General information

Reading and safekeeping of operating instructions

These operating instructions are for the refrigerator MD 37182. They contain important information about set-up and operation. Read the operating instructions carefully, in particular the safety instructions, before you use the refrigerator. Non-compliance with these operating instructions can lead to serious injury or damage to the refrigerator. Please retain these operating instructions for future reference. If you pass on the refrigerator to a third party, please also pass on these operating instructions.

Explanation of symbols

The following symbols and signal words are used in these instructions, on the appliance or on the packaging.

⚠️ DANGER!
This signal word indicates a hazard with a high degree of risk which, if not avoided, will result in death or serious injury.

⚠️ WARNING!
This signal word indicates a hazard with a medium level of risk which, if not avoided, could lead to death or serious injury.

⚠️ CAUTION!
This signal word indicates a hazard with a low level of risk which, if not avoided, could result in a minor or moderate injury.

⚠️ PLEASE NOTE!
This signal word warns of possible damage to property.
Proper use

Warning: risk of electric shock.

Warning: risk of explosion.

This symbol gives you useful additional information on assembly or operation.

Declaration of conformity (see section “Declaration of conformity”): Products labelled with this symbol comply with all the applicable Community rules of the European Economic Area.

Proper use

This appliance is used for cooling drinks and food. This appliance is intended to be used for domestic purposes only. It is not intended to be used for commercial or similar purpose. Such usage will be treated as misuse and will invalidate your warranty. Please note that we shall not be liable in cases of improper use:

- Do not modify the appliance without our consent and do not use any auxiliary equipment which we have not approved or supplied.
- Use only spare parts and accessories that we have supplied or approved.
- Heed all the information in these operating instructions, especially the safety information. Any other use is deemed improper and can cause personal injury or property damage.
- Do not use the appliance in extreme environmental conditions.
Safety information

⚠️ WARNING!

Risk of injury for children or persons with limited physical, sensory or mental capabilities (for example partially disabled people or older persons with limited physical and mental capabilities) or no knowledge and experience (older children, for example).

- Keep the appliance and its accessories out of the reach of children.
- This appliance may be used by children over the age of 8 and by persons with reduced physical, sensory or mental abilities or by those without experience and/or knowledge, if they are supervised or have been instructed in the safe use of the appliance and have understood the dangers that result from it. Children must not be allowed to play with the appliance. Cleaning and user maintenance must not be carried out by children, unless they are aged 8 or over and are supervised.
- Children younger than 8 should be kept away from the appliance and the mains cable.

⚠️ WARNING!

Risk of suffocation.

There is a risk of suffocation if plastic packaging or small parts are inhaled or swallowed.

- Do not store any of the packaging material used (bags, polystyrene, etc.) within the reach of children.

General safety instructions

- Do not operate the appliance if it has been visibly damaged or the mains cable or plug is defective.
Safety information

**WARNING!**

**Risk of explosion!**
There is a RISK OF EXPLOSION AND FIRE due to the resulting fumes!
- Do not store or use any petrol or other flammable materials or liquids in the appliance or near to the appliance.

**CAUTION!**

**Risk of injury!**
Burns caused by low temperatures are possible.
- Do not touch the cold inner walls of the refrigerator compartment with your hands.

**Setting up the appliance**
- Connect the appliance only to a properly installed safety power socket (220–240 V ~ 50/60 Hz) that is easy to reach and close to the set-up location. The safety socket must be freely accessible so that you can unplug the appliance from the mains quickly if necessary.
- Do not use an extension cable.
- Ensure the mains cable is out of harm’s way and will not trip people up. Do not allow the mains cable to become trapped or squashed.
- To ensure adequate ventilation, maintain a minimum distance of 10 cm to the ceiling and rear wall and 5 cm to the walls, otherwise internal electronics could be damaged.
- Set up the appliance in a dry and ventilated room. Do not expose the appliance to direct sunlight because this can damage the surfaces of the appliance and increase energy consumption.
- Protect the appliance from moisture and splashes.
- Never immerse the appliance in water.
- Do not set up the appliance near to heat sources such as ovens, radiators, underfloor heating, etc.
- Set up the appliance on a stable, flat surface.
- Set up the appliance horizontally; compensate for any unevenness of the worktop by adjusting the front screw foot. The rear feet and the other front foot are fixed and can’t be adjusted.
- Do not place any other household appliances (such as a microwave, food processor, etc.) on top of the refrigerator.
- Do not use any electrical devices inside the appliance.

Cleaning and maintenance

⚠️ WARNING!

Risk of electric shock!

There is a risk of electric shock due to live parts.
- Before starting any maintenance work, always ensure that the plug has been removed from the wall socket (do not pull on the cable, but on the plug). If the plug is not accessible, the corresponding mains supply from your distribution board needs to be switched off.
- Never pull out the plug with wet or moist hands.

⚠️ WARNING!

Risk of explosion!

There is a RISK OF EXPLOSION AND FIRE due to the resulting fumes!
- Do not use any flammable liquids to clean the appliance or any parts of the appliance.
Safety information

Faults

⚠️ WARNING!

Risk of electric shock!
There is a risk of electric shock due to live parts.
- Never try to open and/or repair an appliance component yourself. There is a risk of electric shock.
- To prevent risks, damaged mains cables may only be replaced by our Service Centre or by a qualified specialist workshop.
- In the event of a fault, contact our Service Centre or another suitable specialist workshop.

Disposal

⚠️ WARNING!

Risk of injury!
There is a risk of suffocation if the door slams shut.
- Remove the door before disposing of the appliance and leave the storage shelves for the bottles in the appliance to prevent children climbing into it.
- Before disposal cut off the mains cable.
Package contents

⚠️ WARNING!

Risk of suffocation.
There is a risk of suffocation if plastic packaging or small parts are inhaled or swallowed.
- Do not store any of the packaging material used (bags, polystyrene, etc.) within the reach of children.

When unpacking, ensure that the following parts are included:
- Upright fridge
- Glass shelf
- Operating instructions, warranty documents

Changing the door hinge

The refrigerator is supplied with a right-hinged door. If you want to change the opening direction, proceed as follows:

Tools required:
- No. 8 spanner (metric)
- Small flat-head screwdriver
- or Phillips screwdriver

1. Unplug the appliance from the mains socket.
2. Empty the refrigerator, including the shelf and all food, etc.

Place all parts safely to one side. They will all be needed to reinstall the door.

3. Remove the top hinge cover on the right side and the cover on the left side, for example with a flat-head screwdriver (see fig. C) and remove the dummy plugs from the door.
4. Undo the three screws on the upper hinge using the spanner.
5. Remove the upper hinge and put it on the left side and tighten the screws hand tight.
6. Tilt the appliance slightly backwards.
7. Undo the three screws on the lower hinge with a spanner and remove it.
8. Fit the lower hinge on the left side and tighten the screws.
9. Align the door so that the seal is applied evenly. Now tighten the screws on the upper hinge (see fig. D).
10. Replace the hinge cover on the hinge; place the cover on the now exposed holes and press down firmly. Push the dummy plugs into the holes on the door.

Using the refrigerator

- Remove the packaging materials and all protective films.
- Clean all parts of the appliance thoroughly before switching it on for the first time (see section “Cleaning the appliance” on page 15).
- After cleaning, dry the appliance thoroughly before switching it on for the first time.
- Set up the appliance in a suitable location (see “Setting up the appliance” on page 10).
- Connect the appliance to a 220–240 V ~ 50/60 Hz wall socket.
- Set the temperature control 3 to LOW and close the door.

About 1–2 hours after connection to the mains, the appliance will have reached operating temperature and you can load the appliance.

Notes on using the refrigerator

The appliance works correctly in ambient temperatures from +10°C to +32°C.
- Place only food or drinks that are already cooled or at room temperature into the refrigerator. Do not place hot food or drinks into the refrigerator.
- Ensure adequate ventilation to prevent increased energy consumption and any possible damage to the internal electronics.
- Do not open the door too often and do not leave the door open for extended periods.
- Store foods only in suitable containers or in the original packaging.

Setting the temperature

The temperature of the refrigerator compartment is controlled via the temperature control 3.
Cleaning the appliance

The cooling temperature can be set from 5°C (setting **LOW**) to 15°C (setting **HIGH**).

The energy consumption and the temperature inside the fridge can increase at ambient temperatures outside the permissible range.

- Do not load the refrigerator and the freezer compartment until the appliance has cooled down.

  Before adding fresh foods, bring the temperature of the refrigerator compartment down to the coldest level **LOW**.

**Switching off the appliance**

- In order to de-energise the appliance completely, pull the mains plug out of the socket.
- Wait around 3–5 minutes before switching the appliance back on.

**Cleaning the appliance**

**WARNING!**

**Risk of electric shock.**

There is a risk of electric shock from electrified parts.

- Before starting any cleaning, pull the mains plug out of the socket (pull on the plug, not the cable). If the plug is not accessible, the corresponding mains supply from your distribution board needs to be switched off.

**NOTICE!**

**Risk of damage.**

Equipment damage due to improper handling of the sensitive surfaces of the appliance.

- Sensitive surfaces: Do not allow oil and grease to come into contact with the plastic parts and the door seal as the surface can become porous and brittle.
Cleaning the appliance

- Never use acidic, abrasive or granular, acetic-acid-, soda- or solvent-based cleaning agents. These may damage the surfaces of your appliance.

1. Empty the refrigerator.
2. Pull out the plug 8.
3. Remove the shelf 6 from the refrigerator compartment.
4. Wash out the refrigerator compartment with a mild detergent (such as washing-up liquid or a soda solution of 3 tablespoons of soda to one litre of water) and dry thoroughly.
5. Clean all of the fittings carefully and dry them.
6. Clean the appliance surfaces, except the door seal, with a mild cleaning agent. If necessary, the appliance surface can be treated with silicone wax.
7. Clean the door seal with clean water; wipe it off and allow it to dry.
8. Put the mains plug back into the wall socket.
9. As soon as the appliance has reached operating temperature, you can fill it again with food.

Cleaning the fan filter

To protect the fan 1 on the rear of the appliance from dust, there is a dust filter fitted in front of the fan. To ensure proper operation, make sure that the air filter does not get clogged. It must be cleaned if necessary.

1. Unplug the refrigerator from the wall socket.
2. Push the two clips on top of the fan filter 9 together at the same time to remove the filter from the rear of the appliance.
3. Rinse the air filter under running water and then leave it to dry completely.
4. Place the fan filter so that the three tabs fit into the matching recesses on the rear of the appliance and push the clips into the two upper slots until they lock into place.
Transport

1. Unplug the appliance from the wall socket.
2. Remove all items and the glass shelf from the interior of the appliance.
3. Screw in the adjustable foot.
4. Tape the door in place using adhesive tape.

Troubleshooting

Faults may occur during operation. Please use the following table to check whether you can resolve the problem yourself. All other repairs are prohibited and will invalidate the warranty cover. In the event of a fault, contact our Service Centre or another suitable professional repair workshop.

**End of operation/Storage**

If you do not intend to use the appliance for a long period of time, it is necessary to perform the following tasks:
- Remove the plug from the wall socket.
- Empty the appliance.
- Wipe out the cooling area and allow it to dry.
- Carefully wash all fittings.
- Leave the door open to avoid unpleasant odours and mould formation.
Disposal

Appliance
Old appliances should not be disposed of with the normal household rubbish.

In accordance with Directive 2012/19/EU, the appliance must be properly disposed of at the end of its service life.

This involves separating the materials in the appliance for the purpose of recycling and minimising the environmental impact.

Take old appliances to a collection point for electrical scrap or a recycling centre.

Contact your local waste disposal company or your local authority for more information on this subject.

- Before disposal cut off the cable.

Disposal of packaging

Sort packaging before disposal. Dispose of card and cardboard with waste paper and dispose of film with recyclable materials.
Technical data

**Power supply:** 220-240 V ~ 50/60 Hz

**Power consumption:** 50 W

**Cooling temperature range:** +5°C to +15°C

**Energy efficiency class:** A+

**Energy consumption:** 82 kWh/year

**Storage capacity:** 17 l

**Climate class:** SN/N

**Noise emissions:** 38 dB

**Dimensions (W x H x D):** 385 x 341 x 423 mm

**Weight:** approx. 7.3 kg

**Propellent gas:** cyclopentane

**Interior light, LED:** 0.6 W

Subject to technical changes.

Declaration of conformity

Medion AG hereby declares that the product MD 37182 conforms to the following European requirements:

- EMC Directive 2014/30/EU
- Low Voltage Directive 2014/35/EU
- Ecodesign Directive 2009/125/EU
- RoHS Directive 2011/65/EU

Full declarations of conformity are available at www.medion.com/conformity.
