General information

Reading and safekeeping of operating instructions

These operating instructions are for the wine cooler MD 16703. They contain important information about set-up and operation. Read the operating instructions carefully, in particular the safety instructions, before you use the wine cooler. Non-compliance with these operating instructions can lead to serious injury or damage to the wine cooler. Please retain these operating instructions for future reference. If you pass on the wine cooler to a third party, please also pass on these operating instructions.

Explanation of symbols

The following symbols and signal words are used in these instructions, on the wine cooler or on the packaging.

⚠️ **DANGER!**

This signal word indicates a hazard with a high degree of risk which, if not avoided, will result in death or serious injury.

⚠️ **WARNING!**

This signal word indicates a hazard with a medium level of risk which, if not avoided, could lead to death or serious injury.

⚠️ **CAUTION!**

This signal word indicates a hazard with a low level of risk which, if not avoided, could result in a minor or moderate injury.

⚠️ **NOTICE!**

This signal word warns of possible damage to property.

⚠️ **Warning of risk of electric shock.**
Warning: risk of explosion.

This symbol gives you useful additional information on assembly or operation.

Conformity marking (cf. section „Konformitätsinformation“): products bearing this symbol meet all the regulations and standards applicable in the European Economic Area.

**Intended use**

The appliance is designed for cooling drinks in closed containers. However, the appliance is not suitable for cooling foodstuffs because it cannot achieve the required temperatures.

The appliance is designed for operation in an ambient temperature of between +16°C and +32°C (living area temperature) (climate class N) and is only suitable for operation indoors.

This appliance is intended to be used in private households and similar household applications, such as:

- in kitchens for employees in shops, offices and other commercial areas;
- on agricultural estates;
- by customers in hotels, motels and other residential facilities;
- in bed & breakfast accommodation.

When used in commercial areas, the valid regulations must be observed.

Please note that we shall not be liable in cases of improper use:

- Do not modify the appliance without our consent and do not use any auxiliary equipment that we have not approved or supplied.
- Use only spare parts and accessories that we have supplied or approved.
- Heed all the information in these operating instructions, especially the safety information. Any other use is deemed improper and can cause personal injury or property damage.
- Do not use the appliance in extreme environmental conditions.

**Safety information**

⚠️ **WARNING!**

**Risk of injury for children or persons with limited physical, sensory or mental capabilities (for example partially disabled people or older persons with limited physical and mental capabilities) or no knowledge and experience (older children, for example).**

- Keep the appliance and its accessories out of the reach of children.
- This appliance may be used by children over the age of 8 and by persons with reduced physical, sensory or mental abilities or by those without experience and/or knowledge, if they are supervised or have been instructed in the safe use of the appliance and have understood the dangers that result from it. Children must not be allowed to play with the appliance. Cleaning and user maintenance must not be carried out by children, unless they are aged 8 or over and are supervised.
- Children younger than 8 should be kept away from the appliance and the mains cable.

⚠️ **WARNING!**

**Risk of suffocation.**

There is a risk of suffocation if plastic packaging or small parts are inhaled or swallowed.
Safety information

− Do not store any of the packaging material used (bags, polystyrene, etc.) within the reach of children.

General safety instructions

− Do not operate the appliance if it has been visibly damaged or the mains cable or plug is defective.

⚠️ WARNING!

Risk of explosion!

⚠️ There is a RISK OF EXPLOSION AND FIRE due to the resulting fumes!

− Do not store or use any petrol or other flammable materials or liquids in the appliance or near to the appliance.

⚠️ CAUTION!

Risk of injury!

Burns caused by low temperatures are possible.

− Do not touch the cold inner walls of the refrigerator compartment with your hands.

Setting up the appliance

− Only connect the appliance to a properly installed 220–240 V~50 Hz safety socket that is easy to reach and close to the set-up location. The safety socket must be freely accessible so that you can unplug the appliance from the mains quickly if necessary.

− Do not use an extension cable.

− Ensure the mains cable is out of harm’s way and will not trip people up. Do not allow the mains cable to become trapped or squashed.

− To ensure adequate ventilation, maintain a minimum distance of 10 cm to the ceiling and rear wall and 5 cm to the walls, otherwise internal electronics could be damaged.
- Set up the appliance in a dry and ventilated room. Do not expose the appliance to direct sunlight because this can damage the surfaces of the appliance and increase energy consumption.
- Protect the appliance from moisture and splashes.
- Never immerse the appliance in water.
- Do not set up the appliance near to heat sources such as ovens, radiators, underfloor heating, etc.
- Set up the appliance on a stable, flat surface.
- The appliance should be level; compensate for any unevenness in the floor by unscrewing and adjusting the extendible feet.
- Do not place any other household appliances (such as a microwave, food processor, etc.) on top of the wine cooler.
- Do not use any electrical devices inside the appliance.

Cleaning and maintenance

⚠️ WARNING!

Risk of electric shock!
There is a risk of electric shock due to live parts.

- Before starting any maintenance work, always ensure that the plug has been removed from the safety socket (do not pull on the cable, but on the plug). If the plug is not accessible, the corresponding fuse for the mains electricity supply to the house needs to be switched off.
- Never pull out the plug with wet or moist hands.

⚠️ WARNING!

Risk of explosion!
There is a RISK OF EXPLOSION AND FIRE due to the resulting fumes!
Safety information

- Do not use any flammable liquids to clean the appliance or any parts of the appliance.

Faults

⚠️ **WARNING!**

Risk of electric shock!
There is a risk of electric shock due to live parts.

- Never try to open and/or repair an appliance component yourself. There is a risk of electric shock.
- To prevent risks, damaged mains cables may only be replaced by a qualified specialist workshop or by our technical customer service.
- In the event of a fault, contact our Service Centre or another suitable specialist workshop.

Disposal

⚠️ **WARNING!**

Risk of injury!
There is a risk of suffocation if the door slams shut.
- Remove the door before disposing of the appliance and leave the storage shelves for the bottles in the appliance to prevent children climbing into it.
- Before disposal cut off the mains cable.
Package contents

⚠️ WARNING!

Risk of suffocation.
There is a risk of suffocation if plastic packaging or small parts are inhaled or swallowed.
- Do not store any of the packaging material used (bags, polystyrene, etc.) within the reach of children.

When unpacking, ensure that the following parts are included:
- Wine cooler
- Operating instructions
- Warranty documentation

Preparing to operate the appliance
- Before using the appliance for the first time, completely remove any packaging from the appliance and the inside of the appliance.
- Compensate for any possible unevenness in the floor by unscrewing or screwing in the extendible feet.
- Clean the inside of the appliance with warm water and a soft cloth.
- Make sure that the storage shelves for the bottles are correctly inserted into the guide tracks. If necessary, insert the shelves again correctly.

Operating the appliance
- Connect the appliance to a properly installed 220-240 V~50 Hz safety socket.
The appliance will beep and the display will show the current temperature inside the appliance. The appliance will now start to cool the interior.
- Place bottles onto the storage shelves as evenly as possible.

The temperature at the bottom storage shelf is a little cooler than at the top storage shelf. Therefore, place those bottles that need to be cooled to a greater degree on the lowest storage shelf.
A signal tone is emitted every time a button is pressed.
Cleaning

Temperature control

- Set the desired temperature (it is possible to set the temperature to between 7 °C and 18 °C).
- Press \[ \text{14} \] to increase the temperature and \[ \text{15} \] to decrease the temperature.

The set temperature will flash briefly on the display and then the current temperature inside the appliance will be shown.

Lighting

- Press \[ \text{16} \] to switch the interior lighting \[ \text{12} \] on or off.

Leaving the light switched on for a long time will increase the temperature inside the appliance. Switch the light off immediately when it is no longer required.

Cleaning

WARNING!

Risk of electric shock.
There is a risk of electric shock from electrified parts.

- Before cleaning the appliance, always ensure that the plug has been removed from the safety socket (do not pull on the cable, but on the plug).

1. Remove all bottles and storage shelves \[ \text{10} \] from the inside of the appliance.
2. Clean the surfaces of the appliance and the storage shelves for the bottles, with the exception of the door seal \[ \text{6} \], with a mild detergent and a soft cloth.
3. Wipe down the door seal with clean water and allow it to dry. Abrasive or acidic cleaning agents are unsuitable for cleaning the appliance.
4. Clean the inside of the appliance with warm water and bicarbonate of soda. We recommend using 2 tablespoons of bicarbonate of soda to one litre of water.
5. Wipe out the collection tray at the bottom of the appliance and clean it with water and a mild detergent.
**Transport**

1. Unplug the appliance from the safety socket.
2. Remove all bottles and storage shelves from the inside of the appliance.
3. Screw in the adjustable feet [9].
4. Tape the door in place using adhesive tape.
5. Ensure that the appliance is transported in an upright position to avoid any damage to the cooling system.

**Troubleshooting**

Faults may occur during operation. Please use the following table to check whether you can resolve the problem yourself. All other repairs are prohibited and will invalidate the warranty cover. In the event of a fault, contact our Service Centre or another suitable professional repair workshop.

---

### End of operation

If you do not intend to use the appliance for a long period of time, it is necessary to perform the following tasks:

1. Unplug the appliance from the safety socket.
2. Empty the appliance.
3. Wipe out the cooling area and allow it to dry.
4. Carefully wash all appliance fittings (storage shelves for the bottles).
5. Leave the door open to avoid unpleasant odours and mould formation.
Disposal

Appliance
Old devices should not be disposed of with the normal household rubbish. In accordance with Directive 2012/19/EU, the appliance must be properly disposed of at the end of its service life. This involves separating the materials in the appliance for the purpose of recycling and minimising the environmental impact. Take old appliances to a collection point for electrical scrap or a recycling centre. Contact your local waste disposal company or your local authority for more information on this subject.
- Before disposal cut off the cable.
- Remove the door before disposing of the appliance and leave the storage shelves for the bottles in the appliance.

Disposal of packaging
Sort packaging before disposal. Dispose of card and cardboard with waste paper and dispose of film with recyclable materials.
Technical data

Power supply: 220 – 240 V ~ 50 Hz
Power consumption: 70 W
Capacity of the cooling area: 21 litres
Energy efficiency class: A+
Protection class: I
Climate class: N
Energy consumption: 0.254 kWh/24 hrs = 93 kWh/1 year
LED lamp: 1 W
Noise emissions: 38 dB
Net weight: 8.72 kg
Dimensions (WxDxH in mm): 254 x 515 x 465
Blowing agent (insulating foam): cyclopentane

Declaration of conformity

Medion AG hereby declares that the product MD 16703 conforms to the following European requirements:

- EMC Directive 2014/30/EU
- Low Voltage Directive 2014/35/EU
- Ecodesign Directive 2009/125/EU
- RoHS Directive 2011/65/EU

Full declarations of conformity are available at www.medion.com/conformity.
