About these operating instructions

Thank you for choosing our product. We hope you enjoy using this device.

Read the safety instructions carefully before using the device for the first time. Note the warnings on the device and in the operating instructions.

Always keep the operating instructions close to hand. If you sell the device or give it away, please ensure that you also pass on these operating instructions. They are an essential component of the product.

Key to symbols

If a block of text is marked with one of the warning symbols listed below, the hazard described in that text must be avoided to prevent the potential consequences described there from occurring.

**DANGER!**

This keyword denotes a high-risk hazard situation which results in death or serious injury if it is not avoided.

**WARNING!**

This keyword denotes a medium-risk hazard situation which can result in death or a serious injury if it is not avoided.
About these operating instructions

**CAUTION!**

This keyword denotes a low-risk hazard situation which can result in moderate or minor injuries if it is not avoided.

**NOTICE!**

This keyword serves as a warning for possible damage to property.

This symbol provides useful additional information for assembling or operating the device.

**CE labelling**

Products that feature this symbol meet the requirements of the EU directives (see chapter entitled “Declaration of conformity”)

Comply with the notes in the operating instructions.

**Polarity markings**

In the case of devices with coaxial power connectors, these symbols indicate the polarity of the connector. There are two types of polarity: either positive inside and negative outside (Fig. A), or negative inside and positive outside (Fig. B).

- Symbol for direct current
- Symbol for AC current
About these operating instructions

Indoor use
Devices with this symbol are intended solely for indoor use.

Switched-mode power supply (electrical)
A switched-mode power supply converts an unstable input voltage to a constant output voltage.

Energy efficiency level VI
Energy efficiency levels are used to describe the efficiency levels of internal and external power supply units. Energy efficiency is sub-divided into a number of categories, where Level VI is the most efficient.

Transformer – short circuit proof
Transformer in which the temperature does not exceed specified limits if the transformer is overloaded or short-circuited, and which continues to meet all the requirements contained in the relevant standard once the overload or short circuit has been rectified.

Protection class III
Electrical appliances in protection class III are electrical appliances built for operation with safety extra-low voltage that have neither internal nor external electricity circuits which work with a different voltage other than safety extra-low voltage. The maximum rated voltage for the safety extra-low voltage between the conductors and between the conductors and the earth is 42 V.
In the case of three-phase alternating current, the maximum rated voltage between the conductors and the neutral conductor is 24 V. The maximum off-load voltage must not exceed 50 V. The safety extra-low voltage may only be supplied via a safety transformer or a transformer with separate windings.

Dispose of the device in compliance with environmental regulations (see “Disposal” on page 28)

**IP20** Protection class IP20 means:

- Protection against solid foreign objects with a diameter of more than 12.5 mm
- Protection against access by fingers
- No protection against water penetration
Proper use
The device is intended to humidify the ambient air and diffuse commercial essential oils dissolved in water into the living area.

• The device is only intended for private use and not for industrial/commercial use.

Note that no liability will be accepted if the device is not used for its intended purpose:

• Do not modify the device without our express agreement and do not use any accessories that have not been supplied or approved by us.

• Only use replacement parts or accessories that we have supplied or approved.

• Comply with all the information in these operating instructions, especially the safety information. Any other use is considered improper and can cause personal injury or property damage.
Safety information

**WARNING!**

Risk of injury!

Risk of injury to persons with limited physical, sensory or mental abilities (for example, partially disabled people or older people with limited physical or mental abilities) or to those without experience and knowledge (such as older children).

− Keep the device and its accessories out of the reach of children.

− This device may be used by children over the age of 8 and by persons with reduced physical, sensory or mental abilities or by those without experience and/or knowledge, if they are supervised or have been instructed in the safe use of the device and have understood the dangers that result from it.

− Children must not be allowed to play with the device.

− Cleaning and user maintenance must not be carried out by children.
− Children younger than 8 should be kept away from the device and the mains cord.
− Do not store any of the packaging material used (bags, polystyrene, etc.) within the reach of children.
− Do not allow children to play with the packaging material.

**WARNING!**

**Risk of electric shock/short circuit!**
There is a risk of electric shock/short circuit due to live parts.
− Only use this device and accompanying AC/DC adapter (model DQS126V-240050-18B29, DongGuan Citiland Electronics CO., LTD) with each other.
− Only connect the device to a properly installed, earthed and easily accessible socket that is close to the place where you have set up the device. The local mains voltage must correspond to the technical specifications for the device.
Safety information

- The mains socket must be easily accessible so you can unplug the device from the mains quickly if necessary.
- Switch off the power point and pull out the plug after each use, before cleaning and during periods when the device is left unattended.
- Always hold the plug to pull it out, never pull on the mains cable.
- Do not allow the mains cable to come into contact with hot objects or surfaces (e.g. cooker hob).
- Do not kink or crush the mains cable.

The device must not be submerged in water or other liquids, nor exposed to running water or used in damp rooms, as this may result in an electric shock and/or short circuit.

- Unplug the device from the socket if:
  - you are filling the water reservoir,
  - you are cleaning the device,
  - the device is damp or wet,
  - the device is unattended,
  - you are no longer using the device.
- Do not let the device come into contact with water or other liquids. Keep the device, the mains cable and the mains plug away from wash basins, sinks or similar.

- Do not place any objects filled with liquid (e.g. vases or drinks) on or near the device.

- Never touch the device or the mains cable with wet hands.

- Operate the device indoors only.

- Do not use if the device or the mains cable is visibly damaged or if the device has been dropped. If the mains cable is damaged, it must be replaced by a qualified electrician.

- Contact the Service Centre without delay if the device has been damaged during transport.

- Do not, under any circumstances, make any unauthorised modifications to the device or try to open a component and/or repair it yourself.
Setting up the device

− Place the device on a stable, level surface.
− Never place the device on the edge of a table – it could tip over and fall.
− Ensure that the mains cable does not become a tripping hazard and do not use an extension cord.
− Ensure that the diffuser outlet does not spray directly on furniture, clothing or walls.
− Do not place the device on other electrical devices such as televisions, audio devices, etc.
− Do not expose the device to extreme conditions. Avoid:
  − High humidity or wet conditions
  − Extremely high or low temperatures (e.g. close to an air conditioning unit)
  − Direct sunlight
  − Open flames
Using the device

− Do not operate the device if there is no water in the water reservoir.

− Do not fill the water reservoir directly from the mains water tap as this could damage the device. Use the measuring container.

− Do not overfill the water reservoir.

− Do not use hot water.

− Never pour in water when the device is in use.

− After prolonged operation (3 to 6 hours), allow the device to cool down for an hour to avoid damaging the ultrasonic plate.

− If the device produces smoke or unusual noises, pull out the mains adapter from the socket immediately. Contact the Service Centre without delay if you discover that the device has been damaged.
**CAUTION!**

**Risk of injury!**
There is a risk of burns.
- Care should be taken when using the appliance due to the emission of hot water vapour.

**NOTICE!**

**Possible material damage!**
The essential oil may cause stains if it leaks unintentionally.
- Wipe up leaked oil immediately.
- Do not touch or move the device and do not remove the housing cover while the device is switched on in order to prevent liquid spraying or leaking.
WARNING!

Risk to health!

Device contamination and filling the device with unsuitable liquids can irritate the respiratory tract.

- Only use 100% pure, natural essential oils that are suitable for diffusion as a water additive.

- Never fill the water reservoir with only essential oils.

- After each use, empty the water out of the device and clean the device as described in section "Cleaning the device". Use fresh water for every use.

- Do not fill the device with alcohol or other chemical products or corrosive liquids.

General information on essential oils

- Wash your hands immediately after using essential oils.
Safety information

- Avoid all contact with the eyes, ears and mucous membranes.
- Keep essential oils out of reach of children.
- Keep essential oils in an airtight container away from heat and light sources.
Package contents

Risk of choking and suffocation!
Risk of choking and suffocation through swallowing or inhaling small parts or plastic wrap.

− Keep the plastic packaging out of the reach of children.
− Remove the product from the packaging and remove all packaging material.
− Please check your purchase to ensure that all items are included. If anything is missing, please contact us within 14 days of purchase.

The following items are supplied with your product:
− Aromatherapy diffuser
− Mains adapter
− Operating instructions, warranty card
Getting started

- Remove all packaging materials.
- Place the device on a level surface.
- Remove the housing cover and the water reservoir cover (Fig. C).
- Fill the measuring cup up to the MAX marking with tap water and pour the water into the water reservoir (Fig. D). Do not overfill the water reservoir.
- Add 5-10 drops of essential oil to the water reservoir.
- Replace the water reservoir cover and the housing cover again (Fig. E).
- Connect the mains cable with the coaxial power connectors to the power connection socket (Fig. F). Connect the mains adapter to a socket.

Using the device

- Press the button to switch on the device and to start the diffuser (Fig. G).

<table>
<thead>
<tr>
<th>Press the button once</th>
<th>ON LED lights up</th>
<th>Strong mist</th>
</tr>
</thead>
<tbody>
<tr>
<td>Press the button twice</td>
<td>ON LED flashes once</td>
<td>Weak mist</td>
</tr>
<tr>
<td>Press the button three times</td>
<td>ON LED flashes twice</td>
<td>Return to strong mist</td>
</tr>
<tr>
<td>Press and hold the button for approx. 1.5 seconds</td>
<td>ON LED goes out</td>
<td>Switch off the device</td>
</tr>
</tbody>
</table>
Timer function

- Press the button once or several times to set the timer function.

It is possible to set an operating period of one, three or six hours. The corresponding LED timer lights up.

Press and hold the button for approximately 1.5 seconds to switch off the timer function.

The device switches off automatically if the water reservoir is empty.

Setting the lighting

- Press the button once or several times to set the lighting function.

Press the button once

Function: Automatic colour change with 7 colours
Press the button again to retain the current colour.

Press the button twice

Function: Slow pulsing light
The light pulses in alternating colours in colour change mode, the light pulses in the currently set colour in single colour mode.

- Press the button again to set the next colour.
- Press the button twice again to end the pulsation.
Press and hold the button for approx. 1.5 seconds

Function: Sleep mode

In sleep mode, the lighting is switched off but diffusion continues.

- Set the diffuser performance and duration as described above.

The corresponding LEDs light up for approx. 4 seconds, however they are switched off during sleep mode.

Cleaning the device

Risk of electric shock/short circuit!

There is a risk of electric shock/short circuit due to live parts.

- Remove the plug from the socket before you start cleaning the device
- Do not immerse the device in water or other liquids.
CAUTION!

Risk to health!
The use of unsuitable cleaning agents may produce toxic gases.
- Do not use cleaning agents that contain acids, enzymes or alcohol.

NOTICE!

Possible material damage!
The device components are not dishwasher safe.
- Do not put device components in the dishwasher.

The device must be cleaned after 5–6 uses or 3–5 days.
- Pour the remaining water out of the water reservoir.
- Rinse the water reservoir with warm water. Wipe out the water reservoir with a soft cloth and a mild cleaning solution, if necessary. Rinse the water reservoir with warm water again.
- Clean the outer surfaces and the water reservoir cover as well as the diffuser outlet/air outlet/ventilation with a soft, damp cloth and a mild cleaning solution, if necessary.
Storing the device

- After use, unplug the plug and pour the remaining water out of the water reservoir.
- Clean the device as described above.
- Store the device in a dry, dust-free location away from direct sunlight.

Troubleshooting

If the device stops working properly, please refer to the troubleshooting table shown below to see if you can resolve the problem yourself.

Never attempt to repair the device yourself. If a repair is necessary, please contact our Service Centre or a suitable authorised repair workshop.

</table>

The product has been packaged to protect it from damage in transit. The packaging is made of materials that can be recycled in an environmentally friendly manner.

Device

All old devices marked with the symbol illustrated must not be disposed of in normal household waste.

In accordance with Directive 2012/19/EU, the devices must be properly disposed of at the end of its service life.

This involves separating the materials in the devices for the purpose of recycling and minimising the environmental impact.

Take old devices to a collection point for electrical scrap or a recycling centre.

Contact your local waste disposal company or your local authority for more information on this subject.

EU Declaration of Conformity

The manufacturer hereby declares that this device complies with the fundamental requirements and the other relevant provisions of:

• EMC Directive 2014/30/EU
• Low Voltage Directive 2014/35/EU
• Ecodesign Directive 2009/125/EC
• RoHS Directive 2011/65/EU.

Service information

Please contact our Customer Service team if your device ever stops working the way you want or expect it to. There are several ways for you to contact us:

• In our Service Community, you can meet other users, as well as our staff, and you can exchange your experiences and pass on your knowledge there. You will find our Service Community at http://community.medion.com.
• Alternatively, use our contact form at www.medion.com/contact.
• You can also contact our Service team via our hotline or by post.
