Quick Guide

16 GB¹ USB Flash Drive S89033 (MD 86617)

Included with your USB Flash Drive
Please check that the contents listed below are supplied with your package. Your package should include the following components:

- USB Flash Drive
- Quick Guide
- Warranty Card

System Requirements
- Slot: USB Port (USB 1.1/2.0)
- Operating system: Microsoft® Windows® 7 / Vista® SP1 / XP SP3

Safety Instructions
Please read this chapter carefully and observe all listed notes. This ensures a reliable operation and long life expectancy of your USB Flash Drive. Keep these instructions with your device at all times. In the event that you transfer ownership of this device, please provide these instructions to the new owner. Please contact our Service Centre if you are experiencing technical problems with your device.

Data Security
NOTE!
Every time you update your data make back-up copies on an external storage medium. The supplier does not assume liability for data loss or damage to data storage units, and no claims can be accepted for damages resulting from the loss of data or consequential losses.

Operational Safety
- Follow the operating instructions of your computer.
- Keep the device away from humidity and avoid vibration, dust, heat, and direct sunlight, in order to prevent operational interference.
- Never open the case. This would void all warranty claims and it could possibly cause the destruction of the unit.
- This device is not intended for use by people (including children) with reduced physical, sensory or mental abilities or for those without experience and/or knowledge, unless they are supervised by a person responsible for their safety or they have been instructed in its use. Children should be supervised to ensure they do not play with this device.
- Before operating the device after a transport, allow it to become acclimatized. High temperature and humidity deviations can lead through condensation to moisture build up, which can cause an electrical short. Fasten down the plug cover before trans-portation.

Electromagnetic Compatibility
While connecting the device, the guidelines for electromagnetic compatibility must be followed. Keep at least 1 meter distance from high frequency and magnetic sources of interference (TV, loudspeakers, mobile phones, etc.), to avoid operation disruption and data loss.

Cleaning Instructions
Normally cleaning of this device is unnecessary.
- This device does not contain parts that must be serviced or cleaned.
- Make sure the USB Flash Drive does not become contaminated. Do not use solvents, corrosives, or spray cleansers. If necessary, clean the casing with a moist cloth.

Recycling

Packaging
To avoid damage during transport, the device is stored in packaging. Packaging is produced mostly from materials which can be disposed of in an environmentally friendly manner and be professionally recycled. Contact your local authority waste department for further information.

Device
At the end of its life, the appliance must not be disposed of in household trash. Enquire about the options for environmentally-friendly disposal.

¹ GB is equal to 1 billion bytes. The actual amount of available memory may vary.
Getting Started

Connecting

Remove the protective cover of the USB Flash Drive and connect the device with an available USB port. The USB Flash Drive will be recognized and the operating system assigns the letter of an empty drive. Now you can use the device like a diskette drive (copy data, delete, etc.).

**NOTE!**

| The shape of the USB stick may cause it to partially cover an adjacent USB port. Connect a USB extension in this case.

Removing USB Flash Drive

- With some operating systems it may be necessary to sign off the device.
- The installed USB Flash Drive is displayed in the taskbar. Right click with the mouse “Unplug or Eject Hardware”.

The instruction for device removal will follow.

Customer Service

Errors and Possible Causes

**USB Flash Drive is not recognized:**
- Is the device connected correctly?
- Check in the Windows® device manager, whether the USB units are correctly linked. If necessary re-install the USB controller.

**Data cannot be read / written:**
- Did you format the USB Flash Drive with another computer? Different formats (FAT/FAT32/HFS) may be incompatible. Save the data and reformat the USB Flash Drive with a compatible format.

**Please note:**

If the USB Flash Drive does not operate normally due to an electrostatic discharge, faulty data exchange or other error, please carefully disconnect the USB Flash Drive and reconnect it.

Additional Support

If the suggestions in the above section have not solved your problem, please contact the service hotline and we will attempt to help you solve the problem. Before you contact the Helpline, however, please have the following information available:

- How is your computer configured?
- What additional peripherals do you use?
- What messages, if any, appear on your screen?
- What software were you using when the error occurred?
- What steps have you already undertaken to solve the problem?
- If you have been given a customer number previously, please quote this.
