1. **About these instructions**

Read these operating instructions carefully before using the device for the first time. Note the warnings on the device and in the operating instructions. Always keep the operating instructions close to hand. If you sell the equipment or give it away, make sure you also hand over these instructions and the warranty card.
### 1.1. Symbols and keywords used in these instructions

</table>

- Bullet point/information on operating steps and results
- Tasks to be performed
1.2. **Proper use**

This device offers various options in terms of its use:
- The device is intended for private use only and not for industrial/commercial use.

Please note that we shall not be liable in case of improper use:
- Do not modify the device without our consent and do not use any auxiliary equipment which we have not approved or supplied.
- Use only spare parts and accessories which we have supplied or approved.
- Follow all the instructions in these directions for use, especially the safety information. Any other use is deemed improper and can cause personal injury or damage to the product.
- Do not use the device in extreme ambient temperatures and conditions.
1.3. Usage limitations

It is essential to turn off the smartphone in the following situations:

• Before boarding an aircraft or before packing it in your luggage. The use of radio devices in aircraft can have dangerous effects on the flight controls and interrupt radio contact and is thus prohibited.

• In hospitals, clinics or other health centres and in any locations in the direct vicinity of medical devices.

• In all locations where there is a risk of explosion (e.g. petrol stations; in dust-filled environments, e.g. where there is metal dust).

• In locations where the use of radio-controlled devices is prohibited, e.g. on construction sites or locations where people are working with explosives.

• While driving a motor vehicle (if no hands-free car kit is available).

1.4. Making calls while driving

As making calls can reduce concentration levels (while driving a car or riding a bicycle), this can lead to accidents. The following instructions should be followed exactly.

It is an offence to hold a telephone in your hand (or between your head and your shoulder) to make a call while driving. It is also illegal to write SMS, e-mail or use other programs while driv-
ing. Failure to comply will result in fines and in your name being entered in the central traffic offenders register.

The use of hands-free sets is allowed.

**WARNING!**

*A wired headset is not a hands-free set and may not be used while driving.*

**Warning!**

*The use of headphones/earphones with a high volume can lead to lasting damage to your hearing. Set the volume to the lowest level before reproducing any sound. Start the sound reproduction and increase the volume to the level that is comfortable for you. Changing the basic settings of the equaliser can also cause damage to the hearing of the listener.*

*It can cause damage to the hearing ability of the listener if a device is operated through earphones with an increased volume for a long period.*
Hands-free systems should only be installed by suitably qualified professionals. Incorrect installation or maintenance can have hazardous consequences and may also void your guarantees – also that of the car. Irradiation of the car’s onboard electronics can cause serious defects and result in danger to life and limb for you and others.

Do not use voicemailbox while driving. Do not listen to your messages until you have parked the car and switched the motor off. If you accept a call via the hands-free set while driving, keep the call as short as possible. Concentrate on your driving. Try to to find a parking area before making a call.

Please comply with all national regulations if you use you mobile while driving abroad. If you need to call often while driving, you should have a hands-free system installed in your car. These systems have been specially developed for this purpose.

Ensure that neither your smartphone nor the hands-free system can interfere with the functionality of the safety equipment in your car. For vehicles with airbags: Bear in mind that the
activation of the airbag involves the release of a large amount of force. Therefore, never install permanent or temporary telephone equipment in the area above the airbag.

If the smartphone or accessories are incorrectly installed this can lead to serious injury when the airbag is activated.

**WARNING!**

*Ignoring this advice can lead to serious injuries and/or property damage. Non-compliance can lead to severe penalties!*
1.5. **Additional costs for Internet and roaming usage**

Considerable volume-based data costs may apply when using the mobile Internet. To limit these costs, we recommend that you book an Internet flat rate. Find out about the various options available from your mobile network operator. Also ask about the rates for using your smartphone abroad (roaming) because this can also result in high charges.

**NOTE!**

When you use the smartphone for the first time, data roaming (use of data services in a different data network than your own home network provided by your mobile network operator e.g. abroad) is deactivated! Check your mobile plan before using the device and, if required, switch off mobile data services until you have activated a suitable Internet flat rate.
2. Safety instructions

- Do not let children play with electrical appliances without supervision. Children are not always aware of potential hazards.
- Keep packaging material such as plastic film away from children. There is a risk of suffocation if used improperly.

**DANGER!**

*Never open the device housing or the mains adapter housing. There is a risk of electric shock when the housing is open.*

- Do not insert anything into the device through the slots and openings. This could result in an electrical short-circuit, an electric shock or even ignite a fire which will damage the product.
- Avoid exposing the device to water droplets or spray and do not place vases or anything containing water on the unit. Liquids penetrating the device may impair the electrical safety of the product.
- Plug the mains adapter into AC 100-240V~, 50/60 Hz earthed sockets only. If you are not
sure about the power supply at the installation location, please ask your power supplier.

- The socket must be close to the device and easy to access.
- Use only the supplied mains adapter and attached USB cable.
- For extra safety, we recommend using an overvoltage protection device to prevent the product from sustaining damage as a result of power surges or lightning strikes.
- If you want to disconnect the device from the mains, first pull the mains adapter out of the wall socket and then out of the socket on the product. The mains adapter or the product may be damaged if this process is carried out in the reverse order. Always take hold of the plug when disconnecting the cable from the socket. Never pull on the cable.
- Position the cable so that it cannot be stepped on or tripped over.
- To avoid damaging the cable, do not place any objects on it.
- Do not expose plug-in connections to pressure, e.g. from lateral forces. This could cause internal and external damage to the device.
- Do not apply force when connecting cables and plugs and make sure that connectors are the right way round.
- In order to prevent short-circuits and cable breaks, do not crush or bend cables.
- Maintain a distance of at least one metre from sources of high-frequency and magnetic interference (TV sets, loudspeakers, mobile phones, DECT telephones, etc.) in order to avoid malfunctions and data loss.
- Do not connect any devices to the smartphone which do not meet the requirements set out in the EN60950 standard “Information Technology Equipment – Safety” or the EN60065 standard “Audio, video and similar electronic apparatus - Safety requirements”.

2.1. Cleaning and care

You can increase the lifespan of your device with the following measures:
- Always unplug the device and disconnect all cables before cleaning.
- Do not use solvents, corrosive or aerosol detergents to clean the device.
- Use appropriate cleaners to wipe the display,
e.g. glass cleaners or monitor cleaners (available from specialist retailers).

- Clean the screen with a soft, lint-free cloth.
- Do not place the screen in strong sunlight or near ultraviolet light.
- Make sure that no water droplets remain on the device. Water can cause permanent discolouration.

Store the packaging material in a safe place; always use this to transport the device.

**ATTENTION!**

None of the parts inside the device require cleaning or maintenance.

### 2.2. Data backup

**NOTE!**

Back up your data on external storage media after each update. We do not accept any liability for claims for compensation arising from loss of data or any damages incurred.
2.3. Information about the display

• Do not place any objects on top of the device and do not exert pressure on the screen. This could break the screen.
• To avoid damaging the screen, do not touch it with sharp objects.
• If the screen breaks, there is a danger of injury. If this happens, pick up the shattered pieces wearing protective gloves and send them to your service centre for professional disposal. Finally, wash your hands with soap, as the pieces may have been contaminated with chemicals.
• Prolonged exposure to strong sunlight can lead to display errors if the display is not refreshed. These should disappear after refreshing the screen.

2.4. Notes on batteries

This device contains a battery. Please note the following when using batteries:
• Charge the battery regularly and as fully as possible. Do not leave the battery discharged for long periods.
Keep the battery away from heat sources such as radiators or open flames, e.g. candles. There is a risk of explosion!

If the device cannot be switched on even though it is connected to a power source, please contact your service centre.

Do not use chargers or batteries that are damaged in any way.

Use the battery only for its intended purpose in this smartphone.

Do not dismantle or deform the batteries. You could injure your hands or fingers or battery fluid could come into contact with your eyes or skin. If this happens, rinse the affected areas immediately with plenty of clean water and contact your doctor immediately.

Keep batteries away from children. If batteries are mistakenly swallowed, consult your doctor immediately.

Risk of explosion if battery is replaced by an incorrect type.

Before inserting the batteries, check that the contacts in the device and on the batteries are clean and, if necessary, clean them.
• Always observe the correct polarity. Make sure that the plus (+) and minus (−) poles are correctly inserted to avoid short circuits.

**DANGER!**

*There is a risk of explosion, if rechargeable batteries are replaced incorrectly.*

• Do not leave the battery in hot or cold locations, e.g. in a car in summer or winter. Extremes of temperature can adversely affect the battery’s capability to charge correctly.

• Do not attempt to short circuit the battery. A short circuit across the contacts can damage the battery or the object connected to it.

• If you are not going to use your smartphone for a long time, please remove the battery.

• Dispose of used batteries according to the instructions.

2.5. Environmental requirements

• Keep your smartphone dry.

• Do not expose it to extremes of temperature (hot or cold).

• Do not place your phone next to burning ci-
garettes, open flames or other heat sources.

- Do not drop or bang the smartphone and do not shake it. Rough handling can damage the internal circuitry.
- Do not paint your smartphone as the paint could block the microphone, the ear piece or hinder moving parts and thus prevent normal use.
- Treat your smartphone carefully and store it in a clean and dust-free location.
- Under no circumstances attempt to open the smartphone or battery. Any modification to the device is prohibited and will invalidate the guarantee.
- The ring tone is played back via the ear piece. To avoid damage to hearing, accept the call before putting the smartphone to your ear.
- Use the supplied stereo headset only with this smartphone to avoid risks

2.6. Faults

- If the mains power adapter, connection cable or device is damaged, immediately remove the plug from the power supply.
• Never try to open and/or repair the device or the mains adapter yourself. In the event of a fault, contact our Service Centre or another suitable professional repair workshop.

2.7. People with pacemakers

When using your smartphone, be sure to maintain a safety distance of at least 15 cm from your implanted pacemaker to avoid any possibility of interference.

Do not carry the smartphone in a breast pocket when it is switched on. Hold the smartphone to the ear on the opposite side to your pacemaker to avoid any possible adverse effects.

Switch off the smartphone immediately if you suspect any adverse effects.

2.8. People with hearing aids

If you use a hearing aid, ask your doctor or the manufacturer of the hearing aid about any possible adverse effects caused by radio waves.
2.9. Emergency calls

This smartphone uses radio signals, wireless and land-based networks, as well as functions programmed by the user. Because of this, a connection cannot be guaranteed under all possible circumstances. Therefore, you should not rely exclusively on the smartphone for essential communication (e.g. in medical emergency situations).

Emergency calls may not be possible on some mobile networks or while certain network services and/or smartphone functions are being used. Contact your local network operator.
2.10. Saving a number for use in emergencies

If you are involved in an accident or injured and have your smartphone with you, it is important for the emergency services to be able to inform a close friend or family member. Often, it is not immediately apparent to rescue workers which contact in the phone directory should be called. Therefore an international abbreviation has been developed to allow emergency services to quickly inform one or more people of an event. Save a contact under the name ICE (“in case of emergency”) for this purpose. If more than one person is to be notified, you can use ICE1, ICE2, and so on.
3. **Package contents**

Please check your purchase to ensure all items are included and contact us within 14 days of purchase if the delivery is incomplete:

The following items are supplied with your product:

- Smartphone P4501
- Lithium-Ion Battery
- microSD card
- AC Adaptor

4. Preparations for using the smartphone

You must insert at least one SIM card and charge the battery before you can use the smartphone.

4.1. SIM card

Purchasing a SIM card involves choosing a network provider, telephone network and plan. Therefore, check out which plan from which network provider is best suited to your telephone usage before purchasing the SIM card.

You will also receive your telephone number with the SIM card. SIM cards can also feature additional memory functions (e.g. for the phone book or SMS messages).

- Store all SIM cards out of the reach of small children.
- Handle your SIM card carefully because the card and its contact points can be easily damaged through scratching or bending.
4.2. Installing the SIM card

**ACHTUNG!**

Always ensure that the smartphone is switched off when carrying out this process to avoid any damage to the device or the card.

- Remove the back cover.
- Remove the battery.
- Slide the SIM card into the relevant slot. The contacts should be facing downwards and the bevelled corner at the bottom right (in the direction of the battery compartment).

4.3. Installing the microSD card

**ACHTUNG!**

Always ensure that the smartphone is switched off when carrying out this process to avoid any damage to the device or the card.

- Remove the back cover.
- Insert the memory card into the metal slot with the metal contacts facing down.
4.4. Installing the battery

- Remove the back cover.
- Before installing the battery, first insert the SIM card and, if desired, a microSD card as described in the previous sections.
- Insert the battery by aligning the contacts on the battery with the contacts in the battery compartment. Gently push down on the battery until it clicks into place.
- Press the cover gently back into place until you hear a click.

4.5. Charging the battery

**HINWEIS!**

You can charge your smartphone with SIM card inserted or without SIM card inserted.

- Before you charge the battery, make sure that the battery cover has been securely replaced.
- Connect the adapter to the charger jack. Ensure that the adapter is inserted with the correct orientation. Do not force the connector into the charger jack.
- Connect the charger to a standard AC wall outlet.
5. First startup

5.1. Switching on the Smartphone

- Hold down the Power Key to switch on your smartphone. The smartphone will switch on and the quick selection screen will be displayed.
- Drag the lock symbol to the position to unlock the smartphone, to use the camera, or to start the Google search function.
- Enter the four- to eight-digit PIN code for the SIM card and confirm with OK. If you have entered a wrong digit, tap on Cancel.

5.2. Touch control

You can use finger gestures to control your phone. The controls on your touch screen change dynamically depending on the tasks you’re performing. Do not use any pointed or sharp-edged objects.

- Tap the buttons, icons, or applications to select items or to open applications.
- If you hold down your finger on an input field, all of the available options will be displayed.
- Flick the screen to scroll up, down, left or right.
- Point, drag and drop to move particular items across the screen.
- Double-tap the screen to zoom in to or out from an image.
5.3. Using the Google™-account

Your smartphone provides you with access to a variety of applications from Google™. You need a Google™ account to use these applications. This account allows you to use a large number of different services, e.g. Google Mail™.

6. Initial setup

When you first power on your phone after purchase or reset it to factory settings, you need to configure some settings before using it:

- If required, change the language by tapping on the relevant language option.
- Tap on Start on the start screen and follow the instructions shown on the screen.
- Tap on Yes to sign in to your Google™ account.
- Tap on No if you have not yet created a Google™ account.
- You can now create a Google™ account (tap on Get an account). If you do not want to create a Google™ account or sign at this time then tap on Not now.
NOTE!

You can view the display in portrait or landscape format. Simply hold the smartphone upright or on its side to change the orientation of the display.

An Internet connection is required in order to create a Google™ account or to sign in. You can connect to the Internet either via your SIM card or a Wi-Fi connection. Please bear in mind that costs may be incurred for the Internet connection if you are connecting via your mobile network operator and you do not have a flat rate contract.

- Enter the Google™ location options and tap on Next.
6.1. Switching your Smartphone off

- To switch it off, hold **Power Key** to call up the phone options.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Action Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Airplane mode</td>
<td>(switches the smartphone to airplane mode)</td>
</tr>
<tr>

</tr>
<tr>
<td>Meeting mode</td>
<td>(switches the smartphone to vibration mode)</td>
</tr>
<tr>
<td>Activate sounds</td>
<td>(activates all acoustic signals on the smartphone)</td>
</tr>
</tbody>
</table>
6.2. Switching to standby mode

In standby mode, your device will be placed into a low-energy standby mode with the display turned off in order to save battery power. If there is no operation within a preset time, the screen backlight will automatically turn off, and the device will be locked.

You can adjust the preset time under Settings  Display  Standby.
 Press the ON/OFF button to switch to standby mode.

6.3. Waking up from standby mode

This is the default setting and can be changed in the menu.
 While the screen display is off, press the power button quickly to re-illuminate the screen.
 Drag the symbol in any direction until the quick access screen appears.
6.4. Main screen

You decide what is displayed on your start screen. Set your own background, add shortcuts for the widgets or apps you require or remove them if desired.
<table>

</tbody>
</table>
6.6. Using the notification field

Swipe your finger from the top downwards over the status bar to open the notification field that displays your calendar events, new messages and current settings such as call forwarding or call status. In addition, you can open messages, reminders, etc. from here.
### 6.7. Notification LED

In addition to the notification field, the smartphone indicates the following events on the status LED shown below:

<table>
<thead>
<tr>
<th>Ereignis</th>
<th>LED</th>
</tr>
</thead>
<tbody>
<tr>
<td>Missed call; SMS/WhatsApp received; other notifications e.g. update available</td>
<td>flashes green</td>
</tr>
<tr>

6.9. Favorites list

1) Start call
2) Contacts
   Access to all contacts on your smartphone
3) Open main menu
4) SMS/MMS messages
5) Open internet browser

6.10. Making the first call

- Tap on the telephone icon on the home screen.
- Enter the phone number.
- Tap on , to start dialling. It is also possible to make a call from the contact list, call list or a text message.
6.10.1. Answering a Call
- Drag the telephone receiver symbol onto the green telephone receiver symbol.

6.10.2. Rejecting a Call
- Drag the telephone receiver symbol onto the red telephone receiver symbol.

6.10.3. Rejecting Calls with an SMS
- Drag the telephone receiver symbol onto the SMS/MMS symbol and select the appropriate template. The SMS will be sent using the SIM card previously defined for SMS/MMS messages.

6.10.4. Contacts
You can save contacts in your smartphone memory or your SIM card. More information about a contact can be saved on the smartphone memory than on the SIM card. For example, addresses, photos, nicknames, websites and much more.
- You can call your contacts by tapping on (Contacts).

The contacts screen contains the following tabs: Contacts, Favourites and Groups.
6.11. SMS/MMS

Under **SMS/MMS**, you have access to short messages (SMS) or multimedia messages (MMS). You can send SMS or MMS messages. If you receive a new message, you can open it via the notification field or the message screen. Simply tap on the new message to read it.

6.11.1. Writing a new Message

- Tap on (SMS/MMS).

- Tap on the symbol for a **New Message**. Enter the number or name of the recipient. Corresponding contacts will be suggested during input. Tap on a suggested contact to add it as a recipient.
- Tap on **Type message** and then enter your message.
- Tap on **Send** to send your text message.
- If you want to add an attachment to a text message, tap on the paperclip symbol and select the relevant attachment. The SMS will then be automatically converted into an MMS message.
6.12. Google Mail™

Google Mail™ is a web-based e-mail service that is configured when you create your Google™ account. Depending on the synchronisation settings, Google Mail™ on your smartphone will be automatically synchronised with your Google Mail™ account on the Internet.

- Tap on the main screen.
- Tap on Google Mail.
- Tap on write e-mail .
- Enter the e-mail address for the recipient in the To field. If you want to send the e-mail to multiple recipients, separate each e-mail address using a comma. You can enter multiple recipients.
- Enter the subject and text.
- Press the Menu key and tap on Send .
7. Connecting to the internet

You can use the standard connection settings to access the Internet via your mobile phone network or use your Wi-Fi connection. In order to access the Internet via the mobile data network, an appropriate service must be active in your contract.

**NOTE!**

Read the chapter „Additional costs for Internet and roaming usage“ through carefully to avoid unnecessarily high phone bills. Also contact your mobile network operator if the settings for accessing the mobile data network provided by your service provider are not preconfigured on your smartphone. If you change the settings without consulting your mobile network operator then your smartphone may not function correctly.
7.1. Adding a new data network connection

Your smartphone is preconfigured for accessing the Internet via the ALDImobile service. If it is necessary for you to add a new data network connection, ask your mobile network operator for the following information:

• Name of the access point (APN)
• If necessary, the user name and password.
• Server IP and port number, if the network uses a proxy server.

› Tap \( \text{Icon} \) on the main screen.
› Tap on Settings \( \Rightarrow \) More... \( \Rightarrow \) Mobil networks \( \Rightarrow \) Access Point Names.
› Press the Menu key and tap on New APN.
› Tap on Name to enter the name of your access point (freely selectable).
› Tap on APN to enter the APN that you want to add.
› Tap on Proxy and Port to enter the server IP and port if the network uses a proxy server.
› Tap on Username and Password and enter the required information in each case. (If there are no user names and passwords, leave these fields blank.)
› If required, tap on APN type.
› Press the Menu key and tap on Save to conclude the process.
NOTE!
In order to set the APN to the default settings, press the Menu key and tap on Reset to default.

7.2. Additional costs for Internet and roaming usage

Considerable volume-based data costs may apply when using the mobile Internet. To limit these costs, we recommend that you book an Internet flat rate. Find out about the various options available from your mobile network operator. Also ask about the rates for using your smartphone abroad (roaming) because this can also result in high charges.

NOTE!
When you use the smartphone for the first time, data roaming (use of data services in a different data network than your own home network provided by your mobile network operator e.g. abroad) is deactivated!

Check your mobile plan before using the device and, if required, switch off mobile data services until you have activated a suitable Internet flat rate. This is done as follows:
7.3. Internet

Volume-based data costs may apply when using the mobile Internet. Check your mobile service tariff before using the device and, if required, switch off mobile data services until you have activated a suitable Internet flat rate. This is done as follows:

- Tap on "Settings".
- Tap on the following in sequence Settings ⇒ More...
- Now tap on Mobile networks.
- Tap to deactivate the check box next to Data enabled. This will prevent data from being transmitted over the mobile network. Later, when you want to reactivate data services, simply recheck the box.

7.4. Roaming

Some Internet flat rates only provide for a limited volume of data traffic, if at all, when abroad. To avoid excessive costs for Internet use abroad, please do the following:

- Tap on "Settings".
- Tap on the following in sequence Settings ⇒ More.
- Now tap on Mobile networks.
- Now tap on Data roaming.
- Tap to deactivate the check box next to Data Roaming. This will prevent data from being transmitted over the mobile network while you are abroad. Later, when you want to reactivate data services, simply recheck the box.
7.5. Limiting data usage

The smartphone has an automatic function for limiting mobile data usage. If the value you have set is exceeded then the data connection is deactivated,

- Tap on  
- Tap on the following in sequence Settings ⇒ Data usage.
- Now select whether you want to set the data usage via Mobile or WI-Fi.

**NOTE!**

The time period for displaying the monthly data usage can be defined under the option Data usage cycle.

- Select the date for resetting the data usage cycle.
- Tap on Set to save the date.
7.6. Changing the data volume

As current smartphone contracts offer Internet flat rates with different data usage limits, it is advisable to define the data usage limit of your smartphone contract in the data usage limit function on your smartphone. For example, if your monthly Internet flat rate has a max. limit of 1 GB, set the red line (limit) to 1 GB. Set the yellow line (warning) to a lower value.

- Tap on the table and drag the red line (limit) to 1 GB.
- Now drag the yellow line (warning) to a lower value.
- Tap on the Back button to save your entry.
7.7. Activating Wi-Fi

Wi-Fi provides you with access to the Internet over a distance of several metres.

- Tap on the Menu key on the main screen.
- Tap on **Settings** ⇒ **Wi-Fi**.
- Activate the **Wi-Fi** checkbox to switch on this function.
- The name of all of the Wi-Fi networks available for your smartphone and their security settings (open or secure) will now be displayed.
- Tap on a network that you want to connect to.
- Tap on Scan to update the list of available networks in your immediate vicinity.

**NOTE!**

If you attempt to make a connection to a secure network, you will be required to enter a password to gain access.
8. Recycling and disposal

**Device**
At the end of its life, the device should not be disposed of in household rubbish. Enquire about the options for environmentally friendly and appropriate disposal.

**Batteries**
Do not dispose of used or defective batteries in the household rubbish! They should be taken to a collection point for used batteries.

**Packaging**
Your device has been packaged to protect it against transportation damage. Packaging is raw material and can be re-used or added to the recycling system.
8.1. Declaration about conformity

The following remote equipment has been supplied with this Smartphone:

- Wireless LAN
- Bluetooth

The company declares herewith that these devices comply with the fundamental requirements and the other relevant terms of the 1999/5/EG Guideline.

This device fulfils the basic requirements and the relevant regulation of the Ecodesign Guideline 2009/125/EG.

Complete declarations of conformity are available under www.medion.com/conformity.

10. Licence information

This product is based in part on open source software the use of which is subject to the GNU General Public Licence (GPL) Version 2. This goes hand in hand with a commitment on the part of the manufacturer to make the corresponding parts of the software that have been modified also available under this licence. You can acquire the source code for this product in the following manner:

1) Visit MEDION Service at http://www.medion.com/de/service/start and enter the MD number or the MSN number of your device in the search field. You will find these numbers on the rear side of your device. In the window that appears, select the category “Software”.

2) Alternatively, we can send you the source code for free on a data medium. If you would like us to do this, please send an e-mail to opensource@medion.com.

Please note that the source code is only of interest to software developers. As a pure user of the product, you would normally have no use for the source code.

You will find the complete text of the GPL below as well as on the device under Settings / About phone / Legal Information. Further information about the GPL as well as official translations in various languages can be found at http://www.fsf.org/licensing.

GNU General Public Licence
Version 2, June 1991
Copyright (C) 1989, 1991 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston,
MA 02110-1301, USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.
Preamble
The licenses for most software are designed to take away your freedom
to share and change it. By contrast, the GNU General Public License is in-
tended to guarantee your freedom to share and change free software-
-to make sure the software is free for all its users. This General Public Li-
cense applies to most of the Free Software Foundation’s software and to
any other program whose authors commit to using it. (Some other Free
Software Foundation software is covered by the GNU Lesser General Pu-
Public License instead.) You can apply it to your programs, too.
When we speak of free software, we are referring to freedom, not pri-
price. Our General Public Licenses are designed to make sure that you have
the freedom to distribute copies of free software (and charge for this
service if you wish), that you receive source code or can get it if you want
it, that you can change the software or use pieces of it in new free pro-
grams; and that you know you can do these things.
To protect your rights, we need to make restrictions that forbid anyone
to deny you these rights or to ask you to surrender the rights. These re-
strictions translate to certain responsibilities for you if you distribute co-
pies of the software, or if you modify it.
For example, if you distribute copies of such a program, whether gratis
or for a fee, you must give the recipients all the rights that you have. You
must make sure that they, too, receive or can get the source code. And
you must show them these terms so they know their rights.
We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author’s protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors’ reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone’s free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The „Program“, below, refers to any such program or work, and a „work based on the Program“ means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term „modification“.) Each licensee is addressed as „you“.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program’s source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this
License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program. You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Pro-
gram with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who
have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients’ exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances. It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consis-
tent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and „any later version“, you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM „AS IS“ WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.
CHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.
