WARRANTY CARD

Congratulations! You have made an excellent choice with the purchase of this quality product. Our commitment to quality also includes our service. Should you, contrary to expectations, experience defects due to manufacturing faults during private use within 36 months of the date of purchase we shall be liable for warranty in accordance with statutory warranty regulations provided that:

- The device was not put to use other than the intended
- was not overloaded
- was not used in an incorrect manner
- was not built by any other than the intended workshop

The warranty certificate is only valid in connection with an acceptable proof of purchase. Please keep both in a safe place. This warranty does not affect your statutory rights.

This purchase is guaranteed for a period of three years beginning on the day of purchase. Keep your purchase receipt as proof of date of purchase. The guarantee can only be extended for the duration of any repair required.

During the warranty period defective devices can be returned to the service address stated on the back cover of this document by first calling the service hotline number provided to arrange collection by an approved freight agent at no cost to you. We will at our discretion, either repair or exchange the device in accordance with warranty legislation.

Please enclosure the following when sending your product in for repair:

1. Proof of purchase (receipt)
2. This warranty certificate with the fault report from sorted complete with your name, contact details and fault description

If an acceptable proof of purchase is not enclosed the repair will be charged in all cases. After the warranty has expired defective devices can still be sent to the address stated below. Any repairs outside of the warranty period will be charged and can only be undertaken once payment has been received.

Ensure that the product is sent well packed as no responsibility can be accepted for items lost or damaged in transit.

This warranty does not affect your statutory rights.

3 YEAR WARRANTY

Wireless Door Chime

User’s Guide

Now you have purchased a Home Protector product you can rest assured in the knowledge that as well as your 3 years part and labour warranty you have the added peace of mind of dedicated helplines and web support.

Introduction

Congratulations on choosing to buy a Home Protector® product. By doing so you now have the assurance and peace of mind that comes with purchasing a product made by one of Europe’s leading manufacturers.

All products brought to you by Home Protector® are manufactured to the highest standards of performance and safety, and, as part of our philosophy of customer service and satisfaction, are backed by our comprehensive 3 Year Warranty. Please fill in and return the Warranty Card to the address provided.

We hope you will enjoy using your purchase for many years to come.
General Information

- Please read these instructions carefully before using the system and note the warnings in the operating instructions.
- If you sell the appliance or give it away, please ensure that you also pass on these instructions.

Safety Instructions

Dangers for children and people with reduced abilities to operate devices

This product is not intended for use by people (including children) with reduced physical, sensory or mental abilities or for those without experience and/or knowledge, unless they are supervised by a person responsible for their safety or they have been instructed on its use.

Children should be supervised to ensure they do not play with this device. Children should not be allowed to use this device without supervision.

Keep the appliance and its accessories out of reach of children.

DANGER!
Keep the plastic wrapping out of the reach of children. There is a risk of suffocation.
Proper use

Your wireless doorbell is intended to send an acoustic and/or optical signal to the receiver when the doorbell button is activated. Do not attempt to modify the device and do not use it for other purposes.

Repairs

Never try to open and/or repair the appliances yourself. Contact our Service Centre or other suitable specialist workshop to avoid possible risks.

Environmental requirements

Transmitter

The transmitter has a water resistant housing. In optimum conditions, the transmitter has a range of 100 m. This can be reduced by structural conditions. Sources of interference for the transmitter can include: mounting on metallic objects, reinforced concrete, high-frequency interference of any kind, devices operating on neighbouring frequencies, poorly screened computers.
**Receiver**

Protect the wireless doorbell’s receiver from moisture and heat. Avoid placing or mounting the receiver in poorly ventilated areas (such as between shelves or where curtains or furniture can block the vents). Do not allow foreign bodies or liquids to get into the device. Do not expose it to dripping water or spray. Do not place objects that are filled with water, such as vases, on the device. Naked flames such as lit candles must not be placed on the device.

**Battery information**

You will need batteries to operate the wireless doorbell. Please note the following advice:

- Keep batteries away from children.
- Contact your doctor immediately if a battery is swallowed.
- Never charge non-rechargeable batteries. Risk of explosion!
- Never create a short-circuit between the batteries and the connection terminals of the device.
- Never expose the batteries to excessive heat such as sunlight, fire or similar.
- Do not dismantle or deform the batteries.
• You could injure your hands or fingers or battery fluid could come into contact with your eyes or skin. If this should happen, then rinse the affected areas immediately with a large amount of clean water and contact your doctor immediately.
• Avoid heavy impacts and vibrations.
• If necessary, clean the contacts on the battery and appliance before insertion.
• Always observe the correct polarity.
• Make sure that the plus (+) and minus (−) poles are correctly inserted to avoid short circuits.
• Do not mix up new and old batteries or different types of battery. This could cause your appliance to malfunction. In addition, the weaker batteries would discharge too much.
• Remove spent batteries from the appliance immediately.
• Remove the batteries from the device if you do not intend to use it for a long period of time.
• Replace all the old batteries in an appliance with new batteries of the same type.
• Cover the contacts of the batteries with sticky tape if you want to store or dispose of them.
Assembly and Parts List

When unpacking, ensure that the following parts are included:

- Transmitter
- 1 x 12 V battery for the transmitter
- Receiver
- 2 x AA batteries for the receiver
- Fittings
- These operating instructions and guarantee documents

Please contact us within 14 days if anything is missing from the package contents.
Inserting batteries

Transmitter

The transmitter requires one 12 V battery, size 23A

- Remove the battery compartment cover.
- Insert the battery. Observe correct polarity! The negative pole should be on the spring.

Do not replace the battery compartment cover just yet (see “Synchronisation”, page 12, and “Mounting the back plate”, page 15).
Receiver
The receiver requires two 1.5 V batteries, size AA (L6/LR6).

- Remove the battery compartment cover.
- Insert the batteries. Observe correct polarity! The negative poles should each be on the spring.

- Replace the battery compartment cover.
Synchronisation

After inserting new batteries or replacing spent batteries, the transmitter and receiver must be synchronised.

1. Press the transmitter button on the receiver. The receiver’s LED lights up red.
2. Then press the reset button inside the battery compartment of the transmitter.

3. The LED on the receiver will then flash a few times. The transmitter and the receiver are now synchronised.
Ringer tone and volume

You can set the ringer tone and volume on the receiver and change these settings at any time.

- Press the ringer tone button repeatedly to select between any one of 16 ringer tones/melodies.
- Set the volume using the volume control VOL.
  1 = low; 3 = high

- Use the signal selector to choose the type of signal:

<table>
<thead>
<tr>
<th>Signal Selector</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ringer tone only</td>
<td></td>
</tr>
<tr>
<td>Flashing red LED only</td>
<td></td>
</tr>
<tr>
<td>Ringer tone and flashing red LED</td>
<td></td>
</tr>
</tbody>
</table>

Signals when ringing

When the ringer button is pressed, the LED on the transmitter lights up briefly.
Depending on the settings made with the signal selector, the red LED on the receiver flashes six times and/or a ringer tone or melody is played.
Setting up the receiver

- If you prefer a free-standing set-up for the receiver, pull out the footplate on the underside of the device.

Mounting the receiver

You can use the hanger eye on the rear side of the device to mount the receiver on a wall.

- Drill a hole suitable for a 6 mm wall plug.
- Insert a wall plug.
- Screw in one of the large screws but leave the head projecting out.

You can now hang the receiver on the screw head.
**Mounting the transmitter**

Find a suitable place by the door for mounting the doorbell.

**PLEASE NOTE!**
Before mounting the transmitter, test to see whether the transmitter signal can be picked up by the receiver. Do not mount the transmitter on a metal surface (see the notes on page 6).

**Mounting the back plate.**

- Remove the battery compartment cover (back plate) from the transmitter. This cover will be attached to the wall as a back plate.
- Mark the two drill holes on the wall.
- Drill two holes suitable for 6 mm wall plugs.
- Insert the wall plugs.
- Screw on the back plate using two of the large screws. Ensure that the two tabs are on the left.
- Mount the transmitter onto the back plate.
- Screw the back plate to the transmitter using the supplied small screws.

Name plate
- Label one of the supplied name plates. If you decide to label the name plate by hand, we recommend using a pen with waterproof ink.
- Remove the plastic film from the name plate panel, insert your name plate and replace the film.
Cleaning

Clean the receiver with a dry, soft cloth.
Use a soft, moist cloth with a little detergent to clean the transmitter.
Avoid the use of chemical solutions and cleaning products because these may damage the devices' surface or markings.
Disposal

Packaging
All packaging and packaging materials that are no longer required can and should be recycled.

Device
Under no circumstances, should any component of the wireless doorbell be disposed of in the normal household rubbish. Seek the advice of your local authority on environmentally friendly disposal facilities.

Batteries
Do not dispose of used batteries in household rubbish. Batteries should be deposited at a collection point for used batteries.
