Listen to MP3 Music

Operation	Display Screen
1. In Playback Mode, use Direction Buttons to select the Music option	
2. Use Right/Left Buttons to select MP3 you want to play.	

3. Press Movie Shutter Button to play MP3 4. Press Movie Shutter Button again to stop playing. 5. Press Up/Down Buttons to adjust volume.	
6. Press Enter Button to go to repeat menu. 7. Press Down Button once to repeat current MP3( ). 8. Press Down Button twice to repeat all MP3( ). 9. Press Enter Button to exit.	

◆ **Listen to MP3 Music with earphone (optional)**

MP3 stored in the camera can be played either by built-in speaker, or Earphone, or TV.

When the earphone cable is plugged in the camera, the option menu of Earphone/TV pops out on the LCD Screen. Choose earphone or TV and press Enter Button to validate the setting.

Viewing MPEG4 Movie on PC

◆ MPEG4 Movie

MPEG4, the multimedia format and compression standards, is a cutting-edge compression technology developed by MPEG (Motion Picture Expert Group). It not only enhances the image quality but also improves the efficiency of recording capacity.

MPEG4 is adopted in this camera to take DVD-quality MPEG4 movies. The MPEG4 movie format of AVI is used in this camera.

◆ View MPEG4 Movie on PC

When playing an MPEG4 movie for the first time, MPEG4 Video Codec Xvid should be installed in PC. To do this:

(1) Insert the CD-ROM into the computer's CD-ROM drive. Click "Install Device Driver" (Install MPEG4 Video Codec Xivd) and follow the on-screen instructions to complete the installation.

(2) Start video player such as Widows Media Player to view MPEG4 AVI Movies.

◆ Share MPEG4 Movie

You can share the recorded MPEG4 movies to your friends via internet or CD. Make sure MPEG4 Video Codec Xvid is installed in your friends' PC. MPEG4 Video Codec Xvid is available in the provided CD or can be downloaded from Internet.

Viewing Pictures and Movies on a TV

You can view stored movies and pictures on a television. To connect to a television:

1. Connect one end of the AV cable to your camera's AV Out port.
2. Connect the other end of the cable to a television.
3. The option menu of Earphone/TV pops out on the LCD Screen.
4. Choose TV option and press Enter Button to validate the setting.
5. The steps for viewing stored pictures and movie on a TV are exactly the same as for viewing them on the LCD monitor.

Note
The LCD monitor does not work when the camera is connected to a television.

Video File Converter

Bundled software CD contains Ulead VideoStudio that features video file converter to convert multiple video formats into MPEG4 Xvid compatible format with your camera. In this way, you can convert any format of video files and playback your favorite movies on your camera.

To convert a video file:
   (1) Install Ulead VideoStudio (Refer to section 11)
   (2) Click Start→ Select Programs→ Ulead VideoStudio 8.0
   (3) VideoStudio 8.0 main Screen will appear on your desktop.
   (4) Click "Tools" menu on the right side of the screen then choose "Batch Converter".
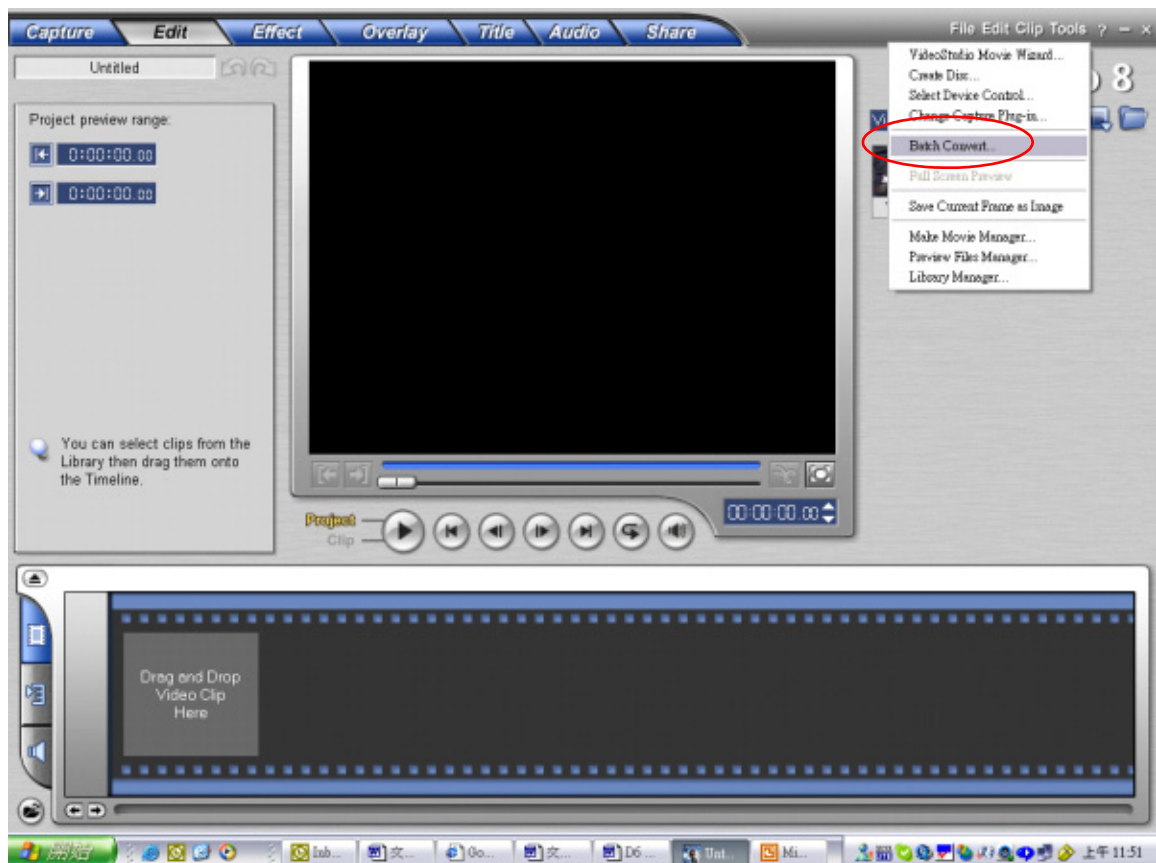

(5) Click "Add" to add the video file you want to convert.
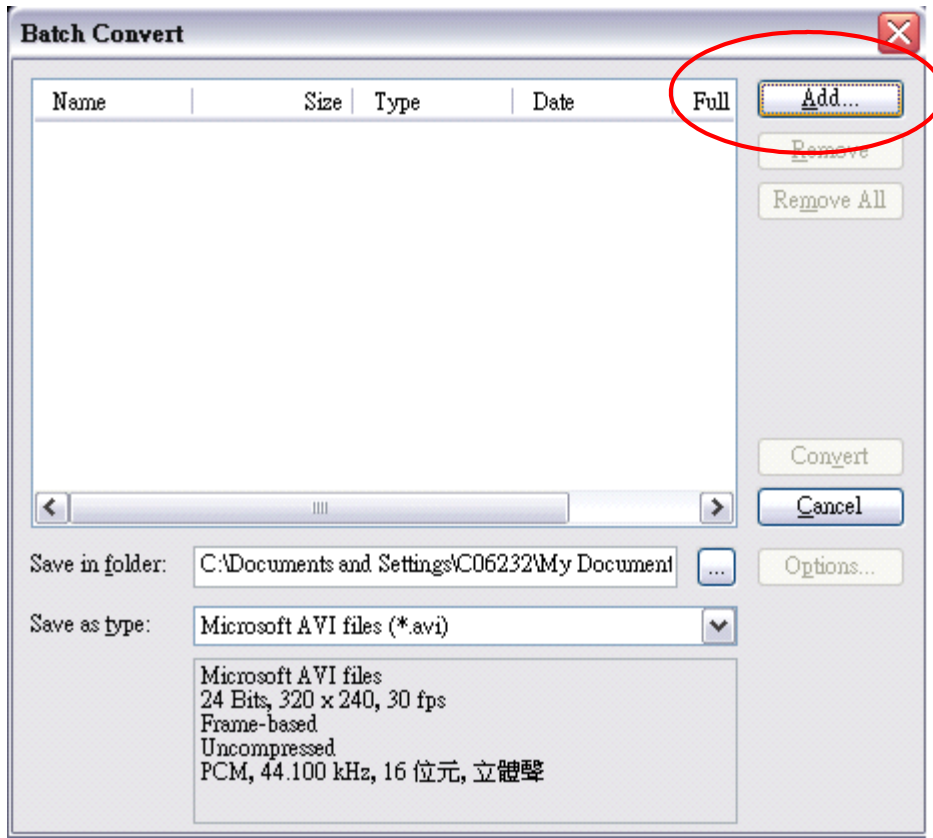

(6) Select "Save as type" to choose output video format and click "Convert" to start file converting.
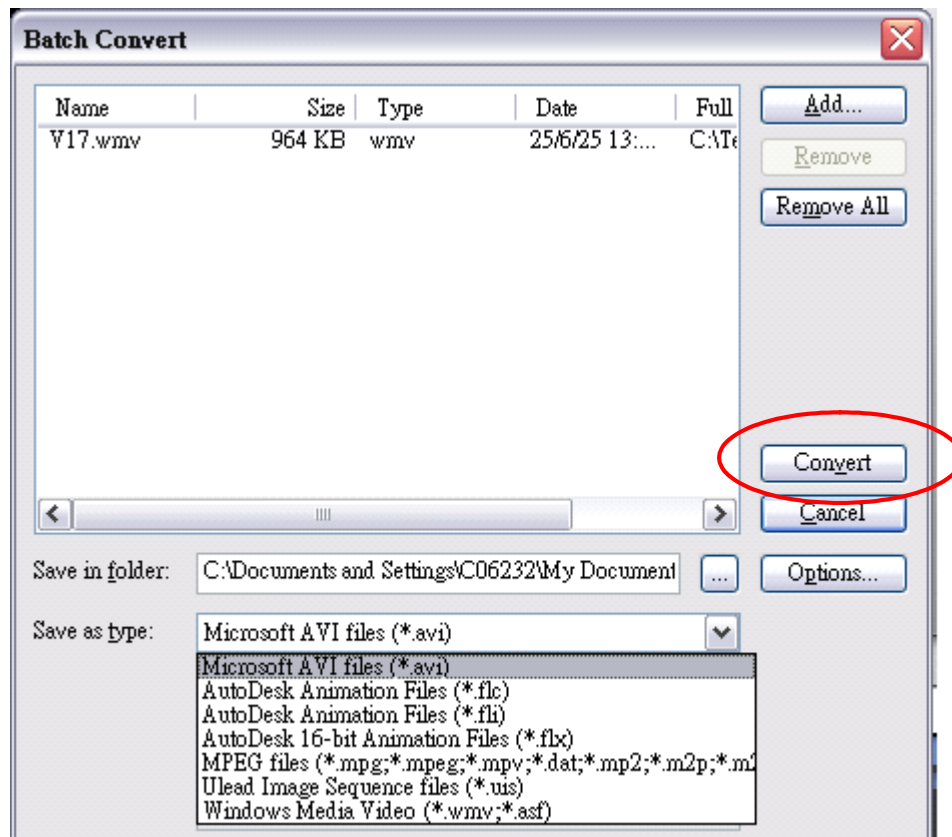

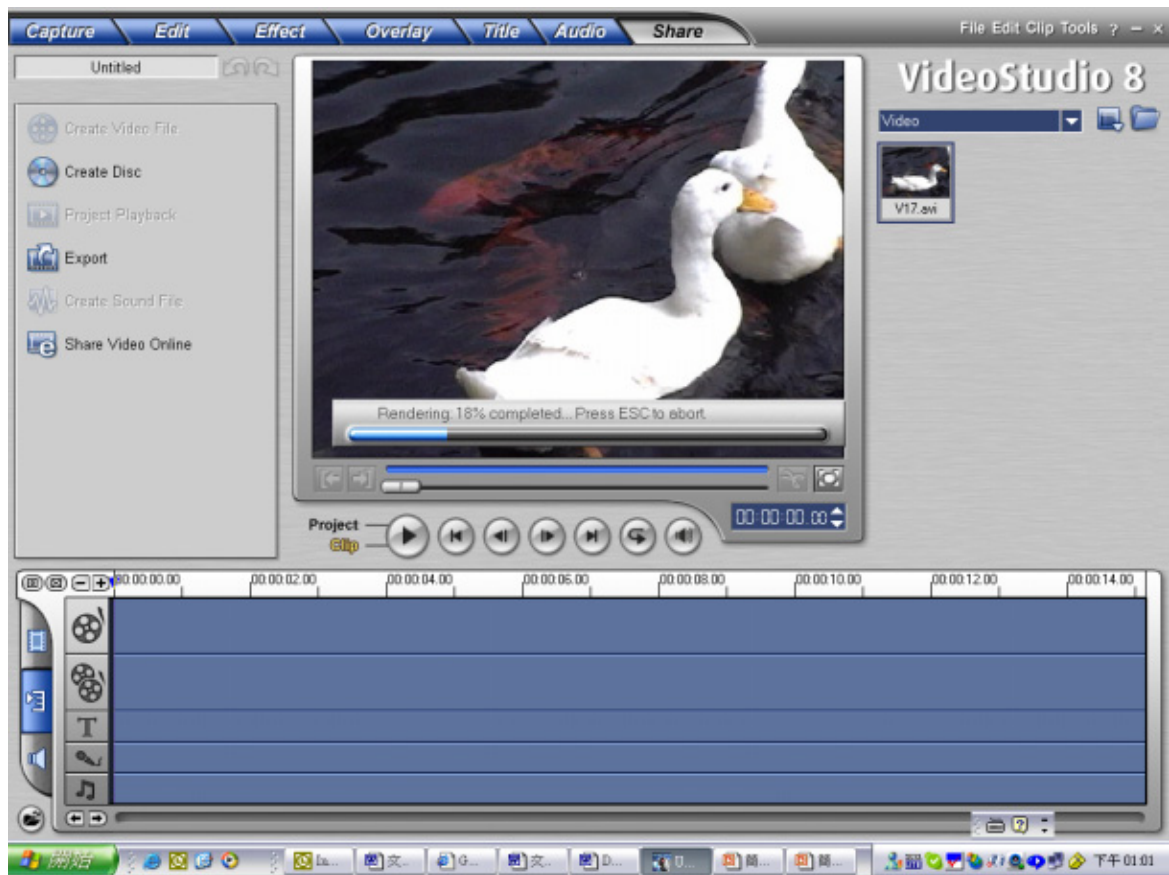

(7) Task Report window will pop out after the task is completed.
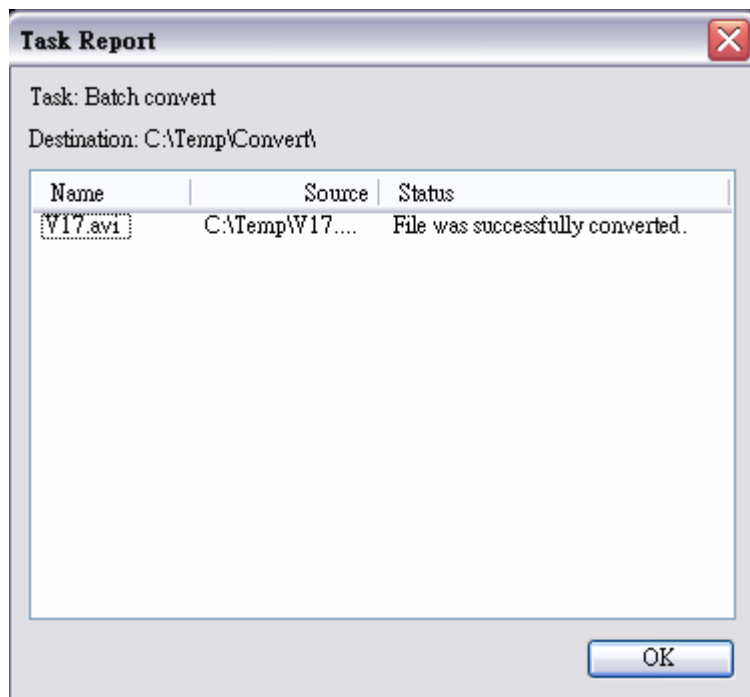

(8) Before transferring the converted file to your camera, rename the converted file to
" Clip0001.avi". (Please note: if Clip0001.avi exists in the camera, then the converted file
has to be renamed to clip0002.avi)

(9) Connect your camera to PC and transfer the converted video to "My
Computer\Removable Disk\DCIM\200Movie" in your camera. (Refer to Section 10
Transferring Data to a Computer)

(10)   After transferring the converted video to the camera, press RECORD/Play Button to
enjoy your favorite movie.

Burning the Recorded Clip into DVD

Bundled software CD contains Ulead VideoStudio 8.0 SE DVD also feathers burning the movie clip into DVD. You can preserve your precious movies on DVD to share with family and friends. To create a DVD:

(1) Select "Share" Option and click " Create Disc"
(2) "Create Disc" window pops out and click "Add Video" to add video file you want to burn into DVD. Then click "Next" button and follow on-screen instruction.
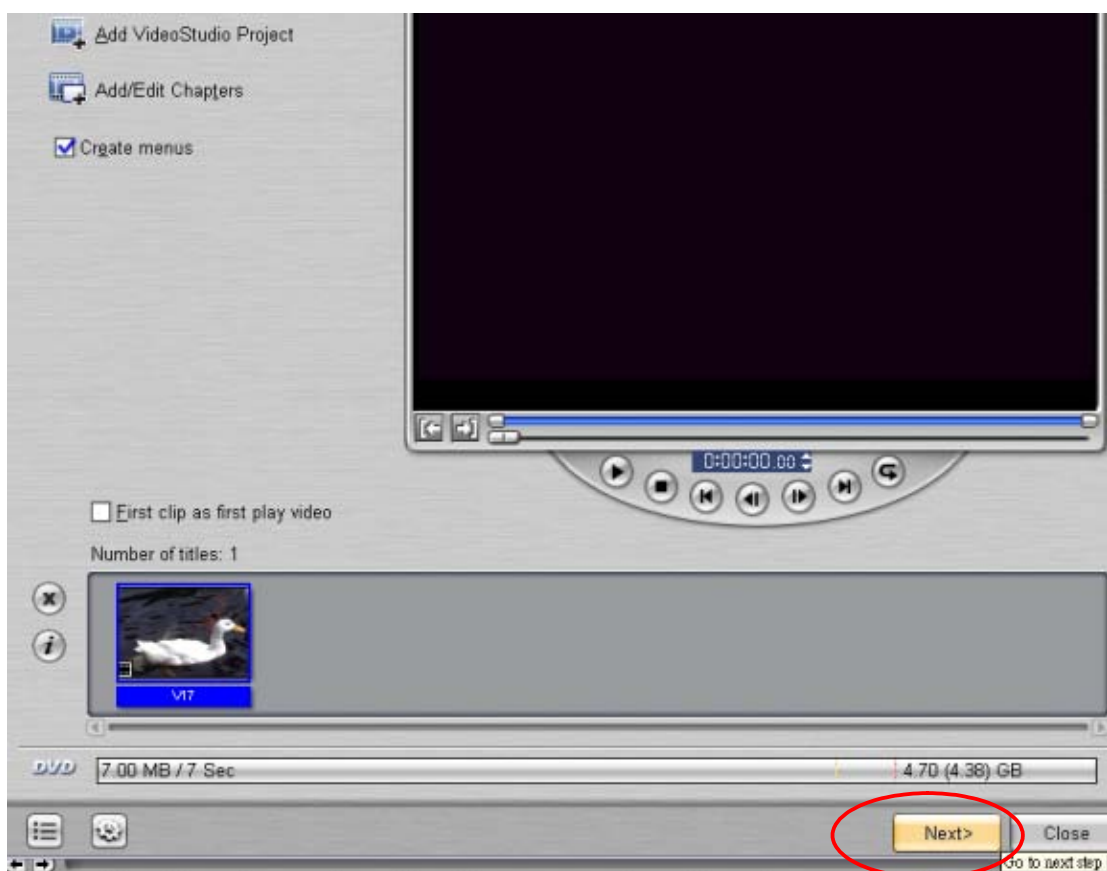

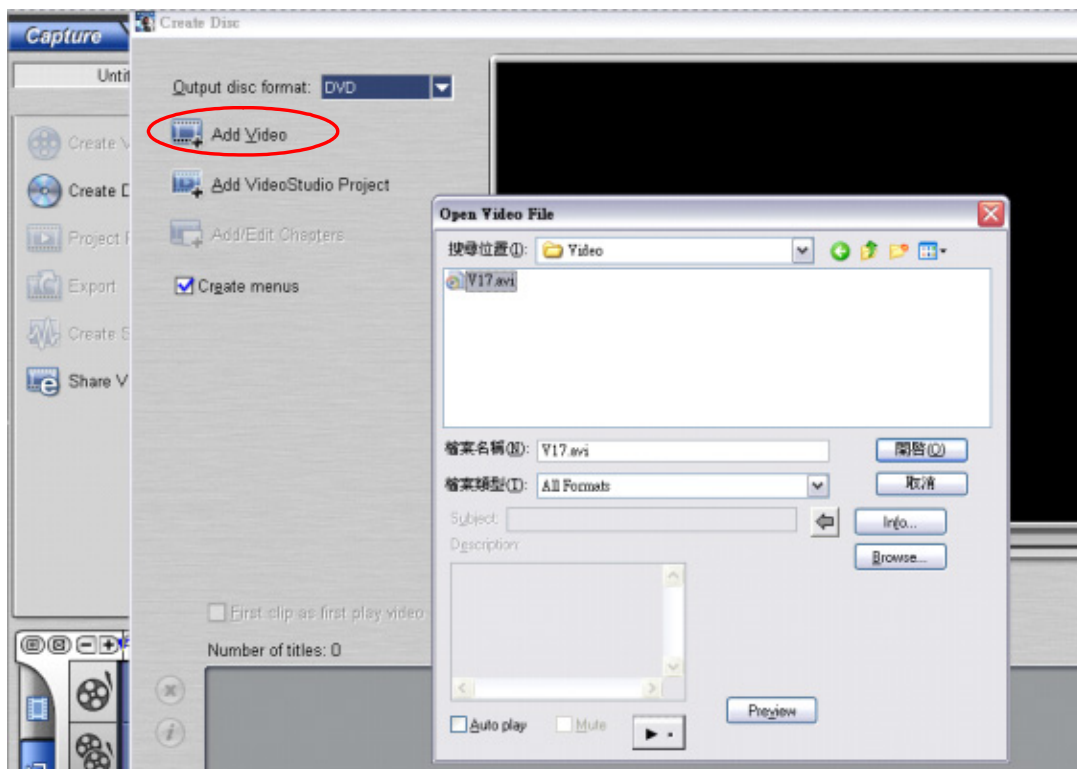

(3) Click "Output" icon () and start to burn DVD.

Section 10

Transferring Data to a Computer

◆ Installing the Digital Camera Driver

Before connecting this camera to a computer for the first time, you should install a driver on the computer. The driver is on the CD-ROM disc provided in the package. To install the driver:

1. Insert the CD-ROM into the computer's CD-ROM drive. The autorun screen will appear.
2. Click "Install Device Driver". Follow the on-screen instructions to complete the installation. Depending on your operating system, you may have to restart your computer after installing the driver.
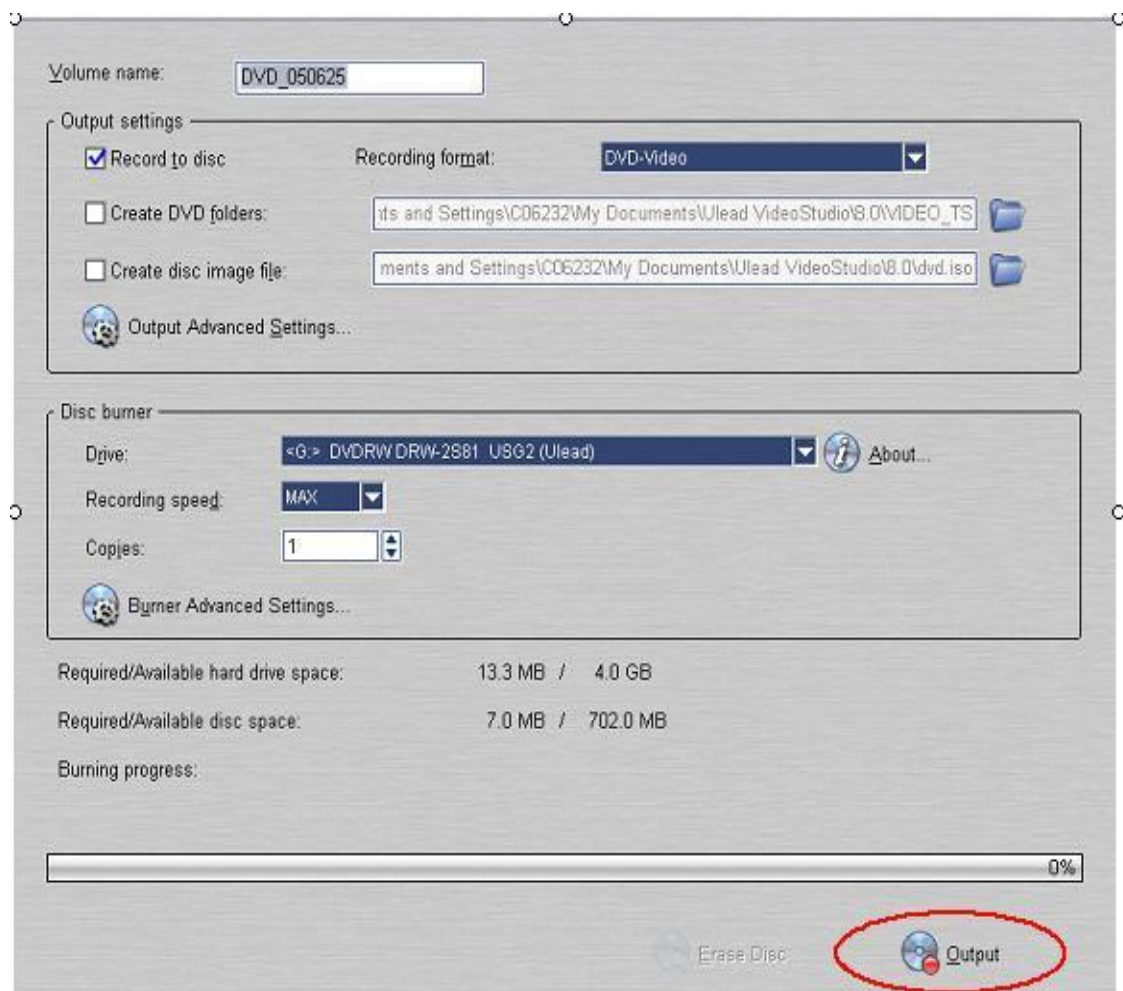

◆ Connecting Your Camera to a Computer

You can transfer pictures, movies or voice recordings stored on your camera to a computer and send them in emails to friends or post them on websites. To do this you should:

1. Install the camera driver on your computer.
2. Connect the computer and camera with the supplied mini USB 2.0 cable.
3. Default mode is Mass Storage Mode when the camera connects to PC
4. Transfer pictures or movies or MP3 or voice recordings

◆ Mass Storage Device Mode

The RED LED will light up when the camera is connected to the computer. Movies, pictures and voice recordings can be found on your computer at "My Computer\Removable Disk\DCIM\". Under this mode, you can read, delete, move, or copy any movie/picture/voice recording you want. Use the bundled Ulead application software to edit the movies or pictures.

◆ PC Camera Mode

When in Mass Storage Device Mode, press RECORD/PLAY Button to switch to PC Camera Mode and the GREEN LED will light up. Under this mode, you can implement live video conference meetings or use video email over the Internet.

◆ Installing Bundled Software

The CD-ROM supplied with this camera contains five pieces of software.

⇨ **Ulead VideoStudio 8.0 SE DVD** is a user-friendly application that helps you read, edit and organize images.

⇨ **Ulead Photo Express 5.0** allows you to edit movies and is equally easy to use.

⇨ **Acrobat Reader** is a popular program that you need to have installed to read the User's Manual. Many computer users will find they already have this software installed on their computer.

⇨ **MPEG4 Video Codec Xvid,** this decode software has to be installed for correctly viewing the movies you record.

The detail information can be found in online help of all the bundled software.

To install the bundled software:

1. Insert the CD-ROM into your computer's CD-ROM drive. The autorun screen appears.
2. Select the piece(s) of software you want to install from the list, then click **Install Application Software**. Follow the on-screen instructions to complete the installation.
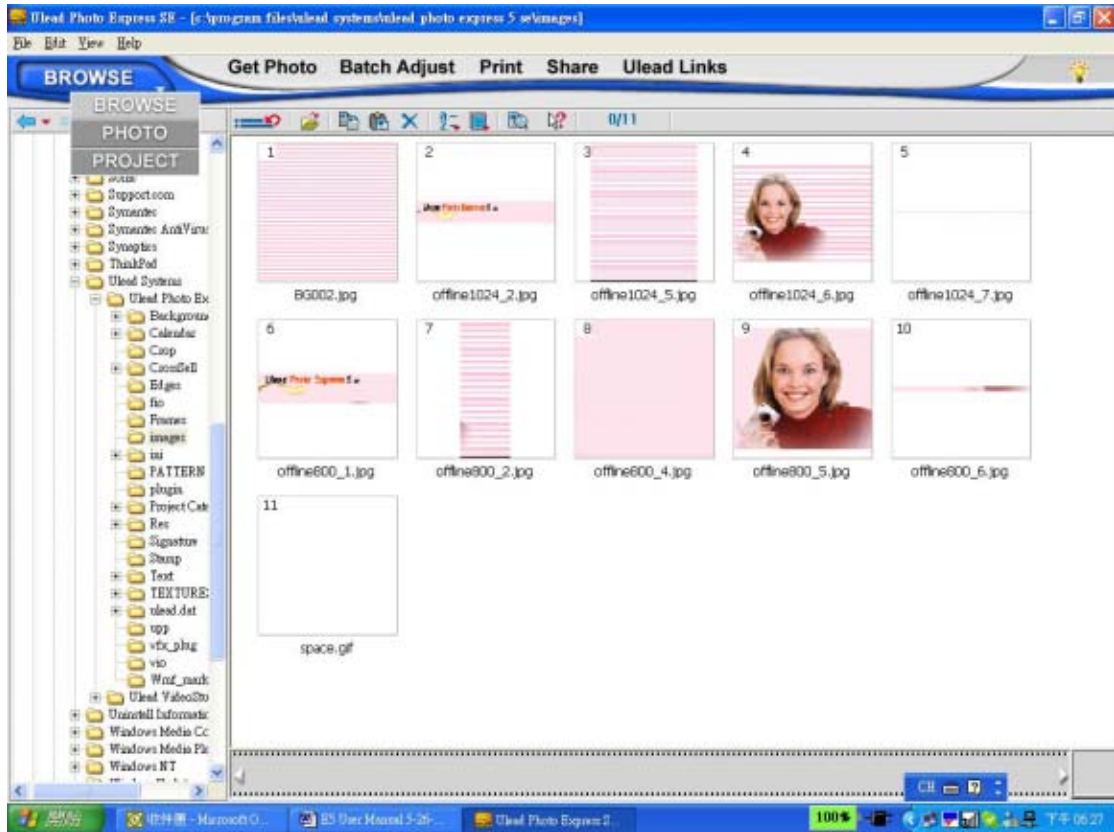

◆ Getting Started With Photo Express 5.0

- Click Start→ Select Programs→ Photo Express 5.0
- Photo Express 5.0 main Screen will appear on your desktop.

Viewing Images stored in the Camera through Photo Express 5.0

To view images stored in the camera, you must switch to Mass Storage Device Mode.

1. Select the image you want to open in the workspace from the browse bar on the left hand side.

2. Double click selected picture.

Capturing Camera Images through Photo Express 5.0

Before capturing a picture or video from the camera to the Photo Express 5.0 main screen, you must switch to PC Camera Mode. Press RECORD/PLAY Button to Switch to PC Camera Mode. Under this mode, you can capture videos or pictures through Photo Express 5.0:
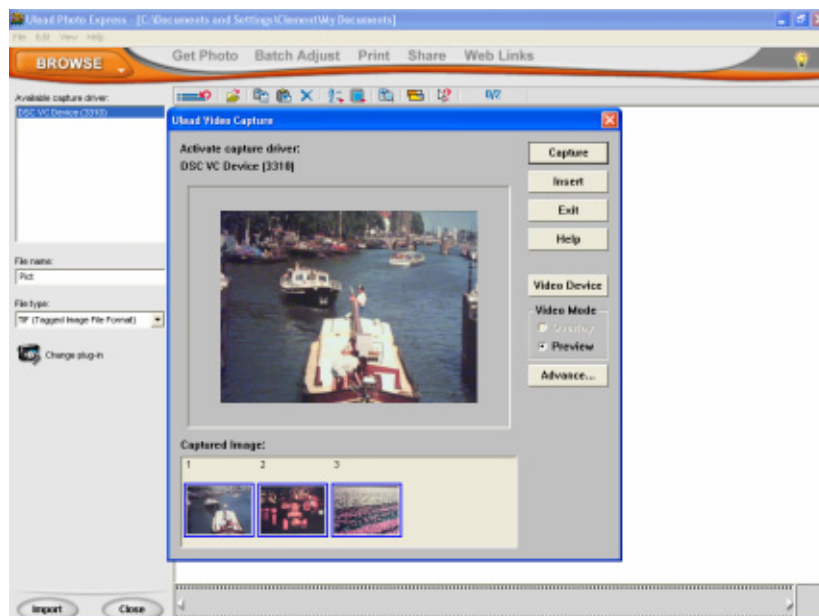

* Click the **[Get Photo** Video Capture **]** button.
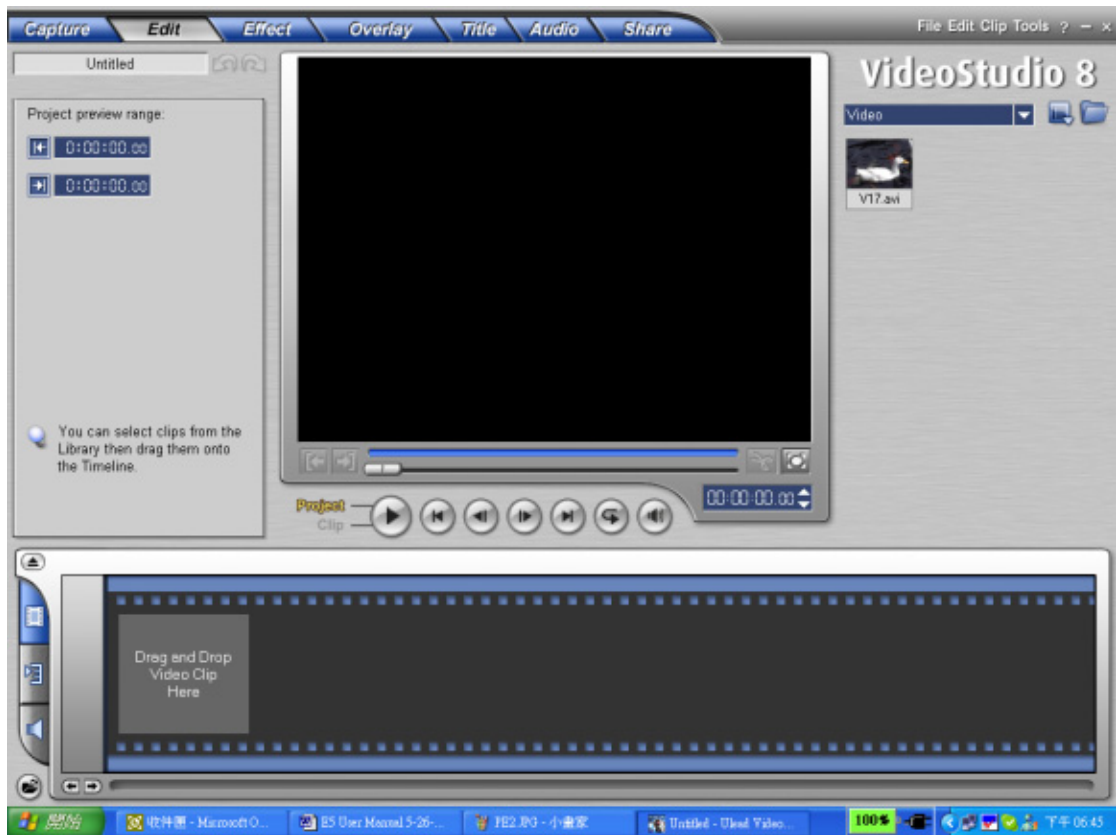

* Click the **[Import]** button.
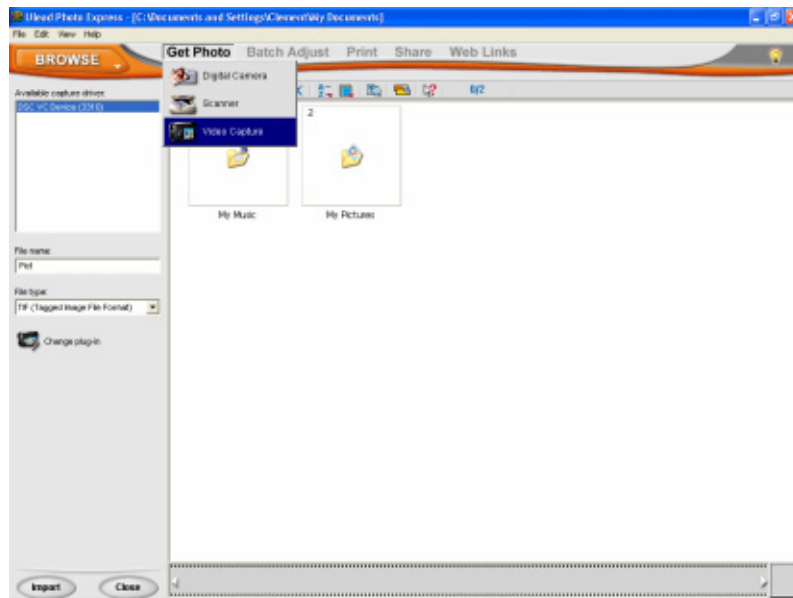

* Click the **[Capture]** button, and then choose your images.
* Click the **[Insert]** button, and click **[Exit]** button to leave the screen.

◆ Getting Started With Video Studio 8.0

• Click Start→ Select Programs→ Video Studio 8.0

• The Video Studio main Screen will appear on your desktop.

Viewing Images stored in the Camera through Video Studio 8.0

To view images stored in the camera, you must switch to Mass Storage Device Mode.

1. Click the folder on the right hand side of the screen.

2. Select the image stored in the camera and press Open button to view.
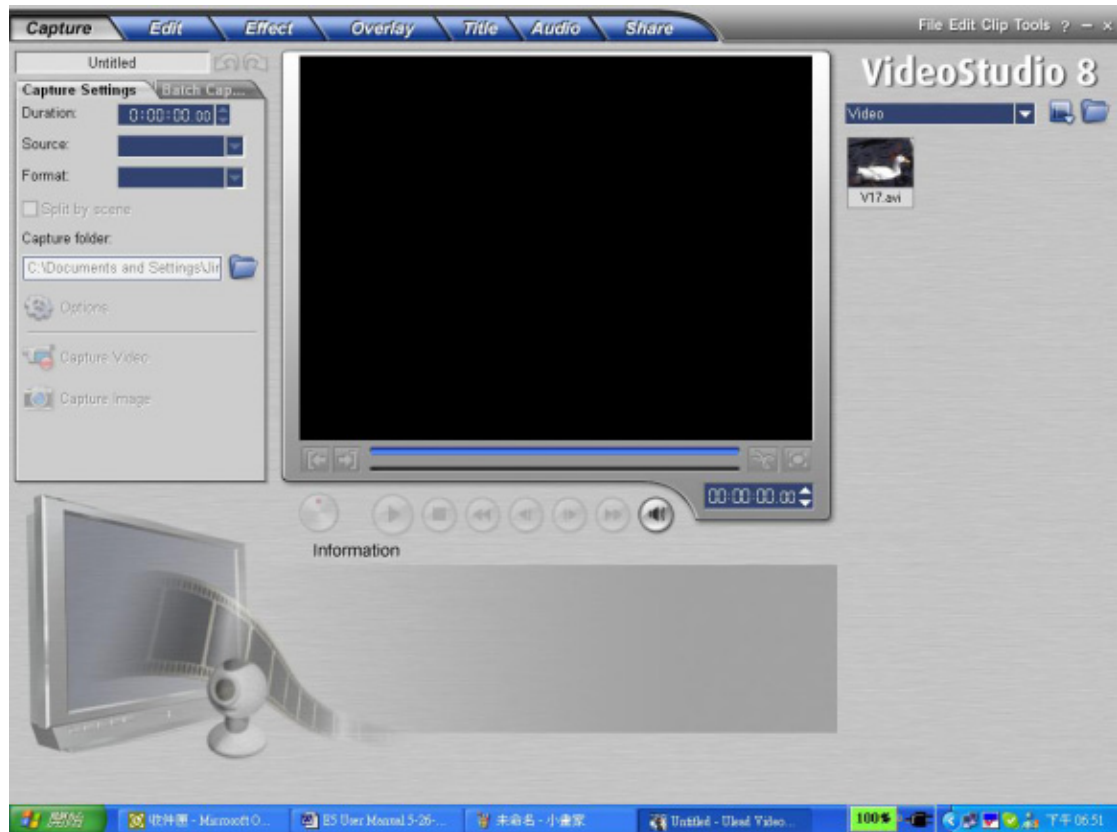

Folder

<u>Capturing Video through Video Studio 8.0</u>
