1. Information about these operating instructions

Thank you for choosing our product. We hope you enjoy using this device.

Read the safety instructions carefully before using the device for the first time. Note the warnings on the device and in the operating instructions.

Always keep the operating instructions close to hand. If you sell the device or give it away, please ensure that you also pass on these operating instructions. They are an essential component of the product.

1.1. Key to symbols

If a block of text is marked with one of the warning symbols listed below, the hazard described in that text must be avoided to prevent the potential consequences described there from occurring.

<table>
<thead>
<tr>

• Bullet point/information on steps when the device is in use

▷ Instruction to be carried out

 Declaration of Conformity (see "EU declaration of conformity" section): Products that feature this symbol meet the requirements of the EC directives.
Protection class II

Electrical devices in protection class II are devices that have double and/or reinforced insulation throughout, and do not have the option of connecting a protective earth. The housing of an electrical device in protection class II, with surrounding insulating material, may either form all of the additional or reinforced insulation, or part of it.

Symbol for direct current

Symbol for AC current

1.2. Proper use

This is an entertainment electronics device and is also suitable for multimedia applications. This device is designed to receive and play back television channels. The various connection options enable the additional extension of the reception and playback sources (receiver, DVD player, DVD recorder, video recorder, PC etc.). Your device can be used in a variety of ways.

The device is only intended for private use and not for industrial/commercial use.

- Please note that we shall not be liable in cases of improper use.
- Do not modify the device without our express agreement and do not use any accessories that have not been supplied or approved by us.
- Only use replacement parts or accessories that we have supplied or approved.
- Comply with all the information in these operating instructions, especially the safety information. Any other use is considered improper and can cause personal injury or property damage.
- Do not use the device in extreme environmental conditions.
- This device is only suitable for use in dry interior rooms.
- This device is not suitable for use as a data monitor for office workstations.

1.3. Ultra HD

Your Smart TV features “Ultra HD” technology. This means that it can play back high-resolution images with four times the resolution of Full HD. An Ultra HDTV signal is required.

1.3.1. HDR (High Dynamic Range)

HDR technology provides a greater dynamic range in terms of the brightness of the colours shown. That means that every colour value reproduced can be displayed in 1024 shades instead of the previous maximum of 256. This fourfold increase in the dynamic range makes the darkest areas of the picture even darker and the brightest areas even brighter. It creates a more realistic impression and makes details visible that were previously unrecognisable with a smaller brightness range. The station, streaming service or hardware of the connected device must support HDR and Blu-ray must be supported.

If HDR content is to be played back, select the HDMI inputs in the SOURCES > SOURCE SETTINGS menu and then the ENHANCED setting.
2. Package contents

Please check your purchase to ensure that all the items are included and contact us within 14 days of purchase if any parts are missing.

The following items are supplied with your product:

- Ultra HD Smart TV
- Remote control (RC1822) incl. 2 x 1.5 V batteries (type LR03/AAA)
- Stand including fastening screws
- Documentation

⚠️ DANGER!

Risk of suffocation!

Packaging film can be swallowed or used improperly. Therefore, there is a risk of suffocation!

- Keep packaging material such as plastic film or plastic bags away from children.
3. Safety information

3.1. Operating safety

− Before using the device for the first time, check the device for damage. A defective or damaged device may not be operated.
− This device may be used by children over the age of 8 and by persons with limited physical, sensory or mental abilities or by those without experience and knowledge, if they are supervised or have been instructed in the safe use of the device and have understood the dangers that result from it.
− Children must not be allowed to play with the device. Cleaning and maintenance by purchasers must not be carried out by children unless they are supervised.

DANGER!
Risk of choking and suffocation!
The packaging material is not a toy! Packaging film can be swallowed or used improperly, creating a risk of choking and suffocation.
Keep packaging material such as plastic film or plastic bags away from children.

DANGER!
Risk of electric shock!
Risk of electric shock, short circuit and fire!
- Never open the housing of the Smart TV and do not push objects inside the Smart TV through the slots and openings.

WARNING!
Overheating! Risk of fire!
Overheating may result in damage to the Smart TV and the risk of fire!
- The slots and openings on the TV set are for ventilation purposes. Do not cover these openings, for example with newspapers, table cloths, curtains etc.
- Do not subject the display to pressure. There is a risk of the screen glass breaking.
- The remote control has a Class 1 infrared diode. Never use optical equipment to look at the LED.

CAUTION!
Risk of injury!
Risk of injury due to broken display!
- Do not touch the display with fingers or sharp objects to avoid damage.
- Use protective gloves when wrapping up cracked parts.
- Wash your hands with soap afterwards, as the risk of chemicals escaping cannot be excluded.
- Send the broken parts to your Service Centre for proper disposal.
- Disconnect the device from the mains supply immediately and only use it again after it has been checked by a qualified person or customer services. It is an emergency situation if, for example, the device produces smoke or unusual noises, water has penetrated the device, the mains cable or housing is damaged.

Contact customer services if:
- the mains cable is burnt or damaged
- liquid has penetrated the device
- the device is not operating correctly
- the device has fallen or its housing is damaged
- The device produces smoke

### 3.2. Installation location

- Place the TV set on a sturdy, level surface. Some aggressive varnishes can corrode the rubber feet on the device.
- When used for the first time, new devices may give off a typical, unavoidable but completely harmless odour. This will fade over time. We recommend you ventilate the room regularly to help dissipate this odour. We have taken appropriate measures during the development of this product to ensure that levels are well below legal limits.
- Keep your Smart TV and all connected devices away from moisture and avoid dust, heat and direct sunlight. Non-compliance with these instructions can cause faults or damage to the Smart TV.
- Do not use the device outdoors as it could be damaged by weather such as rain, snow etc.
- The device may not be exposed to water droplets or spray. Do not place any liquid-filled containers (vases or similar) on or next to the device. Such containers could tip over and the liquid could impair the electrical safety of the device.

![NOTICE!]

**Risk of damage!**

Risk of injury due to candles and other open flames.
- Keep candles and other open flames away from this product at all times, to prevent fire from spreading.
- Make sure that there is enough clearance between the device and any surrounding furniture or walls. Ensure a minimum clearance of 10 cm around the device for sufficient ventilation.
- Avoid glare, reflections and extreme dark-light contrasts to protect your eyes.
- The optimal viewing distance is 3 times the screen diagonal.

![DANGER!]

**Risk of injury! Risk of fatal injury!**

Only place the TV set on stable surfaces. Falling televisions may cause serious injuries and even death. Many injuries, particularly for children, can be avoided by taking the following precautions.
- Only operate the Smart TV and its components on a sturdy, level and vibration-free surface to prevent it from falling.
- Only use the TV with the supplied feet and screws.
- Only use furniture that ensures that the TV is positioned safely.
- Take care to ensure that the TV does not protrude over the edges of the furniture.
− Do not place the TV on suspended furniture, such as wall cupboards or shelves, without safely and securely fixing both the furniture and the TV set. Take care to ensure that the furniture is mounted correctly and do not exceed its maximum load.
− Do not place any covers or similar beneath the TV to ensure that it is securely positioned.
− Warn children of the dangers of climbing on furniture when trying to reach the TV set or its controls.

If you store or change your TV, also observe the safety instructions specified above.

3.3. Ambient temperature
− The device can be operated at an ambient temperature of +5 °C to +35 °C and at a relative humidity of 20% to 85% (non-condensing).
− When switched off, the Smart TV can be stored at temperatures of between -20 °C and +60 °C.
− Keep the device at least one metre away from sources of high-frequency or magnetic interference (televisions, loudspeakers, mobile telephones, etc.) to avoid malfunctions.
− Remove the plug from the mains outlet and the antenna cable from the antenna socket during a thunderstorm or if the device is not going to be used for a long period.

**NOTICE!**

**Risk of damage!**

Major changes in temperature or fluctuations in humidity can cause moisture to build up within the Smart TV due to condensation – this can cause an electrical short circuit.

▶ After transporting the Smart TV, wait until it has reached ambient temperature before switching it on.

3.4. Repairs
− Repairs to your Smart TV should only be carried out by qualified specialists.
− If a repair must be carried out, please contact only our authorised service partners.
− Take care to ensure that only spare parts specified by the manufacturer are used. The use of unsuitable spare parts can cause damage to the device or the risk of fire.
3.5. Safety when connecting

3.5.1. Power supply

− Even when deactivated, some of the device components are live. To disconnect the power to your Smart TV or to completely isolate the device from voltage sources, disconnect the device from the power supply completely. To do so, remove mains plug from the socket.

⚠️ DANGER!
Risk of electric shock!

Risk of death due to electric shock when the housing is open.

− Do not open the device housing. It does not contain any parts for maintenance by the user.
− Only operate the Smart TV from an earthed 220 to 240 V– 50 Hz socket. Contact your local energy supplier if you have any questions about the power supply at the installation location.
− The socket must always be easily accessible so that the plug can be quickly removed from the socket in an emergency.
− To disconnect the power supply from your TV, pull the plug from the socket.
− For additional safety, we recommend using a surge protection device to protect your Smart TV against damage due to voltage spikes or lightening strike from the power supply.
− Position the cables so that no one can tread on them or trip over them.
− Do not place any objects on the cables as they may be damaged.
− Never touch the plug with wet hands.
− Always hold the housing and never pull on the cable when removing the plug from the socket.
− Please note that the TV set continues to use power when in standby mode (see also the relevant standby consumption in the “Product data sheet” section on page 75).

ℹ️ If the device switches off and restarts due to electrical discharge while in USB mode (media player), optional HbbTV mode or optional LAN/WLAN mode (media player/portal), it may not be able to independently restore the last operating mode. Please start the respective media or applications again.

The last user settings entered may not be restored following an electrical discharge that causes the TV to switch off because these settings are only saved 5 minutes after switching channels.

ℹ️ All multimedia devices that can be connected to the corresponding connections of the TV must comply with the requirements of the Low Voltage Directive.
3.6. Handling batteries

**WARNING!**

Risk of explosion!

Batteries may contain combustible materials and leak, heat up excessively, ignite or even explode.

- Avoid improper handling of the batteries to prevent damage to your device and your health.

Please follow the safety advice below closely:

- Keep batteries away from children.
  - Consult a doctor immediately if batteries are swallowed.
- Never charge batteries (unless they are designed to be recharged).
- Never discharge batteries by means of high power output.
- Never short-circuit the batteries.
- Never expose the batteries to excessive heat (such as direct sunlight, fire or similar).
- Do not dismantle or deform the batteries.
  - You could injure your hands or fingers, or battery fluid could get into your eyes or onto your skin. If you do come into contact with battery fluid, rinse the affected area with plenty of water and consult a doctor immediately.
- Avoid heavy impacts and vibrations.
- Always observe the correct polarity.
- Take care to ensure that the plus (+) and minus (−) poles are correctly inserted to avoid short circuits.
- Do not mix up new and old batteries or different types of batteries.
  - This could cause your remote control to malfunction. In addition, the weaker batteries would discharge too much.
- Remove used batteries from the device immediately. There is an increased risk of leakage with flat batteries.
- Remove the batteries from the remote control if it is not going to be used for a long period of time.
- Replace all used batteries in the remote control at the same time with new batteries of the same type.
- Cover the contacts of the batteries with sticky tape if you want to store or dispose of them.
- If necessary, clean the battery and device contacts before insertion.
- If the batteries have leaked, wear protective gloves and clean the contacts thoroughly.
4. EU – Declaration of Conformity

Medion AG hereby declares that this device complies with the required regulations in the EU and the fundamental requirements and the other relevant provisions of the following:

• Radio Equipment Directive 2014/53/EU
• Ecodesign Directive 2009/125/EC
• RoHS Directive 2011/65/EU

You can download the complete EU Declaration of Conformity at www.medion.com/conformity.

Due to the 5 GHz frequency range of the integrated wireless LAN solution, the device may only be used inside buildings in the EU (see table).

5. Overview of the device

5.1. Front

MD 31510, MD 31511, MD 31512, MD 31513:

1) LCD screen
2) Mains switch
3) Infrared sensor: Reception field for the infrared TV signals.
   Operating light: Lights up when the device is in standby mode.

MD31514:
1) COMMON INTERFACE (CI+): Card slot for connecting pay TV cards
2) USB (5V ---, 500 mA max.): USB connection for media playback/recording (PVR)
3) HDMI 1: HDMI connection for devices with a HDMI output
4)  For connecting headphones with 3.5 mm jack
5) MODE: Multifunction button for channel switching, input source selection or volume adjustment. Settings are made by tilting upwards (+) or downwards (-). Pressing the button briefly switches between functions. A long press switches the device into standby mode or operating mode.
6) HDMI 2-3: HDMI connection for devices with a HDMI output (HDMI 2 can be used for CEC/ARC)
7) LNB (13 V/18 V---, 300 mA max.): For connecting the antenna (satellite)
8) ANT.: For connecting an aerial (analogue, DVB-T or DVB-C)
9) VGA: VGA port for connecting a PC or a YUV adapter (optional)
10) BACK AV IN: Audio/video input (cinch)
11) SPDIF Optic. OUT: Digital audio output (optical)
12) LAN: Network connection to connect to the Internet
13) Fixing holes for a wall mount
5.3. Remote control
1) **SOURCE**: Select input signal of connected devices

2) **Number buttons**:  
   TV: programme selection, teletext: page selection

3) **TXT**: Activate teletext  
   Press 2 x = set transparent;  
   Press 3 x = close

4) **P/**: Programme selection buttons  
   TV: select next (+) / previous (−) programme;  
   teletext: select next (+) / previous (−) page

5) **HOME**: Open and close menu

6) **INFO**: Digital TV: show information (e.g. current channel number)

7) **Direction button ▲**: Move up in menu  
   Digital TV: Select info bar for the current programme, teletext: select next page;  
   Direction button ▼: Move down in menu  
   Digital TV: Select info bar for the current programme, teletext: select previous page;  
   Direction button ◄: Move left in menu  
   Teletext: Call up subpages;  
   Direction button ►: Move right in menu  
   Teletext: Call up subpages

8) **EXIT**: Exiting the menu

9) **MEDION**: Open the MEDION® portal

10) **PRIME VIDEO**: Open the Amazon Prime Video portal

11) **Red button**: For teletext or menus  
    **Green button**: For teletext or menus  
    **Yellow button**: For teletext or menus  
    **Blue button**: For teletext or menus

12) **Media buttons**  
    ◄: Fast rewind;  
    ▶: Fast forward;  
    ●: Start recording (PVR);  
    ■: Stop playback;  
    ▶: Start playback;  
    ■: Pause playback

13) **FAV**: YouTube / multifunction button for programme channel or input source

14) **NETFLIX**: Call up Netflix site

15) **BACK**: Go one level back in menus; TV: set previous TV channel

16) **OK**: Confirm selection in certain menus

17) **EPG**: Digital TV: call up the electronic programme guide

18) **V-/+**: Increase (+) or decrease (−) volume.

19) **MUTE**: Mute

20) **LANG.**: Analogue TV: stereo/mono;  
    Digital TV: select audio language (if available)

21) **ON**: Switch smart TV on/off (switch standby mode on/off)
5.3.1. Programming the multifunction button

The button can be programmed to any channel position or a particular input source.

- Start by selecting the function you require and then hold down the button for 5 seconds until **MY BUTTON IS SET** appears on the screen. This confirms the new programming.

After each **INITIAL INSTALLATION** your customised button programming is deleted and reset to the factory defaults.

6. Using the device for the first time

Before using for the first time, be sure to read the section “Safety instructions”.

6.1. Unpacking

- Select a suitable place for setting up the device before unpacking.
- Open the box very carefully to avoid damaging the device. The device could be damaged if you use a knife with a long blade to open the box.
- The box contains a number of small items (including batteries). Keep these out of the reach of children as they represent a choking hazard.
- Store the packaging material in a safe place; only use this box to transport the TV.

**DANGER!**

Risk of suffocation!

Packaging film can be swallowed or used improperly. Therefore, there is a risk of suffocation!

- Keep packaging material such as plastic film or plastic bags away from children.

6.2. Mounting

Attach the stand as shown in the illustration. Carry out this step before connecting the smart TV.

**MD31510:**
MD31511 / MD31512 / MD31513:

1. [Diagram]
   - 3 screws x 3

2. [Diagram]
   - 2 screws x 2

3. [Diagram]

4. [Diagram]
   - 6 screws x 6

MD31514:

1. [Diagram]
   - 4 screws M4 x 16
   - 4 screws M6 x 20

2. [Diagram]
   - 4 screws M4 x 16

3. [Diagram]

4. [Diagram]
6.3. **Inserting batteries in the remote control**
- Loose the screw of the battery compartment cover on the back of the remote control and remove the cover.
- Insert two LR03 (AAA) 1.5 V batteries in the battery compartment of the remote control. Check the battery polarity (inscribed on the bottom of the battery compartment).
- Close the battery compartment by fixing the cover with the screw.

![NOTICE!]
**Risk of damage!**
The remote control can be damaged by leaking batteries if not used for a long period of time!
- Remove the batteries from the remote control if the device is not going to be used for a long period.

6.4. **Connecting the antenna**
Your smart TV supports different antenna signals. You can feed the following picture signals via the connection labelled **ANT**.
- via analogue cable/an analogue house antenna,
- via a DVB-T / DVB-T 2\(^1\) antenna or
- via a DVB-C\(^2\) connector (digital cable)
- Connect the antenna cable from either the house aerial/the analogue cable connection, the DVB-T antenna or the DVB-C connection to the antenna connection on the smart TV
  - You also have the option of connecting a digital satellite system to the connection labelled **LNB**.
- Screw the F connector of a coaxial antenna cable onto the connection on the smart TV.

- To receive encrypted/subscription channels you will need to use a CI module and an appropriate card. Insert a CI module (available in specialist shops) into the slot provided for this purpose on the left-hand side of the device (**Common Interface**). You can then insert the card from your provider into the CI module.

6.5. **Connecting the power supply**
- Connect the mains plug on the device to an easily accessible 220 - 240 V ~ 50 Hz mains socket.

6.6. **Switching the smart TV on and off**
- Set the power switch on the bottom of the device to **ON**. The device switches to standby mode and the display on the front will light up.
- To switch on the device, press
  - on the remote control: the Standby/On button \(\odot\), one of the number buttons or one of the \(\uparrow / \downarrow / \left / \right\) buttons;
  - on the device: the multifunction button \(\odot\).
- Use the Standby/On button \(\odot\) on the remote control to switch the device back into standby mode. Although the device has been switched off, it will continue to consume electricity.
- Use the mains switch to turn off the device (**OFF** position). The device will continue to consume power as long as it is connected to the mains network.

- If the device is not receiving an input signal, it will automatically switch to standby mode after five minutes. A countdown timer will appear on the screen until this time. This function is not available for all sources.

\(^1\) This service must be available in your region.
6.7. Channel search when switching on for the first time

When you switch the device on for the first time, you will be guided through the **FIRST TIME INSTALLATION** menu. You can call up and carry out the first-time installation again at any time via the menu **INSTALLATION > FIRST TIME INSTALLATION**.

- Use the **↓↑←→** keys to select the language.
  After confirming the selected language with **OK** the initial installation will begin.

- Use **↓↑←→** to select the desired country. The country setting will influence the order in which the channels are stored. Also, there are a number of options preset for the individual countries.
- Afterwards, press **OK** to continue.
- You will be asked to agree to the MEDION® Smart TV Privacy Policy. This is necessary if you intend to use the Network / Internet / HbbTV services. Read the privacy settings carefully. Select the individual points with **↓↑←→** and confirm them with **OK**, if necessary. If you have any questions, complaints or comments regarding this privacy policy or its enforcement, please contact by email at **smarttvsecurity@vosshub.com**.
- If the option **ACCEPT ALL** is selected, press the **ACCEPT** button to confirm. Then select **↓↑** the **NEXT** button and press **OK** to continue.
### 6.7.1. Network/Internet settings

You can configure network settings to access content on your home network and the internet. Select "Next" to scan wireless networks.

#### Network settings

| **NETWORK TYPE** | Here you select the network type: **WIRELESS DEVICE** or **WIRED DEVICE**. After making a selection **NEXT** with the direction buttons ↑ ↓ and confirming with the **OK** button, an overview of all available networks appears. Make a selection and confirm with the **OK** button. If a password is required for a network, a virtual keyboard appears which you can use to enter this with the help of the direction buttons ← → ↑ ↓ and the **OK** button. After entering the password, select **OK** on the keyboard and confirm with the **OK** button. |
| **PRESS WPS ON YOUR WI-FI ROUTER** (only for WLAN) | This option enables you to quickly establish a WPS connection via a wireless network (Wi-Fi). Hold down the WPS button on your router and confirm this option **OK** using the **OK** button. Then the WPS connection will be made. |
| **INTERNET SPEED TEST** | Press the **OK** button in order to test the Internet speed. |
| **ADVANCED SETTINGS** | Choose the setting **AUTOMATIC IP** or **MANUAL IP**. If you select **MANUAL IP**, three additional lines appear in which you can manually enter the data for the **IP ADDRESS**, **SUBNET MASK** and **DEFAULT GATEWAY** using the direction buttons ← → and the number buttons. |
| **CONFIGURATION** | Select here between **AUTOMATIC DNS** or **MANUAL DNS**. If you select **MANUAL DNS**, two additional lines appear in which you can manually enter the data for the **DNS SERVER 1** and **DNS SERVER 2** using the direction buttons ← → and the number buttons. |

---

An existing network connection can be terminated by pressing the **red button**.
### Network settings

| WAKE ON | Activate/deactivate the Wake-On LAN/Wake-On Wireless LAN function (WoL/WoWLAN). This enables you to switch on the smart TV via a different device (e.g. a smartphone with the MEDION® Life Remote App). Both devices must be connected to the same network via LAN or Wi-Fi for this purpose. Select the **ON** setting to activate this function. The device being used as a remote control needs to be connected to the TV once when it is switched on. The control function only works when the TV is in standby mode. If the TV is turned off and on again at the mains switch, the connection between the two devices will be automatically restored. |

- Exit the network settings by pressing **OK**.

### 6.7.2. Reception method

![Select Broadcast Type]

- **Scan Encrypted Channels**: Use ← → to select whether encrypted channels should also be searched for.
- **Select favourite network type**: Use ← → to select the preferred reception method. If you use several types of reception, you can select the types below with ↑ ↓ and activate with **OK**.

  - **D. Aerial**
  - **D. Cable**
  - **Satellite**
  - **Analogue**

- Select **NEXT** with ↑ ↓ and confirm with **OK**.

### 6.7.3. Cable digital

If you have previously activated the reception type **DIGITAL CABLE**, you can now make settings for the network search. If it should be necessary, you can adjust the **NETWORK, FREQUENCY**, the **NETWORK ID** and the **SEARCH STEP** correspondingly.
6.7.4. Satellite

If you have previously activated the reception type SATELLITE, you can now make settings for the antenna type.

- To set the antenna type, select one of the following antenna types:
  - **DIRECT**: Select this antenna type if you have a single receiver and a satellite antenna. Press the OK button and then choose the desired satellite (you can also call up the transponder list using the blue button). Afterwards, press the OK button again to start the search. After that, decide whether or not the channel list should be loaded.
  - **UNICABLE**: Select this antenna type if you have multiple receivers and a single-cable system. Press the OK button and make all the necessary settings regarding SATELLITE POSITION 1/2, USER BAND and BAND FREQUENCY (here you can also call up the transponder list using the blue button). Afterwards, press the OK button again to start the search. After that, decide whether or not the channel list should be loaded.
  - **DISEQC SWITCH**: Select this antenna type if you have multiple satellite antennas and a DiSEqC switch. Press the OK button and activate the desired DiSEqC switch 1 - 4 (here you can also call up the corresponding transponder list using the blue button). Afterwards, press the OK button again to start the search. After that, decide whether or not the channel list should be loaded.

During the search, the scan progress is displayed. In addition, the number of found TV and radio stations is displayed.

- Afterwards, press OK to continue.

At the end of automatic program storage, a TV programme is shown.

The initial installation described here corresponds to the FIRST TIME INSTALLATION option in the INSTALLATION menu.
6.8. Using the multimedia connections

![Notice!]

Risk of damage!

Incorrect operation can cause damage to the equipment used.
- Before wiring and first use, you must also read the operating instructions of the devices you are connecting. Take care to ensure that all devices are switched off during wiring.

![Notice!]

Risk of damage!

If plugs and sockets are connected incorrectly it can cause damage to the contacts.
- Take care to ensure that the plugs and corresponding sockets fit together precisely in order to avoid any damage to the contacts. Due to the arrangement of the contacts, many plugs will only fit into the socket in one position.

6.8.1. AV

The AV transmission (composite) works via three cinch connections, of which one transmits the video signal (yellow) and two transmit the stereo audio signal (red/white). Use a standard AV cable.
- Connect the AV output of the playback device with the AV input of the TV.

6.8.2. HDMI

HDMI (High Definition Multimedia Interface) is an interface for digital video and audio transmission. It has the highest quality of transmission and can also play Ultra HD resolution, from version 2.0. Use a standard HDMI cable:
- Connect the corresponding HDMI ports of the devices used with an HDMI cable.

6.8.3. HDMI ARC (Audio Return Channel)

If you want to use a TV set as a signal receiver AND signal source (to transmit an audio signal to an audio receiver), you must use the HDMI2 port with audio return channel (ARC). The HDMI connection to the TV then works in both directions. It can receive image and sound signals from a video device and the audio signal of the TV set can also be sent to the audio receive via the audio return channel.
- Connect the video device (e.g. Blu-ray player) to the audio receiver via HDMI.
- Connect the audio receiver to the TV set via HDMI/ARC.
- Take care to ensure that the speaker control of the TV set is routed to the external amplifier.

6.8.4. HDMI CEC (Consumer Electronics Control)

CEC is the abbreviation for Consumer Electronics Control. If you connect different devices via CEC-enabled HDMI connections, you can control certain functions of the entire HDMI network with a single remote control (e.g. standby or record functions):
- Connect all devices via CEC-enabled HDMI ports with HDMI cables. The HDMI ports on your TV set are all CEC-enabled.
- Take care to ensure that the CEC functions are enabled for all ports and that all devices are connected accordingly.
6.8.5. USB
A USB port can be used to connect and read storage media such as USB sticks or external hard drives. Use a suitable USB cable. If a suitable USB cable is supplied, you should use this (e.g. for hard drives). Always verify the power consumption of the USB storage medium used and use the corresponding USB connections.
- Connect the corresponding USB ports of the devices used with a suitable USB cable. Whenever possible, do not use a USB extension cord as this can cause problems, depending on the voltage.

6.8.6. SPDIF
SPDIF (Sony®/Phillips digital interface) is an interface for transferring digital stereo or multi-channel audio signals between various devices. Usually, the digital audio signal is output via a coaxial (cinch) or an optical connection. Your TV features an optical SPDIF port. Use a standard, optical SPDIF cable.
- Connect the corresponding SPDIF ports of the devices used with a corresponding SPDIF cable.

6.8.7. VGA (PC)
You can connect a PC with a monitor/TV to transmit the video signal via the VGA port. Use a standard VGA cable.
- Connect the corresponding VGA ports of the devices used with a VGA cable.

6.8.8. VGA (YPbPr)
The VGA connection of your TV can be used for the video transmission of the YPbPr signal. Use a suitable YPbPr adapter.
- Connect the VGA port of your TV to the YPbPr cinch connections (red/blue/green) of the video device. Use the supplied YPbPr adapter (optional).
- Use the AV audio connections of your TV set (red/white) for audio transmission and connect them with the YPbPr audio connections of the video device (red/white). Use the supplied AV adapter (optional).

6.8.9. LAN
You can connect the TV set to the Internet via the LAN connection and receive online content (e.g. streaming services) via your device.
- Connect the LAN connection of the TV set to your network or router using a network cable (Ethernet cable).
- Make all the necessary network settings on the devices.

6.8.10. Headphone output (Headphones Out)
The headphone socket is used for connecting a pair of headphones with a stereo mini jack connection.
- Connect the headphones to the stereo mini jack of the device.
- You can set the volume of the headphone signal in the sound menu. If necessary, mute the speaker of the TV.

⚠️ WARNING!
Risk of hearing damage!
To prevent possible damage to your hearing, avoid listening at high volume over long periods of time.
- Before pressing play, set the volume to the lowest setting.
- Start playback and increase the volume to a comfortable level.
7. Operation

7.1. Channel selection

To select a channel, press either one of the P ◀/▶ buttons on the remote control, use the MODE multifunction switch on the device or select the channel directly using the number buttons.

- For a two- or three-figure number, press the number buttons in the corresponding order.
- By pressing the OK button on the remote control, you can call up the channel list, select the channel using the ◀ and ▶ buttons and call it up by pressing OK.

7.2. Sound settings

- You can increase or decrease the volume by pressing the volume buttons V-=/+ on the remote control or in speaker mode of the multifunction switch MODE on the device.
- Press the mute button M to switch the volume fully off and on again.
- Pressing the LANG. button opens the CURRENT LANGUAGE window.

7.3. Screen settings

- Depending on the programme, the pictures are transmitted in the formats 4:3 or 16:9. As soon as the PICTURE menu is selected using the ◀ ▶ buttons, three direct links appear above it. Here you can navigate directly to the aspect ratio settings and adjust the screen format:

<table>
<thead>
<tr>
<th>Format</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AUTO:</td>
<td>The format displayed is automatically adjusted to match the input signal.</td>
</tr>
<tr>
<td>FULL:</td>
<td>(Only in HDMI mode and with HD TV channels received via cable and satellite): Pixel-perfect reproduction of the image (1:1).</td>
</tr>
<tr>
<td>16:9:</td>
<td>For undistorted picture display in 16:9 format</td>
</tr>
<tr>
<td>SUBTITLE:</td>
<td>This function is used to zoom a widescreen image (picture format 16:9) with subtitles to full screen size.</td>
</tr>
<tr>
<td>14:9:</td>
<td>This option sets the 14:9 picture format.</td>
</tr>
<tr>
<td>14:9 ZOOM:</td>
<td>This function is used to zoom a widescreen image (picture format 14:9) to the upper and lower edges of the screen.</td>
</tr>
<tr>
<td>4:3:</td>
<td>Is used to view a standard image (picture ratio of 4:3) as this is its original format.</td>
</tr>
<tr>
<td>CINEMA:</td>
<td>This function is used to zoom a widescreen image (picture format 16:9) to full screen size.</td>
</tr>
</tbody>
</table>

You can also change the picture format in the menu SETTINGS > PICTURE > ADVANCED SETTINGS > PICTURE ZOOM.
Please note that not all picture formats are available depending on the chosen picture source.

### 7.4. Displaying information

- Press the **INFO** button to display information about the current channel. The infobar is also displayed if different signal inputs are used.
- You receive the same information when you switch over to a different channel.
- If you press the **INFO** button twice (or the **INFO** button once and the ** button once), a description of the current TV channel is displayed (if available). This automatically scrolls through the text. If the information changes too quickly, you can use the ** and ** arrow buttons to scroll up and down through the text yourself.

### 7.5. Opening the favourites list

In the **CHANNELS** menu you can add individual channels to up to four different favourites lists.

- Press the ** button (**MENU**) and use the ** buttons to select the **HOME > CHANNELS** menu and press the **OK** button. The list of channels then opens. Alternatively, you can press the **OK** button when the device is in use (the list of channels opens).
- Above the list, then use the ** buttons to select **EDIT** and use the ** buttons to select a station to be added to the favourites list and press **OK**. A menu then opens. Here, use the ** buttons to select **TAG/UNTAG CHANNEL**. A check mark then appears after the station. To add further stations to the list, use the ** buttons to select them and press **OK**. To then navigate to the **EDIT** menu, press the **BACK** button.
- Use the ** buttons to select **ADD/REMOVE FAVOURITES** and press **OK**.
- After that, four possible favourites lists are displayed (**LIST 1-4**). You can now assign the marked channel to the desired favourites lists (**LIST 1-4**). To do this, select the **ON** entry in the corresponding list and then press **OK**.
- Press **OK** or **EXIT** to exit the list of channels.
- To call up a favourites list, open the list of channels as described above and then use the ** buttons to select the **FILTER** option. Next, select the desired favourites list (**LIST 1-4**) under **FAVOURITES**. When the **CHANNELLIST** is opened using the **OK** button, only the stations in the corresponding favourites list are displayed and you can switch between them.

**i** Under **TV**, use the ** buttons to select **CHANNELS**, the **FAVOURITES** direct link appears above it. You can call up existing favourites lists directly here.
7.6. Selecting the source

Please note that the source (the connected device) is only recognised when connecting using the (SOURCE) button or in the TV menu, if this source is activated in the SETTINGS > SYSTEM > SOURCES menu or in the SOURCES > SOURCE SETTINGS menu.

- Use the (SOURCE) button to select the inputs for the connected devices. When the SOURCES LIST menu is open, press the corresponding digit to select the desired source directly.

1. TV  
   TV mode (antennas, satellites and cable signals are played back)
2. BACK AV  
   Audio/video input (AV)
3. HDMI1  
   HDMI input 1
4. HDMI2  
   HDMI input 2 (HDMI 2 can be used for CEC/ARC)
5. HDMI3  
   HDMI input 3
6. YPBPR  
   Device on the VGA input via an adapter (YUV/YPbPr)
7. VGA/PC  
   Device on PC input
8. WIRELESS DISPLAY  
   Playback content from another external player
USBDISK  
   USB storage medium (optional) (the name can differ, if necessary)
USB2  
   USB storage medium (optional) (the name can differ, if necessary)
AUDIO VIDEO SHARING  
   Network service for data exchange between devices (optional)

- Alternatively, use the direction buttons ↑↓ to go to the desired source.
- Confirm your selection with the OK button.

If the CEC function is enabled, the HDMI source could be renamed from the external player if necessary. The remote control of the TV set controls the connected devices. If the 0 button on the remote control is pressed for several seconds, this controls the television again.

The source can also be selected using the multifunction switch MODE on the device. For this, press the switch briefly several times until you reach the source selection menu. Then select the desired source by moving upwards (+) or downwards (−). In addition, you can call up all activated sources in the menu SOURCES > SOURCE SETTINGS.

7.7. Wireless display

Via wireless display you have the option of playing content from an external player (e.g. tablet PC, smartphone etc.) via the television. The external device must have at least Android version 4.2 installed. The WIRELESS DISPLAY function is only available for Android devices.

Select WIRELESS DISPLAY as the source. The “Wireless display – ready to connect” start screen appears.

You must activate screen mirroring on the playback device. The playback device now detects the available TV sets with which a connection can be established.

After the television is selected, a connection is established. Notification “Connection with wireless display is made” appears. Then the TV will mirror the screen content of the playback device.

Wireless display can only be used if the mobile device supports this function.

The detection and connection processes differ depending on the programs you use. Please refer to the operating instructions of your playback device. Android-based mobile devices should have the software version 4.2 or higher.

Due to the great variety of different devices and software versions, faultless functionality cannot be guaranteed.
8. Teletext

Teletext is a free service broadcast by most channels and provides the latest news, weather, TV listings, share prices, subtitles and other information. Your TV set offers many useful functions for using teletext including multipage text, subpage saving and quick navigation.

8.1. Using the teletext

Your remote control has special buttons for operating the teletext.

- Select a TV channel that broadcasts teletext.
- Press the TXT button once to display the start/index page for the teletext.
- Pressing TXT again makes the text transparent in front of the TV image.
- Pressing the TXT button a third time switches the device back into TV mode.

8.1.1. Selecting a teletext page

8.1.2. Number buttons

- Enter the number of the desired teletext page as a three-digit number using the number buttons.
- The selected page number is displayed in the top left corner of the screen. The teletext counter searches as long as it takes to find the selected page number.

8.1.3. Scrolling through pages

- The channel selection buttons or \( \uparrow \) and \( \downarrow \) direction buttons can be used to scroll forwards or backwards through the teletext pages.

8.1.4. Colour buttons

- If coloured fields or text entries are displayed at the lower edge of the screen then you can select these contents directly by pressing the appropriately coloured button: RED, GREEN, YELLOW, and BLUE.

8.1.5. Subpages

Some teletext pages have subpages. The lower edge of the screen may contain something like \( 1/3 \), for example. The subpages are displayed one after another at an interval of about half a minute. You can also call up these subpages by pressing the \( \leftarrow \rightarrow \) button.

8.1.6. INDEX

- Use the BACK button to select the start page containing a list of the teletext contents.
9. Using the On-Screen Display menu (OSD menu)

9.1. Navigating in the menu

- Press the menu button 🎞 (MENU) to activate the OSD.
- Select the main menu with the ▲ ▼ direction buttons.
- Select the submenu from the main menu using the ◀ ▶ direction buttons.

With some submenus, direct links open automatically here, giving you the option to access common options quickly and make settings.

- Press the OK button to select the selected option from the submenu.
- You can use the direction buttons ▲ ▼ to select the options from a menu.
- Press the BACK button to move back one menu level and back to the main menu.
- You can use the direction buttons ◀ ▶ ▲ ▼ to enter a value or make another selection.
- Close the menu with the EXIT or 🎞 (MENU) button.

Please note that depending on the preset, the menu closes automatically if no button is pressed for a certain amount of time.

You can select the following main menus:

- HOME menu
- SOURCES menu
- APPS menu
- SETTINGS menu
- TV menu

Due to technical changes, the menus described here may differ from the menus actually displayed on your screen.

Not all menus are available, depending on the source you selected. If VGA/PC is selected as the source, other options will appear in the screen settings.

10. The menu system in detail

10.1. Home page

The home page allows you to compile preferred menu options and applications for quick access. To add additional options to the home page, proceed as follows:

- Select the desired menu option/application in the OSD menu
- Press the ◀ button. The ADD TO HOME entry appears below.
- Confirm your selection with the OK button. The corresponding menu option/application now appears in the HOME menu.

To delete menu options/applications from the HOME, proceed as follows:

- Select the desired menu option/application on the HOME.
- Press the ◀ button. The DELETE and MOVE entries appear below.
- Select DELETE and press OK to confirm the selection. The corresponding menu option/application is then deleted from the HOME.

To change the arrangement of the menu options/applications, proceed as follows:

- Select the desired menu option/application on the HOME.
- Press the ◀ button. The DELETE and MOVE entries appear below.
- Select MOVE and press the OK button to confirm the selection.
- The menu option/application can be moved left and right using the ◀ ▶ buttons.
- Then confirm this with the OK button.

The following menu options/applications are preset on the HOME:
### Media portal menu

<table>
<thead>
<tr>
<th>Menu option</th>
<th>Settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>In the media portal, you have access to news, games, shopping and much more via the pre-installed applications. The ( \leftarrow \rightarrow \uparrow \downarrow ) direction buttons can be used to scroll through the various apps and confirm your selection by pressing the <strong>OK</strong> button. An Internet connection is required for this function. The media portal hides behind the MEDION button, but can also be called up using the MEDION button. The first time you use the device, you must accept the licence conditions. Then select the desired language.</td>
<td></td>
</tr>
</tbody>
</table>

![Media portal menu](image)

Confirm your selection by pressing the **OK** button. Afterwards, the home page of the media portal appears where a shortlist of certain apps is displayed. The following options can be selected here:

- The start view of the media portal appears only on first use or after a reset of the media portal via the **yellow button SETTINGS**.
  - If you press the MEDION button on your remote control, you are directed straight into the media portal.
  - With the MEDION button (or with the **BACK** button,) you can switch from the currently selected app back to the home page at any time. Use the **EXIT** button to exit the media portal and return to normal TV mode.
  - A mouse and keyboard can be connected to the USB port of the TV set. It is much easier to use the Internet browser with the help of these input devices. The functionality of all connected devices cannot be guaranteed.

- **Nederlands**
- **English**
- **Français**
| **INTERNET** | The open browser function is an app in the media portal and provides you with access to the Internet. After opening, predefined web pages and their logos are shown that you can select directly. You can use the keyboard function to enter URL addresses directly or control web pages via the activated search function. Use the arrow buttons on the remote control to navigate through the options and press **OK** to confirm your selection. Please note that Internet pages with Flash content are not supported by the open browser. It is also not possible to download content. |
| **ADDITION TO THE START SCREEN** (My Apps) | Press the **green button** to add the currently selected app to the start screen. |
| **SETTINGS** | This is where you can specify which language areas the apps should be selected from. In addition, you can reset the portal so that the portal home page is reset to the factory default. |
| **YOUTUBE** | Direct link to YouTube. Alternatively, the **button can be used for direct access (preset).** |

### 10.1.2. Channels menu

The channel list is where you manage your channels. The **CHANNELS** menu can also be opened by pressing the **OK** button when the device is in use.

![Channels table]

As soon as you call up the channel list, you enter the **WATCH** directory. Use the **buttons to switch to the additional options **EDIT** and **FILTER**.

<table>
<thead>
<tr>
<th><strong>Menu option</strong></th>
<th><strong>Settings</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>WATCH</strong></td>
<td>You can use the **buttons to select channels from the list and press <strong>OK</strong> to open. You can use the **button or the **button to scroll pages up or down 10 at a time.</td>
</tr>
</tbody>
</table>
To select channels for editing, select a station using the ‹› buttons and press OK. A menu then opens. Here, use the ‹› buttons to select TAG/UNTAG CHANNEL. A check mark then appears after the station. To add further stations to the list, use the ‹› buttons to select them and press OK. The channels with a check mark can be edited with the following options. If you have not selected any channels, the currently selected channel is edited. If you press the BACK button, the following options appear:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ADD TO HOME</td>
<td>Press the OK button to select the selected channel from the HOME menu. The channels are then listed there and can be selected directly.</td>
</tr>
<tr>
<td>MOVE</td>
<td>This function enables you to move the currently selected channel (or all marked channels) to a different position in the channel list. Press the OK button and then enter the new channel position using the number buttons. Press the OK button again and confirm the subsequent prompt with YES. The channel will be assigned to the desired channel position and all other channels are shifted accordingly.</td>
</tr>
<tr>
<td>DELETE</td>
<td>This function enables you to delete the currently selected channel (or all marked channels). Press the OK button and confirm the subsequent prompt with YES. The channel with then be permanently deleted. Select NO if you want to cancel this step.</td>
</tr>
<tr>
<td>EDIT NAME</td>
<td>This function enables you to rename the currently selected channel. Press the OK button and select the desired characters with the ‹› buttons. If you then press the OK button, the new name is applied directly.</td>
</tr>
<tr>
<td>LOCK/UNLOCK</td>
<td>This function enables you to lock or unlock the currently selected channel (or all marked channels). You can use the lock function to password protect access to certain channels. Press the OK button and then enter the required password (factory default: 0000). A lock icon appears after the channel name. Do the same to unlock the channel. To lock a channel, you must know the password (factory default: 0000, it can be changed in the SETTINGS &gt; SYSTEM &gt; PARENTAL menu).</td>
</tr>
</tbody>
</table>
### ADD/REMOVE FAVOURITES
You can create up to four favourites lists that you can call up later. If you press the **OK** button, you can add the currently selected channel (or all marked channels) to one or more favourites lists. To do this, select **ON** for the desired list and press the **OK** (or **EXIT**) button. To remove a channel from a favourites list, select the **OFF** entry accordingly. If a channel is assigned to the favourites list, a corresponding symbol appears after the channel name. For more information, read the section “Opening the favourites list” on page 27.

### TAG/UNTAG CHANNEL
This function enables you to mark the currently selected channel. A check mark then appears after the channel name. If the current channel has previously been selected, this option removes the check mark.

### TAG/UNTAG ALL
You can use this button to mark all channels. A check mark then appears after the channel name. You can remove the check mark from all channels in the same way.

### FILTER
This is where you will find the filter functions for adapting the presentation of the channel list:

<table>
<thead>
<tr>
<th>FILTER</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHANNEL TYPE</td>
<td>Only the channels for the selected reception type will be displayed.</td>
</tr>
<tr>
<td>TV/RADIO</td>
<td>Select here whether only TV, only radio, only text or all channels are to be displayed in the list.</td>
</tr>
<tr>
<td>FREE/PAY</td>
<td>Select here whether you want to display only free channels, only encrypted channels or all channels in the list.</td>
</tr>
<tr>
<td>A-Z</td>
<td>Here you can individually select each letter of the alphabet, at which point only the channels beginning with the appropriate letter will be displayed in the channel list.</td>
</tr>
<tr>
<td>SORT</td>
<td>Select the type of sorting (<strong>ALPHABETIC</strong> or <strong>NUMERIC</strong>).</td>
</tr>
<tr>
<td>HD/SD</td>
<td>Select whether only HD, SD or all channels are displayed.</td>
</tr>
<tr>
<td>FAVOURITES</td>
<td>Select whether one of the four possible favourites lists is to be displayed.</td>
</tr>
<tr>
<td>PROFILE OPTIONS</td>
<td>Here you can make pay TV settings (is not, however, currently supported by the pay TV providers).</td>
</tr>
</tbody>
</table>
10.1.3. Programme guide (EPG – Electronic Programme Guide) menu

You can use the EPG button to open the programme guide directly.

You will see the current programme and the next programme for the available nations in the table.
- Use ▲ ▼ to select a channel and scroll through the channel offering with ◄ ◄.

The programme information displayed is created by the broadcaster. If no programme information is displayed, this does not mean that your Smart TV is faulty.
The next table shows the options for the **GUIDE**

<table>
<thead>
<tr>
<th>Menu option</th>
<th>Settings</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>NOW/NEXT</strong></td>
<td>Select the <strong>NOW/NEXT</strong> view. This shows only the current and the next programme for all channels. <strong>FILTER</strong> enables you to restrict the display according to certain criteria and <strong>TIMELINE SCHEDULE</strong> takes you back to the original display.</td>
</tr>
<tr>
<td><strong>FILTER</strong></td>
<td>If you are looking for a specific programme, you can use a filter to restrict the selection.</td>
</tr>
<tr>
<td><strong>PREVIOUS DAY</strong></td>
<td>The programme guide for the previous day is displayed. This is only possible up to the current day. Programmes in the past are not displayed here.</td>
</tr>
<tr>
<td><strong>NEXT DAY</strong></td>
<td>The programme guide for the next day is displayed.</td>
</tr>
</tbody>
</table>

The following options can be found here:

<table>
<thead>
<tr>
<th><strong>EXTRAS</strong></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>HIGHLIGHT GENRE</strong></td>
<td>This enables you to select the programme genre. This function must be supported by the relevant station. The programme guide then displays programmes from the selected genre.</td>
</tr>
<tr>
<td><strong>GUIDE SEARCH</strong></td>
<td>Search for channels. This is where you can set the channels to be searched, the day and the genre. In addition, a full text search is available to you here.</td>
</tr>
<tr>
<td><strong>NOW</strong></td>
<td>Skip back to the current timeline.</td>
</tr>
<tr>
<td><strong>ZOOM</strong></td>
<td>Minimize time window in four steps.</td>
</tr>
</tbody>
</table>

The next table shows the additional button functions within the programme guide:

<table>
<thead>
<tr>
<th>Button</th>
<th>Function</th>
</tr>
</thead>
</table>
| **OK** | If the selected programme is running, the following options are available by pressing the **OK** button:  
**SELECT CHANNEL**: Select this option and press the **OK** button to switch to the selected channel.  
**MORE INFO**: Select this option and press the **OK** button to display information about the current programme.  
**RECORD**: Select this option and press the **OK** button to start recording the selected channel. After ending the recording by pressing the button, the recording is stored in the list of recordings. For more information, read the section “Aufnahmen menu” on page 57. If the selected programme is in the future, a recording timer is stored in the timer list. The recording then starts automatically at the beginning of the selected programme. For more information, read the section “Timer menu” 56  
**SET TIMER ON EVENT**: If the selected programme is in the future, this option is still available. Select this option and press the **OK** button to display a shift timer in the timer list. At the start of the selected programme, the device then automatically switches to the corresponding programme. For more information, read the section “Timer menu” 56. |
| **INFO** | Displays a detailed description of the selected programme (if available). Press **INFO** again to hide the description.  
If the description is longer, use the **P▼/▲** buttons to scroll within the text. |
| **BACK** | If a programme is running and you wish to select **NOW/NEXT, FILTER, PREVIOUS DAY, NEXT DAY** or **EXTRAS**, you must press the **BACK** button first. |
10.2. Source menu

This menu displays all active signal sources and can be selected with the ▼ ▶ button. Then press the OK button to call up the selected source.

**TV**
- TV mode (antennas, satellites and cable signals are played back)

**BACK AV**
- Audio/video input (AV)

**HDMI1**
- HDMI input 1

**HDMI2**
- HDMI input 2 (HDMI 2 can be used for CEC/ARC)

**HDMI3**
- HDMI input 3

**YPBPR**
- Device on the VGA input via an adapter (YUV/YPbPr)

**VGA/PC**
- Device on PC input

**WIRELESS DISPLAY**
- Playback content from another external player

**USBDISK**
- USB storage medium (optional)

**USB2**
- USB storage medium (optional)

**AUDIO VIDEO SHARING**
- Network service for data exchange between devices (optional)

The **SOURCE SETTINGS** is where you can activate/deactivate and rename signal sources.

These settings can also be made under **SETTINGS > SYSTEM > SOURCES**.

A signal source that you wish to select with **MODE** or ☰ (SOURCE), must be activated in the **SOURCES > SOURCE SETTINGS** menu.

To enable HDR via HDMI, the HDMI input must be set to **ADVANCED**. The HDMI inputs are, if necessary, renamed through the connected devices and the TV remote control operates the connected device.

10.3. Applications menu

This is where your preferred Internet applications are displayed, to enable faster access. The **ADD MORE** option, if available, enables you to add additional preferred applications as direct links. To do so, search for the required application in the pre-installed app store using the virtual keyboard. Then select the required app and press OK to confirm. Finally, select **ADD TO APPS** and press OK to confirm. The new application is now displayed under **APPS**. Netflix, Prime Video, the media portal and YouTube are pre-installed here.
10.4. **Settings menu**

10.4.1. **Picture menu**

As soon as the **PICTURE** menu is selected using the ‹ › buttons, the **MODE**, **ENERGY SAVING** and **PICTURE ZOOM** submenus appear above for quicker navigation and can be selected directly.

![Picture menu](image)

<table>

</thead>
<tbody>
<tr>
<td>VOLUME</td>
<td>This is where you can set the desired volume for narrator mode (on a scale of 0 to 100). Select a moderate volume. When in normal use, this can be changed using the V+/+ volume buttons on the remote control.</td>
</tr>
<tr>
<td>EQUALIZER</td>
<td>In the equaliser submenu, the preset can be set to MUSIC, MOVIE, SPEECH, FLAT, CLASSIC and USER. The settings in the equaliser menu can only be changed if the equaliser mode is set to USER. The default setting is USER and can only be changed if the option DOLBY AUDIO is disabled (OFF).</td>
</tr>
<tr>
<td>BALANCE</td>
<td>Set the balance between the left and right speakers (on a scale of -50 to +50). The default setting is 0 and can only be changed if the option DOLBY AUDIO is disabled (OFF).</td>
</tr>
<tr>
<td><strong>HEADPHONE</strong></td>
<td>Set the headphone volume here. This can only be changed if HEADPHONE/LINEOUT is set to HEADPHONE.</td>
</tr>
<tr>
<td>---------------</td>
<td>--------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>WARNING!</strong></td>
<td>Risk of hearing damage!</td>
</tr>
<tr>
<td></td>
<td>To prevent possible damage to your hearing, avoid listening at high volume over long periods of time.</td>
</tr>
<tr>
<td></td>
<td>▶ Before pressing play, set the volume to the lowest setting.</td>
</tr>
<tr>
<td></td>
<td>▶ Start playback and increase the volume to a comfortable level.</td>
</tr>
<tr>
<td><strong>SOUND MODE</strong></td>
<td>Standard setting STEREO. If the current programme supports DUAL mode (e.g. dual-language broadcasts), you can also choose here between DUAL-I and DUAL-II (original language and dubbed language).</td>
</tr>
<tr>
<td><strong>AUDIO LINK</strong></td>
<td>Here you can enable or disable the Bluetooth function of the device. With Audio Link enabled, it is possible to pair the TV set wirelessly with Bluetooth speakers (e.g. a soundbar). Select AUDIO LINK and press the OK button.</td>
</tr>
<tr>
<td><strong>DEVICE</strong></td>
<td>Select the ENABLED setting if you want to connect the device to an external speaker via Bluetooth. Then press the OK button to search for available Bluetooth connections. All found connections are then displayed. Use ▲▼ to select the desired device and press OK to pair the speaker or speaker system with the TV set.</td>
</tr>
<tr>
<td></td>
<td>Due to the great variety of different Bluetooth devices, faultless functionality cannot be guaranteed. Please also read the operating instructions of the device that you wish to connect to the TV. The device to be connected must be in search mode. To disconnect the connection again, select the DISABLED setting.</td>
</tr>
<tr>
<td><strong>AVL</strong></td>
<td>This function sets the sound so that a constant output volume is maintained between programmes. Set to OFF to return to the original volume settings. Set to OFF to hear a constant volume. If the DOLBY AUDIO menu item is set to anything other than OFF, amend the settings options. AUTO, NIGHT, NORMAL and OFF are available. In AUTO mode, the television automatically switches between NORMAL and NIGHT mode depending on the current time information. If no time information is available, this option always performs as NORMAL. When the television switches to NIGHT mode for the first time after this option has been set to AUTO, an information bar is shown on the screen. Please note that in contrast to NORMAL mode, NIGHT mode provides dynamic compression management suitable for silent surroundings.</td>
</tr>
<tr>
<td><strong>HEADPHONE/LINEOUT</strong></td>
<td>Select the audio signal for the headphone connection. The HEADPHONE setting enables volume regulation for the signal. The LINEOUT setting means that the signal has a predefined volume that cannot be changed. If this setting is selected, an external amplifier can be connected to the device.</td>
</tr>
<tr>
<td><strong>DYNAMIC BASS</strong> (optional)</td>
<td>Set the bass amplification to ON or OFF.</td>
</tr>
</tbody>
</table>
DOLBY AUDIO | Select Dolby Audio setting OFF, SMART, MOVIE, MUSIC or NEWS to optimise the sound. If you activate this option, EQUALIZER, BALANCE, DYNAMIC BASS and DTS TRUSURROUND can no longer be edited.

DTS TRUSURROUND | Activate/deactivate the surround sound effect.

DIGITAL OUT | Set the audio type for the digital output here.

| PCM | Standard format for the output of a stereo format |
| COMPRESSED | For the output of a digital data stream, e.g. on an end stage with Dolby Digital decoder |

BASS GAIN (optional) | Here you can increase or reduce (on a scale of 6 to -6) the bass component (subwoofer signal).

10.4.4. Network menu

Network settings

| NETWORK TYPE | Use ‹ › to select the network type WIRELESS DEVICE, WIRED DEVICE or DISABLED. |
| SCAN WIRELESS NETWORKS (optional WLAN) | Pressing the OK button displays an overview of all available networks. Make a selection using the ▲ ▼ buttons and press the OK button to confirm. If a password is required for a network, a virtual keyboard appears which you can use to enter this with the help of the direction buttons ‹ › ▲ ▼ and the OK button. After entering the password, select OK on the keyboard and press the OK button to confirm. |
| Disconnect | Disable network connection |
| PRESS WPS ON YOUR WIFI ROUTER (only for WLAN) | This option enables you to quickly establish a WPS connection via a wireless network (WLAN). Press and hold the WPS button on your router and confirm with the OK button. Then the WPS connection is established. |
| INTERNET SPEED TEST | Press the OK button to test the speed of the internet connection. |
Network settings

Press the OK button to call up further network configuration options.

### ADVANCED SETTINGS

**IP CONFIGURATION**
Select the **AUTOMATIC** or **MANUAL** setting here. If **MANUAL** is selected, three additional lines appear, where the **IP ADDRESS**, **SUBNET MASK** and **DEFAULT GATEWAY** data can be entered manually with the aid of the direction buttons ↔ and the number buttons.

**DNS CONFIGURATION**
Choose between **AUTOMATIC** or **MANUAL** here. If **MANUAL** is selected, two additional lines appear, where the **DNS SERVER 1** and **DNS SERVER 2** data can be entered manually with the aid of the direction buttons ↔ and the number buttons.

### WAKE ON
Activate/deactivate the Wake-On LAN/Wake-On Wireless LAN function (WoL/WoWL). This enables you to switch on the Smart TV via a different device (e.g. a smartphone with the MEDION® Life Remote app). Both devices must be connected to the same network via LAN or WLAN for this purpose. Select the **ON** setting to activate the function. The device being used as a remote control must be connected to the TV set once when it is switched on. The control function only works when the TV is in standby mode. If the TV is turned off and on again at the mains switch, the connection between the two devices is automatically restored.

### 10.4.5. Installation menu

- **Automatic channel scan**
- **Manual channel scan**
- **Network channel scan**
- **Analogue fine tune**
- **Satellite Settings**
- **Installation Settings**
- **Signal Information**
- **First time installation**

### Menu option Setting

**AUTOMATIC CHANNEL SCAN**
The automatic station search function helps you to search for and save new channels on your TV. A number of search options are available. Once you have selected the search option, press **OK**. Press **YES** to confirm the query and press **OK** to start the station search. Press **耵聍 (MENU)** to cancel the search prematurely. In this case, any found channels will not be saved.

</thead>
</table>
| **CONDITIONAL ACCESS** | If you want to watch subscription channels, you must first register with the channel provider. Once you have registered, you will receive a Conditional Access Module (CI module) and a special card from your provider. You will find information about the settings in the documentation supplied with the module. Install the CI components on your television in the following way:  
  ▶ Switch the television off and pull out the mains plug.  
  ▶ First insert the CI module in the slot on the side of the Smart TV. Then insert the card.  
  Please note: only insert or remove the CI module after you have disconnected the device from the power supply.  
  **NOTICE!**  
  **Risk of damage!**  
  The CI module or the television could be damaged if you attempt to insert the CI module by force.  
  ▶ The CI module must be inserted correctly: it cannot be inserted if it is the wrong way round.  
  ▶ Connect the television to the power supply, switch it on, and wait for a moment until the card is recognised.  
  Additional setup steps may be required for some CI modules, which you can complete in the **CONDITIONAL ACCESS** menu.  
  If no module is inserted, the message **NO COMMON INTERFACE MODULE DETECTED** appears on the screen.  
  The appearance and operation of the menu may vary depending on the module used. |
All language settings are made and displayed in the **SPRACHE** menu.

Calling up the Netflix app enables numerous films and series to be streamed directly over the Internet. This is a premium service and you must register when using the service for the first time.

NETFLIX is a subscription service that enables its members to stream films and series (‘NETFLIX contents’) using Internet-enabled televisions, computers and other devices (‘NETFLIX supported devices’). The NETFLIX service is provided to you by Netflix International B.V., a limited liability company in the Netherlands.

10.5. TV menu
As in the HOME menu, the GUIDE and CHANNELS menus are available here. For more detailed explanations for both options, see section “Home menu”.

10.5.1. Timer menu

Shift Timer
If a shift timer has been programmed via the EPG, the relevant programme is displayed in the TIMERS menu. The timer then switches to the set programme, however it is not possible to output the signal (e.g. to be recorded by an external recorder). A shift timer can only be programmed via the EPG. For more information, please see section “Programme guide (EPG – Electronic Programme Guide)” on page 35.

Recording Timer
A recording timer can be programmed via the EPG or the ADD TIMER option. The displayed shift and recording timer can now be selected and subsequently edited using EDIT SELECTED TIMER or deleted using DELETE SELECTED TIMER.

The following options are available if you want to edit or add a timer:

<table>
<thead>
<tr>
<th>Menu option</th>
<th>Settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHANNEL TYPE</td>
<td>Set the reception type (DVB-T/DVB-T2, DVB-C, DVB-S or analogue). Only reception types set up during the installation are displayed here.</td>
</tr>
<tr>
<td>TIMER TYPE</td>
<td>The RECORD option is preset here and cannot be changed. You can pro- gramme the start and end of a programme that you wish to record using the following options. Plug in a hard drive or USB stick to the USB port to do this. The relevant programme will then be recorded to the hard drive or USB stick. If the USB stick is not working correctly and an error message is displayed (e.g. not enough space available, although the stick is empty), it can also be formatted by the Smart TV under menu option TV &gt; RECORDINGS &gt; SETTINGS &gt; FORMAT DISK.</td>
</tr>
<tr>
<td>CHANNEL</td>
<td>Select the channel.</td>
</tr>
<tr>
<td>RECORD TYPE</td>
<td>This is preset and cannot be changed.</td>
</tr>
<tr>
<td>DATE</td>
<td>Enter the date. Use the number buttons to change the digits in the square brackets.</td>
</tr>
<tr>
<td>START</td>
<td>Enter the start time.</td>
</tr>
<tr>
<td>END</td>
<td>Enter the end time.</td>
</tr>
</tbody>
</table>
**DURATION**
The duration is determined automatically.

**REPEAT**
Select the interval at which the timer is to be repeated (**ONCE, DAILY, WEEKLY** or **WEEKDAYS**).

**CHANGE/DELETE**
If **DISALLOWED** is selected, a lock symbol appears. In this case, you can only open the entry with the PIN.

**PLAYBACK**
Setting options: **USE PARENTAL SETTINGS, ALLOWED, DISALLOWED**

It is not possible to add a shift timer manually.

### 10.5.2. Recording menu
All created recordings are listed in the **RECORDINGS** menu. This menu contains the following options:

<table>
<thead>
<tr>
<th>PLAY OPTIONS</th>
<th>OPTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>PLAY FROM START</td>
<td>Playback of the selected recordings starts from the beginning.</td>
</tr>
<tr>
<td>RESUME</td>
<td>If you have paused the selected recording before it is played back, it continues from this point.</td>
</tr>
<tr>
<td>PLAY FROM OFFSET</td>
<td>This option enables you to specify the exact point at which playback of the selected recording is to start.</td>
</tr>
</tbody>
</table>

**EDIT**
Information regarding the currently selected recording is available here. Under **RECORDING**, you can change the name of the selected recording using a virtual keyboard. In addition, you can specify under **DELETE**, whether the recording may be deleted or not (**ALLOWED** or **DISALLOWED**). Under **PLAYBACK**, activate the child lock so that the recording concerned can only be started once the PIN has been input (**DISALLOWED**). The factory default PIN is **0000**. This option can be used to make changes retrospectively via **RESET** and you can save your amendments with **SAVE**.

**DELETE**
This option can be used to delete existing recordings. To do this, answer the prompt with **YES**.

**SORT**
This option can be used to sort the list of recordings according to various criteria.
### SETTINGS

**START EARLY:** This is where you can specify that the recording is to start before the set start time.

**END LATE:** This is where you can specify that the recording is to end after the set end time.

**MAX TIMESHIFT:** This is where you can set the max. timeshift. The timeshift function enables you to pause playback during the recording with **ⅈ** or fast forward or rewind using **_payments**. The recording runs unimpaired in the background. The maximum timeshift can be set here.

**AUTO DISCARD:** The automatic deletion of recordings can be set using this option. The following options are available here:

- **DISCARD:** Keine / Älteste / Längste / Kürzeste
- **UNPLAY:** Eingeschlossen / Nicht eingeschlossen. An exception is only possible if oldest, longest or shortest is selected under **DISCARD**.

**HARD DISK INFORMATION:** To display information regarding the USB hard drive, check this option and press the **OK** button. Hard drive information includes, for example, the volume of remaining available storage space.

**FORMAT DISK:** Select the **FORMAT DISK** menu. You must now enter the device PIN here. The factory default PIN is **0000**. The notice **THIS WILL REMOVE ALL RECORDINGS** appears. Select **YES** if you want to start the formatting or **NO** to cancel the process. Confirm with **OK**.

### Recording via media buttons

You can operate the recording and playback using the **media buttons**.

| **** | Press this button to start recording the current programme. |
| **ⅈ** | From the recording list, you can start playback of the selected recording using this button. |
| **⅋** | Pause and restart playback with this button. |
| **■** | Stop the recording and playback with this button. |
| **_payments** | During playback, activate fast rewind at various speeds with this button: **x2, x4, x8, x16, x32**. Press the **⅋** button to return to normal playback. |
| **_payments** | During playback, activate fast forward at various speeds with this button: **x2, x4, x8, x16, x32**. Press the **⅋** button to return to normal playback. |

### Timeshift Recording

You can start a timeshift recording in TV mode to view the current channel after a delay. To do so, proceed as follows:

| **⅋** | Press this button during the current programme. The programme stops there and the timeshift recording runs in the background. Press this button again to start the timeshift playback. The channel now runs again with the delay. |
| **ⅈ** | If you have previously started the timeshift recording using the **⅋** button, you can also start the timeshift playback with this button. |
| **■** | Stop the timeshift playback with this button. The channel is then played back normally and not with a time delay. |
10.6. Media browser menu

If you connect a USB data medium to the Smart TV, you can play music files, images and videos.

Information about using USB

- Certain types of USB devices (MP3 player) may not be compatible with this Smart TV.
- Connect the USB device directly.
- Do not use a separate cable, because this may cause compatibility problems.
- Never remove the USB device while a file is being played.

NOTICE!

Risk of damage!

Connecting and disconnecting USB devices quickly and repeatedly is dangerous and can physically damage the USB device and the Smart TV itself.

- Do not insert and then remove the USB device repeatedly in quick succession.

As soon as a USB storage medium is connected, the device opens the media browser automatically. As soon as the USB storage medium is removed, the note **USB DEVICE (0) DISCONNECTED** appears and the device automatically switches back to normal TV mode again.

If several USB drives are connected, a drive query appears after the media type is selected. Select the desired USB storage medium here.

With connected USB storage, if you exit the media browser using the **EXIT** button, you can call it up again at any time through the source selection (using **SOURCE** or in the **SOURCES** menu). The name of the USB storage is now displayed here. Select this as the source. If the USB storage medium is removed, this option disappears again.

All files and playable data are shown in the media browser. Navigate in the media browser using the **< >** direction buttons. Open media files using the **OK** button.

The following options are available:

10.6.1. VIDEOS

- **II** (PLAY/PAUSE): Start/pause playback
- **< >**: Fast forward/rewind
- **< >**: Previous video/next video

10.6.2. MUSIC

- **II** (PLAY/PAUSE): Start/pause playback
- **< >**: Previous/next track

10.6.3. PHOTOS

- **II** (PLAY/PAUSE): Start/pause playback
- **< >**: Previous/next photo
- ****: Zoom
- ****: Rotate photo to the right (in 90° steps)
- ****: Rotate photo to the left (in 90° steps)

Alternatively, you can use the corresponding media buttons to operate the media browser.
10.6.4. Loop function
For media playback, you can activate an additional loop function, which either continuously re-
peats the current media file (marked with a full stop) or repeats all files (no marking).

10.6.5. Random playback
An additional random playback function plays all video, photo and music files on your USB storage
in random order.

10.6.6. Settings

PICTURE/SOUND SETTINGS:
You can make changes to the screen settings (only for photo and video files) and audio settings for
playing back media. You can also make equivalent settings in TV mode.

MEDIA BROWSER SETTINGS:
The following options are intended for the media browser settings (only for video and photo files):

| SLIDESHOW INTERVAL | Select the display time for images in the slide show (5 to 30 sec-
| SHOW SUBTITLE | Activate/deactivate subtitle function. |
| SUBTITLE LANGUAGE | Select the subtitle language. |
| SUBTITLE POSITION | Select the subtitle position. |
| SUBTITLE FONT SIZE | Select the font size for the subtitles. |

OPTIONS:
When playing back videos, you can still make further adjustments:

| SUBTITLE/AUDIO | Activate additional audio voiceover here. |
| SUBTITLE TIME CORRECTION | Specify a time delay for the subtitle functionality here. |
| JUMP TO SECOND | Specify a position in the current video that you want to skip to. |

Press the INFO button during playback to display the video progress bar.
Press the BACK button to return to the media browser.
To exit the media browser, press the EXIT button.

10.6.7. Using an audio video sharing network service
The audio video sharing network service allows a data exchange between devices if they support
the audio video sharing function. An existing network connection (e.g. with an NAS server) is requi-
red for this. Audio Video Sharing is then shown as the source in the signal source list.
Press the SOURCE button.
Select AUDIO VIDEO SHARING and confirm with OK. A list of available DLNA media is then dis-
played.
Select the desired media server or network and confirm the selection with OK. All available fold-
ers and media files are then displayed.
Further control of this option corresponds to the media browser.
11. HbbTV system

HbbTV (Hybrid Broadcast Broadband TV) enables a combination of broadcasting and Internet content that can usually be accessed and displayed by pressing the red button on the remote control. HbbTV services include conventional radio/TV stations, catch-up TV, video on demand, EPG, interactive advertising, customisation options, polls, games, social networks and other multimedia applications.

HbbTV applications can only be called up if the broadcasting station transmits these signals and the TV is connected to the internet. The scope and operation vary depending on the channel and station.

Whether a station offers HbbTV applications or not, is shown via a brief on-screen display. The exact form and position depends on the individual application. Use the red button to open and close the application pages. Navigation within the applications is carried out by using the colour buttons on the remote control, but this can vary depending on the channel and the programme. Observe the messages within the applications.

12. MEDION® Life Remote app

The MEDION® Life Remote app is the innovative way to operate your MEDION® television from your smartphone via your home network.

The MEDION® Life Remote application makes use of the features of your mobile phone – such as touch screen capability and motion sensor – to provide easy-to-use, convenient and improved options for operating your MEDION® Smart TV. What’s more, you also have the option of operating your television via the touch pad and directly entering text when calling up Internet pages.

Please note that the television to be controlled must be in the same network as the smartphone. Please note that in rare cases the app may be incompatible, depending on the smartphone operating system.

Apple QR code

Scan the QR code to install the app directly onto your smartphone or tablet.

Android QR code

The TV is identified within the app using an IP address. To set up the app, you may then need to search for the IP address of your TV.
Die MEDION® Life Remote app provides you with the functions of a remote control. By swiping up, down, left and right, you can navigate to the five operating interfaces with the following functions:

Please note that certain buttons, depending on the model, may not be functional.

- **OK** Confirm selection in certain menus; in TV mode: call up the list of TV stations
- **Direction buttons** Navigate through various menus; 
  - Up/Down: station selection in TV mode. Confirm with OK to call up the selected TV station.
  - Left/Right: Navigate through various menus
- **BACK** Move back one step in the menu
- **MENU** Open and close menu
- **EXIT** Exit the menu
- **Red button** Various functions depending on the menu;
  - TV mode: Call up station-specific programme information
- **Green button** Various functions depending on the menu
  - TV mode: after pressing the red button, call up EPG
- **Yellow button** Various functions depending on the menu;
  - TV mode: after pressing the red button, call up media library
- **Blue button** Various functions depending on the menu;
  - TV mode: after pressing the red button, call up Teletext
- **Internet button**
- **Number buttons**
  - TV: Channel selection, teletext: Page selection
  - (SWAP) Set previous TV channel
  - (TIMER) Activate/deactivate delay timer
  - (↓) Switch Smart TV on/off (switch standby mode on/off)
- **SCREEN** Select the screen format
- **SUBT.** Subtitles on/off (if available)
- **LANG.**
  - Analogue TV: stereo/mono;
  - Digital TV: Select audio language/subtitle language (if available)
- **TEXT** Activate teletext
  - Press 2 x = set transparent
  - Press 3 x = close
- **SOURCE** Select input signal of connected devices
- (MEDIA) Call up the media browser
- **EPG** Digital TV: call up the electronic programme guide
- **Q. MENU** Access the quick menu (OPTION MENU) to quickly edit basic options
- **FAV** Call up favourites list
- **P+/–** Channel selection buttons
  - TV: select next (+) / previous (–) channel; teletext: select next (+) / previous (–) page
- **↓↑** Increase (+) or decrease (–) volume.
- **Mute**
INFO

Digital TV: Display information (e.g. current channel number); display information in many applications (e.g. multimedia)

Media buttons

- Fast rewind;
- Fast forward;
- Recording function (if available on the device used);
- Stop playback;
- Start playback;
- Pause playback

Increase (+) or reduce (–) volume for media playback

TV

This button exits the user interface of the app and returns back to select the TV to be controlled. The app is then unpaired from the TV. This option is available on each of the five user interfaces.

Furthermore, extensive keyboard and language control options and touchpad controls are available.

13. Data protection MEDION® Smart TV

Your Internet-capable TV has an Internet service function (HbbTV, portal and open browsing). These functions enable you to access services, content, software and products provided by third parties on the Internet. In addition, you have access to open Internet content. Your device checks automatically via this route whether new software versions are available for your device. When doing so, your device sends out the IP address, the software version and the MAC address of the device to ensure software updates run correctly.

This data is required to make use of the software update service. Access to applications in the portal or via HbbTV may, depending on the provider, require a registration, setting up a user account and/or a subscription when using certain services. Registration may require the provision of your personal data and the selection of a unique and secret password. Please check the privacy policy of the provider beforehand.

MEDION® shall not be liable if the HbbTV, the portal or a service does not comply with the user’s requirements, nor does it guarantee that safe and error-free use of such services can always occur without restrictions, or continuously, at the required time.

MEDION® shall not be liable for the information or content provided via HbbTV, the portal or the open Internet, nor for its use and reliability. When you purchase your Smart TV, special warranties are provided. The validity of these warranties, including the related disclaimers, remains in force.

If you have any further questions on the subject of data protection when using your Smart TV, please contact the respective provider of the Internet service functions or contact MEDION® directly on www.medion.com under the heading Data Protection.
14. Troubleshooting

Malfunctions can sometimes have quite trivial causes, but they may also be the result of defective components. We have included a brief troubleshooting guide below which may help to solve any problems. If these tips don’t solve the problem then we’ll be more than pleased to help you out. Just give us a call!

<table>
<thead>
<tr>
<th>Error</th>
<th>Measures</th>
</tr>
</thead>
</table>
| There is no picture and no sound. | • Check if the power cable is inserted properly into the socket.  
• Check if signal reception is set to TV.  
• Check whether the power switch on the bottom of the device is turned on. |
| There is no AV picture. | • Check to ensure that the contrast and brightness settings are correct.  
• Check to ensure that all external devices have been connected properly.  
• Check to ensure that you have selected the correct AV source.  
• Any input source that you want to select with SOURCE (SOURCE) must be marked in the SOURCES > SOURCE SETTINGS menu. |
| There is no sound. | • Ensure that the volume has not been set to the minimum level.  
• Ensure the mute setting is not active. Do this by pressing the button in the top left of the remote control with the crossed out loudspeaker symbol. |
| There is no picture and no sound. I can hear noise, though. | • The reception might be poor. Check if the antenna is connected properly. |
| The picture is not clear. | • The reception might be poor.  
• Check if the antenna is connected properly. |
| The picture is too bright or too dark. | • Check the settings for contrast and brightness. |
| The picture is not sharp. | • The reception might be poor.  
• Check if the antenna is connected properly.  
• Check the settings for sharpness and noise reduction in the PICTURE menu. |
| There is a double/triple picture. | • Check if the antenna is aligned properly.  
• Waves might be reflected off buildings or mountains. |
| The picture is pixellated. | • There might be interference from cars, trains, power lines, neon lights, etc.  
• There might be interference between the antenna and power cables. Position the cables further apart. |
| There are stripes on the screen or the colours are faded. | • Is there interference from another device?  
• Transmission antennae on radio stations, ham radios and portable phones can also cause interference.  
• Operate the device as far away as possible from the device that might be causing the interference. |
<p>| The MODE multifunction button on the device is not working. | • The child lock might be on. |</p>
<table>
<thead>
<tr>

</tbody>
</table>
| The remote control is not working.                                  | Check whether the batteries in the remote control are functional and have been inserted the right way round.  
|                                                                      | Ensure the sensor field is not exposed to strong light.                   
|                                                                      | Turn the device off and on again using the power switch on the bottom of the device. |
| Menu cannot be opened.                                               | Check whether CEC is enabled. In this case, the menu cannot be opened. This is not a defect. In some cases, the menu of the device connected via HDMI2 opens. This is dependent on the source device and must be supported accordingly.  
|                                                                      | Change the input source.                                                   |
| No Bluetooth® connection                                            | Make sure that all settings have been correctly specified on the device and that the Bluetooth® function is enabled.  
|                                                                      | Check whether the device to be connected is switched on and is in discoverable mode.  
|                                                                      | Make sure that all settings have been correctly specified on the device to be connected and that the Bluetooth® function is enabled. Consult the operating instructions of the corresponding device, if necessary. |

In many cases, it is sensible to reset to the factory settings with subsequent reinstallation.

If cookies are disabled, the home page of the media portal is displayed each time it is called up.
14.1. Do you need more help?

If the suggestions in the previous sections did not solve your problem, please contact us. To make it easier for us to help you, please have the following information to hand:

- What external devices are connected?
- What messages appear on the screen?
- When operating the device, at which step did the problem occur?
- If you have a PC connected to the device:
  - How is your computer configured?
  - What software were you using when the problem occurred?
- What steps have you already taken to try and rectify the problem?
- Please provide us with your customer number if you have one.

14.2. Smart TV pixel faults

Despite the state-of-the-art production methods, in rare cases there may be individual or multiple pixel drop-outs (dead pixels) due to the highly complex technology. For active matrix TFTs with a resolution of \(3840 \times 2160\) pixels, which are each made up of four sub-pixels (red, green, blue, white), there are a total of approx. 33.2 million control elements in use. Occasionally pixels or individual sub-pixels can fail or become incorrectly controlled because of this very high number of transistors and the extremely complex manufacturing process used in this context.

\(n^* = 1.5\)

The permitted number of defects for every type named above in each class of pixel defect refers to one million pixels and must be converted accordingly to match the physical resolution of the display.

Your device complies with the European ISO 9241-307 Class II standard (pixel fault class). Pixel defects up to the specified maximum number are not covered by the warranty.
15. Cleaning

WARNING!
Risk of electric shock!
There is a risk of death due to an electric shock when the housing is open and you touch parts inside the device!
- Do not open the device housing. It does not contain any parts for maintenance by the user. Always unplug the device and disconnect all cables before cleaning.

You can increase the lifespan of your Smart TV by taking the following measures:

- Protective film has been applied to the high-gloss finish to protect the television from scratches. Remove the film after you have set up the TV correctly.
- If the high-gloss finish becomes dirty, wipe off the dust first. Then wipe down gently with a cleaning cloth. If you do not wipe off the dust first, or wipe the high-gloss finish too vigorously you could scratch the high-gloss finish.
- Do not use solvents, corrosive or gaseous cleaning agents.
- Clean the screen with a soft, lint-free cloth.
- Take care to ensure that no water droplets remain on the Smart TV. Water can cause permanent discoloration.
- To avoid damage to the device, water must not penetrate into the interior of the device under any circumstances.
- Do not place the screen in strong sunlight or near ultraviolet light.
- Store the packaging material in a safe place. Only use this box to transport the Smart TV.

16. Storing the device when not in use

If you do not intend to use the TV over a longer period of time, store it in a cool, dry place and make sure that it is protected from dust and extreme temperature fluctuations. Remove all connections and take the batteries out of the remote control in advance.
17. Disposal

Packaging
Your device has been packaged to protect it from damage in transit. The packaging is made of materials that can be recycled in an environmentally friendly manner.

Device
The adjacent symbol of a crossed out wheelie bin means that the device is subject to Directive 2012/19/EU. Do not dispose of old devices in normal household waste. In accordance with Directive 2012/19/EU, the devices must be properly disposed of at the end of its service life. This involves separating the materials in the devices for the purpose of recycling and minimising the environmental impact. Take old devices to a collection point for electrical scrap or a recycling centre. Before doing so, remove the batteries from the device and take them to a separate collection point for used batteries. Contact your local waste disposal company or your local authority for more information on this subject.

Batteries
Proper disposal of used batteries protects the environment and your personal health. Do not dispose of used batteries with normal household rubbish. Batteries must be disposed of correctly. For this purpose, retailers that sell batteries and local collection points provide containers in which you can dispose of them. Contact your local waste disposal company or your local authority for more information.

In connection with the sale of batteries or the supply of devices containing batteries, we are obliged to draw your attention to the following:

As the end user, you are legally required to return used batteries. You can return used batteries that we stock or have stocked in our range as new batteries to our dispatch warehouse free of charge (shipping address).

### Connections

- Antenna connection (analogue TV, DVB-T/DVB-T2 or DVB-C)
- Satellite connection (DVB-S/S2)
- 2 x USB connection
- 1 x LAN RJ-45

### Video

- 3 x HDMI® 2.0 with HDCP 2.2 decoding
- 1 x VGA (15 pin D-Sub, YUV/YPbPr)
- AV In (cinch)

### Audio

- Stereo audio in for AV, YUV, VGA (cinch)
- Headphone output (3.5 mm jack)
- Digital Audio Out (SPDIF, optical)

### Drives/storage media

- Drives: USB, Common Interface (CI+) Slot
- Supported formats via USB ²:
  - Photo: JPG, JPEG, JPE, BMP, PNG
  - Music: MP3, WMA, WAV
  - Film: MPEG 1/2/4, MKV, MOV, MP4, DAT, VOB, H263, FLV, HEVC, Xvid
- Capacities: USB max. 1 TB

### Remote control

- Transmission type: Infrared
- LED classification: 1
- Battery type: 2 x 1.5V AAA R03/LR03

### Ambient temperatures

- Permissible ambient temperature: +5°C to +35°C
- Permissible relative humidity: 20% – 85%

---

² The playback of all formats cannot be guaranteed due to the large number of different codecs.
### Dimensions/weight X14000 (MD 31510)
- **Dimensions without feet (W x H x D)**: Approx. 922 x 548 x 89 mm
- **Dimensions with feet (W x H x D)**: Approx. 922 x 608 x 275 mm
- **Weight without feet**: Approx. 7.1 kg
- **Weight with feet**: Approx. 7.5 kg
- **Mounting on the wall**: Vesa standard, hole spacing 200 x 200 mm

### Dimensions/weight X14305 (MD 31511)
- **Dimensions without foot (W x H x D)**: Approx. 972 x 579 x 94 mm
- **Dimensions with foot (W x H x D)**: Approx. 972 x 622 x 220 mm
- **Weight without foot**: Approx. 8.2 kg
- **Weight with foot**: Approx. 11.7 kg
- **Mounting on the wall**: Vesa standard, hole spacing 200 x 200 mm

### Dimensions/weight X14908 (MD 31512)
- **Dimensions without foot (W x H x D)**: Approx. 1115 x 657 x 92 mm
- **Dimensions with foot (W x H x D)**: Approx. 1115 x 700 x 220 mm
- **Weight without foot**: Approx. 10.7 kg
- **Weight with foot**: Approx. 14.2 kg
- **Mounting on the wall**: Vesa standard, hole spacing 200 x 200 mm

### Dimensions/weight X15504 (MD 31513)
- **Dimensions without foot (W x H x D)**: Approx. 1245 x 734 x 94 mm
- **Dimensions with foot (W x H x D)**: Approx. 1245 x 777 x 220 mm
- **Weight without foot**: Approx. 13.9 kg
- **Weight with foot**: Approx. 17.4 kg
- **Mounting on the wall**: Vesa standard, hole spacing 400 x 200 mm

### Dimensions/weight X16503 (MD 31514)
- **Dimensions without foot (W x H x D)**: Approx. 1460 x 843 x 74 mm
- **Dimensions with foot (W x H x D)**: Approx. 1460 x 897 x 300 mm
- **Weight without foot**: Approx. 24.4 kg
- **Weight with foot**: Approx. 32.3 kg
- **Mounting on the wall**: Vesa standard, hole spacing 400 x 200 mm

### WLAN
- **Frequency range**: 2.4 GHz/5 GHz
- **WLAN standard**: 802.11 a/b/g/n
- **Encryption**: WEP/WPA/WPA2
