About these operating instructions

Thank you for choosing our product. We hope you enjoy using it.

Read the safety instructions carefully before using the device for the first time. Note the warnings on the device and in the operating instructions. Always keep the operating instructions close to hand. If you sell the device or give it away, please ensure that you also pass on these operating instructions. They are an essential component of the product.

Explanation of symbols

If a block of text is marked with one of the warning symbols listed below, the hazard described in that text must be avoided to prevent the potential consequences described there from occurring.

DANGER!

This signal word indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

WARNING!

This signal word indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

CAUTION!

This signal word indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

NOTICE!

This signal word warns of possible damage to property.

This symbol gives you useful additional information on assembly or operation.
Proper use

Warning: danger due to hot surfaces!

Declaration of conformity
Products that feature this symbol meet the requirements of the EC directives (see section ‘EU Declaration of conformity’)

Protective earth symbol (in protection class I)
Electrical appliances in protection class I are electrical appliances that permanently have at least basic insulation and either have an appliance plug with an earthing contact or a fixed connection to the protective earth. Electrical appliances in protection class I can have parts with double or reinforced insulation or parts that are operated with safety extra-low voltage.

Indoor use
Devices with this symbol are only suitable for use indoors.

Proper use
This appliance is intended for grilling food. Do not use the appliance outdoors. This appliance is designed for use in private households and similar household applications, such as
- In kitchens, for staff in retail outlets, offices and other commercial areas
- On agricultural estates
- By customers in hotels, motels and other accommodation facilities
- In bed-and-breakfast establishments

The appliance is not designed for commercial or industrial use. Note that no liability will be accepted if the appliance is not used for its intended purpose:
− Do not modify the appliance without our express agreement and do not use any accessories that have not been supplied or approved by us.

− Only use replacement parts or accessories that we have supplied or approved.

− Comply with all the information in these operating instructions, especially the safety information. Any other use is considered improper and can cause personal injury or property damage.

Safety information

IMPORTANT SAFETY INSTRUCTIONS – READ CAREFULLY AND KEEP FOR FUTURE REFERENCE!

⚠️ WARNING!

Risk of injury!
Risk of injury due to improper use.

− This appliance can be used by children of 8 years and older, and by people with reduced physical, sensory or mental capacity, or with a lack of experience and/or knowledge, but only with proper supervision, or if they have been told how to use the appliance safely, and have understood the risks involved if they use it improperly.

− Children must not be allowed to play with the appliance.

− Do not allow children to clean the appliance or perform maintenance tasks on it unless they are aged 8 years or older and properly supervised.

− Do not allow children younger than 8 years old near the appliance and its power cord.
Safety information

DANGER!

Risk of choking and suffocation!
Risk of choking and suffocation through swallowing or inhaling small parts or plastic wrap.
- Do not store any of the packaging material used (bags, polystyrene, etc.) within the reach of children.
- Do not let children play with the packaging material.

General notes

DANGER!

Risk of electric shock!
There is a risk of electric shock or short circuit due to live parts.
- Only connect the appliance to a properly installed, earthed and fused outlet. The power outlet must be easily accessible so you can unplug the appliance from the mains quickly if necessary.
- Before using the appliance, check that the voltage information on the appliance matches the local supply voltage.
- Switch off the power point and pull out the plug from the earthed mains outlet after each use, before cleaning and during periods when the appliance is left unattended.
- When disconnecting the product from the earthed mains outlet, always pull on the plug rather than on the cable.
- Unwind the mains cable fully when using the appliance.
- Do not kink or crush the mains cable.
- Avoid the use of extension cables in order to prevent tripping.
- Do not allow the mains cable to come into contact with water or other liquids.
- Make sure that the mains cable does not present a trip hazard. Do not allow the mains cable to become trapped or squashed.
− Do not use if the appliance, mains cable or plug is visibly damaged or if the appliance has been dropped.
− If the plug, mains cable or appliance is damaged, immediately remove the plug from the earthed mains outlet.
− If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
− There are dangerous voltages inside the appliance. Never open the housing or slide objects into the ventilation slots.
− To completely disconnect the appliance from the power supply, the mains plug must be removed from the earthed mains outlet.
− Appliances connected to the mains during a thunderstorm may be damaged by power surges. For this reason, always unplug the plug if there is a thunderstorm.
− To prevent risks, only have repairs to the appliance or mains cable carried out by the Service Centre or by a qualified specialist workshop. Improper repair work may result in significant risks to the user.
− Do not place the appliance near to sinks and do not expose it to water droplets or spray.
− If the appliance has been moved from a cold room to a warm room, wait before connecting the mains plug to the power supply. The resulting condensation may damage the appliance. The appliance can be operated safely as soon as it has reached room temperature.
− Do not use the appliance outdoors.
− Unplug the plug from the earthed mains outlet before cleaning the appliance.
− Never immerse the appliance in water or other liquids.
Safety information

**WARNING!**

**Risk of injury!**
There is a risk of injury due to burning on hot surfaces. The touchable surfaces on the appliance may become hot during operation.
- Do not move the appliance while it is in use.
- Allow the appliance to cool completely before replacing or removing the grill plates.
- Always take hold of the appliance by the handle when it is in use. Use oven gloves to do so.
- Steam escapes during grilling. Do not reach into this steam.
- Allow the appliance to cool down completely before cleaning it.

**WARNING!**

**Risk of fire!**
Hot surfaces pose a risk of fire.
- Do not operate this appliance with an external timer or a separate remote control system, such as a remote control mains socket.
- Never leave the appliance unattended when the appliance is in use.
- Do not allow the mains cable to come into contact with hot objects or surfaces (e.g. cooker hob).
- Never place the appliance on the edge of a table – it could tip over and fall.
- Ensure that the appliance does not come into contact with any other objects during operation. Allow sufficient clearance in all directions and above. Above all, do not set up the appliance near easily flammable materials (curtains, drapes, paper, etc.). There is a risk of fire.
- Do not cover the appliance.
- Place the appliance on a heat-resistant, dry and level surface.
- Do not place the appliance on surfaces that can become hot (e.g. on hotplates).
- Do not place any objects on the appliance.

**NOTICE!**

**Possible material damage!**
There is a risk of damage to the appliance if it is used improperly. Sensitive surfaces on the grill plates.
- Avoid the use of sharp objects to prevent scratches. Use wood or heatproof plastic utensils to remove the grilled foods.
- Do not use metal objects to clean the grill plates, only a soft, slightly damp cloth. Observe the notes in section “Cleaning” on page 16.
- Operate the appliance indoors only.
- Do not expose the appliance to extreme conditions. Avoid:
  - High humidity or wet conditions
  - Extremely high or low temperatures
  - Direct sunlight
  - Open flames

Chemical additives in furniture coatings may corrode the material of the appliance feet and cause residue on the furniture surface.
- Place the appliance on a heat-resistant mat if necessary.
Package contents

DANGER!

Risk of suffocation!

Packaging film can be swallowed or used improperly. Therefore, there is a risk of suffocation!

- Keep packaging material such as plastic film or plastic bags away from children.
- Remove the product from the packaging and remove all packaging material.
- Please check your purchase to ensure that all items are included. If anything is missing, please contact us within 14 days of purchase.

The product you have purchased includes:

- 2-in-1 contact grill
- Grease drip tray
- Spatula
- Operating instructions
Before using the appliance for the first time

- Place the appliance on a level, dry and heat-resistance work surface at a comfortable working height.
- Clean the grill plates with a soft, slightly damp cloth before using the appliance for the first time and after every subsequent use. Dry the grill plates completely.

Using the contact grill

**WARNING!**

**Risk of burning!**
The touchable surfaces on the appliance are hot when the appliance is in use.
- Always take hold of the appliance by the handle or temperature control when it is in use. There is a risk of burns!

During this initial heating period you may notice faint odours. This does not mean that the appliance is malfunctioning. Lightly grease the grill plates, close the lid and allow the appliance to heat up for approx. 10 minutes without food. Please ensure adequate ventilation, e.g. by opening a window.

- Prepare the food according to the recipe.
- Push the grease drip tray into the recess underneath the contact grill.
- Close the lid and insert the mains plug into an earthed mains outlet.

The red operating light indicates that the appliance is in use.
- Set the temperature control to the desired temperature (**MAX** 180 °C).

The green operating light indicates the heating operation.

As soon as the green operating light goes out, the grill plates are fully heated and the contact grill can be used.
Grilling food

**CAUTION!**

**Risk of burning!**
Hot steam or splashes of fat will escape when you open the lid.  
- To avoid burns, do not reach into the steam.  
- Only touch the grilled food using appropriate utensils, e.g. tongs.

**NOTICE!**

**Possible material damage!**
There is a risk of damage to the appliance if it is used improperly. Sensitive surfaces on the grill plates.  
- Do not use sharp objects or utensils made of metal that could damage the non-stick coating on the grill plates.

The contact grill can be used to prepare various foods such as meat, fish and much more. The preparation time depends on the thickness and nature of the food.  
- Close the lid and insert the mains plug into an earthed mains outlet.  
- The red operating light and the green control light begin to light up.  
- As soon as the heating process is complete and the green control light is no longer lit up, press the lid lock down and lift the lid up.  
- Place the prepared food on the lower grill plate.  
- Close the lid again and press this slightly down using the handle so that you can close the lid lock.  
- Check the food on the grill after about 2 to 4 minutes, to avoid burning the food.  
- If necessary, adjust the temperature of the grill to ensure that food is grilled to perfection.  
- If the grilled food is not yet cooked through, close the lid again.  
- If the grilled food is ready, remove it from the grill using a heat-resistant wooden or plastic utensil.
No oil or fat is required when grilling since the grill plates feature a non-stick coating. If you would like to use a little fat/oil anyway, take care to ensure that this is suitable for frying.

**Switching the appliance off**
- Switch off the appliance after each use by turning the temperature control completely to the left and removing the mains plug from the earthed mains outlet.
- Allow the appliance to cool with the grill plates open and clean it.

**Storing the appliance**
- Clean the appliance as shown in section “Cleaning” on page 16 and allow it to dry completely.
- Close the grill plates.
- Store the appliance in a dry location. Avoid extreme environmental conditions.

**Faults and remedies**

<table>
<thead>
<tr>
<th>Fault</th>
<th>Remedy</th>
</tr>
</thead>
<tbody>
<tr>
<td>No function</td>
<td>Is the mains plug in the earthed mains outlet?</td>
</tr>
<tr>
<td>The food is too light/not cooked.</td>
<td>Do the control lights for the grill plates indicate the grill temperature reached? Leave to cook for longer.</td>
</tr>
<tr>
<td>The food is too dark.</td>
<td>Reduce the grill time.</td>
</tr>
<tr>
<td>Food sticks to the grill plates.</td>
<td>Grease the grill plates, if necessary, using a brush and a little cooking oil.</td>

</tbody>
</table>
Cleaning

- Clean the appliance after each use and remove all food residues. Please note the following:

![DANGER!]

**Risk of electric shock!**
There is a risk of electric shock due to live parts.
- Unplug the plug from the earthed mains outlet before cleaning the appliance.
- Never immerse the appliance in water or other liquids.

![WARNING!]

**Risk of burning!**
The grill plates are extremely hot.
- Allow the appliance to cool down completely before cleaning it.

![NOTICE!]

**Possible material damage!**
There is a risk of damage to the appliance if it is cleaned improperly. Sensitive surfaces on the grill plates.
- Do not use any abrasive or harsh cleaning solutions on the non-stick grill plates or the appliance housing.
- Use the supplied spatula to clean the grill, once the appliance has cooled completely.
- Empty the oil from the grease drip tray into the household waste. Rinse the grease drip tray with water and a mild washing-up liquid.
- Dry the grill plates carefully using a soft cloth.
Disposal

PACKAGING

The product has been packaged to protect it from damage in transit. The packaging is made of materials that can be recycled in an environmentally friendly manner.

DEVICE

Old devices may not be disposed of with normal household waste. If you can no longer use your electrical device, dispose of it in accordance with the legal provisions applicable in your area. This involves separating the materials in the device for the purpose of recycling and minimising the environmental impact.

Take old devices to a collection point for electrical scrap or a recycling centre. Contact your local waste disposal company or your local authority for more information on this subject.

Technical data

Power supply: 220–240 V 50/60 Hz
Output: 1500 W
Protection class: I
Temperature setting: max. 180 °C (when the appliance is closed)
Grill surface: approx. 25 x 15.5 cm
Dimensions approx. 29.2 x 24.5 x 11.4 cm
EU Declaration of conformity

The manufacturer hereby declares that this product conforms with the essential requirements and the remaining relevant regulations:

- EMC Directive 2014/30/EU
- Low Voltage Directive 2014/35/EU
- Ecodesign Directive 2009/125/EC
- RoHS Directive 2011/65/EU.

Service information

Please contact our Customer Service team if your appliance ever stops working the way you want or expect it to. There are several ways for you to contact us:

- In our Service Community, you can meet other users, as well as our staff, and you can exchange your experiences and pass on your knowledge there. You will find our Service Community at http://community.medion.com.
- Alternatively, use our contact form at www.medion.com/contact.
- You can also contact our Service team via our hotline or by post.
