Safety and maintenance

Read the safety instructions carefully before use. Note the warnings on the appliance and in the operating instructions. Always keep the operating instructions close to hand. If you sell the equipment or give it away, make sure you also hand over these instructions and the guarantee card.

Proper use

This device is designed to output audio signals via a 2.5 mm or 3.5 mm audio output jack. Power is supplied to the device either via the USB power cable or the mains adapter supplied.

Operating safety

- Never open the speaker housing! Parts requiring maintenance are not included.
- This unit is not intended for use by people (including children) with reduced physical, sensory or mental abilities or for those without experience and/or knowledge, unless they are supervised by a person responsible for their safety or they have been instructed on its use. Children should be supervised to ensure they do not play with this unit.
- Keep packaging material out of reach of babies and children. There is a risk of asphyxiation.

REP. IRELAND HELPLINE 1-800-992508
• The loudspeaker is not intended for use in heavy industry companies.

Power supply
• Power is supplied to the device via the USB power cable supplied or via the mains adapter supplied. Position all cables so that they cannot be stepped on or tripped over.
• To disconnect the power supply from your device, press the POWER button to turn off your device.
• Stop using the product if the casing or cable is damaged. Please contact the service centre if this is the case.
• Do not place containers containing liquid, e.g. vases, on the appliance or near to these and protect all parts of the device from rain and water. The container may tip over and the liquid will impair the electrical safety.

Installation location
• In the first few hours of use new appliances can release a typical, unavoidable but totally safe smell, which reduces with time. To help reduce the amount of odour build-up, we recommend that you ventilate the room at regular intervals. We have taken appropriate measures during the development of this product so that levels are explicitly below legislative limits.
• Do not place any objects on the cable, because it could be damaged in this case.

• Keep the product and any units connected to it away from moisture. Avoid dust, heat and direct sunshine to prevent breakdowns.

• Place and operate all the components on a stable, level and vibration-free surface in order to prevent the loudspeaker from falling down.

• Maintain a minimum distance of approx. 5cm between the unit and any walls. Ensure that ventilation is adequate.

• Modern furniture is coated with a wide range of varnishes and plastics, and treated with very different care products. Therefore, it is not possible to entirely exclude the possibility that some of these substances contain components that could corrode and soften the device’s rubber feet. Place a non-skid mat underneath the device as necessary.

• Do not place any naked flames (e.g. candles) on the product.

• Only use the product in residential rooms or similar rooms.

**Electromagnetic compatibility**

• Keep a distance of at least one metre from high frequencies and magnetic sources of interference (television, other loudspeaker boxes, mobile or cordless telephones etc.) to avoid malfunctions.
• Do not use any accessories other than those supplied.

**Information about conformity**

Your device fulfils the requirements for electromagnetic compatibility and electrical safety.

Your device complies with the basic requirements and the relevant guidelines of the 2004/108/EU EMC Guidelines [electromagnetic compatibility] and the 2006/95/EU Guideline for low voltage devices.

This device fulfils the basis requirements and the relevant regulation of the Ecodesign Guideline 2009/125/EC.

**Repairs**

Please contact our service centre if you have technical problems with your device. Repairs should only be performed by our authorised service partners.

Contact customer services if:

• Liquid has seeped inside the unit.
• The loudspeaker is not working properly.
• The appliance has been dropped or the housing is damaged.

**Cleaning**

• Wipe the loudspeaker down with a slightly moistened cloth. To clean, do not use solvents, corrosive or aerosol detergents.
Disposal

Appliance

At the end of its life, the appliance should not be disposed of in household rubbish. Enquire about the options for environmentally friendly disposal.

Packaging

Your appliance has been packaged to protect it against transportation damage. The packaging is made of environmentally friendly material which can be recycled.
Included the box

Please check your purchase to ensure all items are included and contact us within 14 days of purchase if the delivery is incomplete: With the loudspeakers that you have purchased you receive:

- 2 loudspeaker
- USB power cable
- Mains adapter
- 3.5 mm stereo cable
- 3.5mm stereo jack to 2.5mm stereo plug adapter
- Operating instructions
- Warranty documentation

Technical specifications

- Connection 3.5 mm stereo line in jack
- Performance 2 x 0.8 watts (RMS) via USB
- Power supply via USB cable 5 V
  via mains adapter SEF0550180G1BA
- Mains adapter Model: SEF0550180G1BA
  Input: 100-240V~, 50/60Hz, 0.3A
  Output: 5.5V 1.8A

Description of the device

Connections & control elements

- Loudspeaker
- Connection cable for the loudspeaker
- Volume control, VOL-/+
- POWER key
- USB power cable
- 3.5 mm stereo cable
Operation

Connect to an audio signal

Connect the 3.5 mm stereo audio output jack of your audio output device using the 3.5 mm cable to the input AUDIO IN on the left loudspeaker. Using the adapter for a 3.5mm stereo jack to a 2.5mm stereo plug, you have the ability to connect the 3.5 mm plug cable to devices with a 2.5 mm stereo audio output jack.

Establishing a power supply via the PC

1. Switch on the computer and all peripheral devices.
2. Insert the DC plug of the USB power cable into the DC IN connection socket on the rear of the loudspeaker that has the connection sockets.
3. Insert the USB plug into a free USB port on your computer.
4. Press the POWER button on the loudspeaker to turn on the loudspeaker. The edge of the loudspeaker will light up blue.
Establishing a power supply using the mains adapter

1. Switch on the computer and all peripheral devices.
2. Insert the DC plug of the USB power cable into the DC IN connection socket on the rear of the loudspeaker that has the connection sockets.
3. Insert the USB plug into the USB socket on the mains adapter.
4. Press the POWER button on the loudspeaker to turn on the loudspeaker. The edge of the loudspeaker will light up blue.

Setting volume

- Turn the volume control on the loudspeaker to adjust the volume to the level required. Turning to the right “+” increases the volume; turning to the left “-” decreases the volume.
Customer service

What to do in case of malfunctions

- Start by carefully checking all the cable connections. If the display lights are not working, check to make sure that the loudspeaker is connected to an adequate power source.

No sound/distorted or poor quality sound

- Adjust the volume control until you find a comfortable level.
- Check the power supply.

Do you need more help?

If the suggestions in the previous section did not rectify your problem please contact us. The following information would help us:

- Which operating system do you use?
- What signs/messages can you see?
- What steps have you already taken to try and rectify the problem?
- Please provide your customer number if you have one.
